

The background of the entire image is composed of 100 concentric, irregular, rounded rectangular shapes. These shapes are nested within each other, creating a series of concentric frames. The lines are thin and dark, and the overall effect is a complex, organic pattern that resembles a topographical map or a series of nested contours. The shapes are not perfectly square, but have rounded corners and slightly irregular edges, giving them a 'blob-like' appearance.

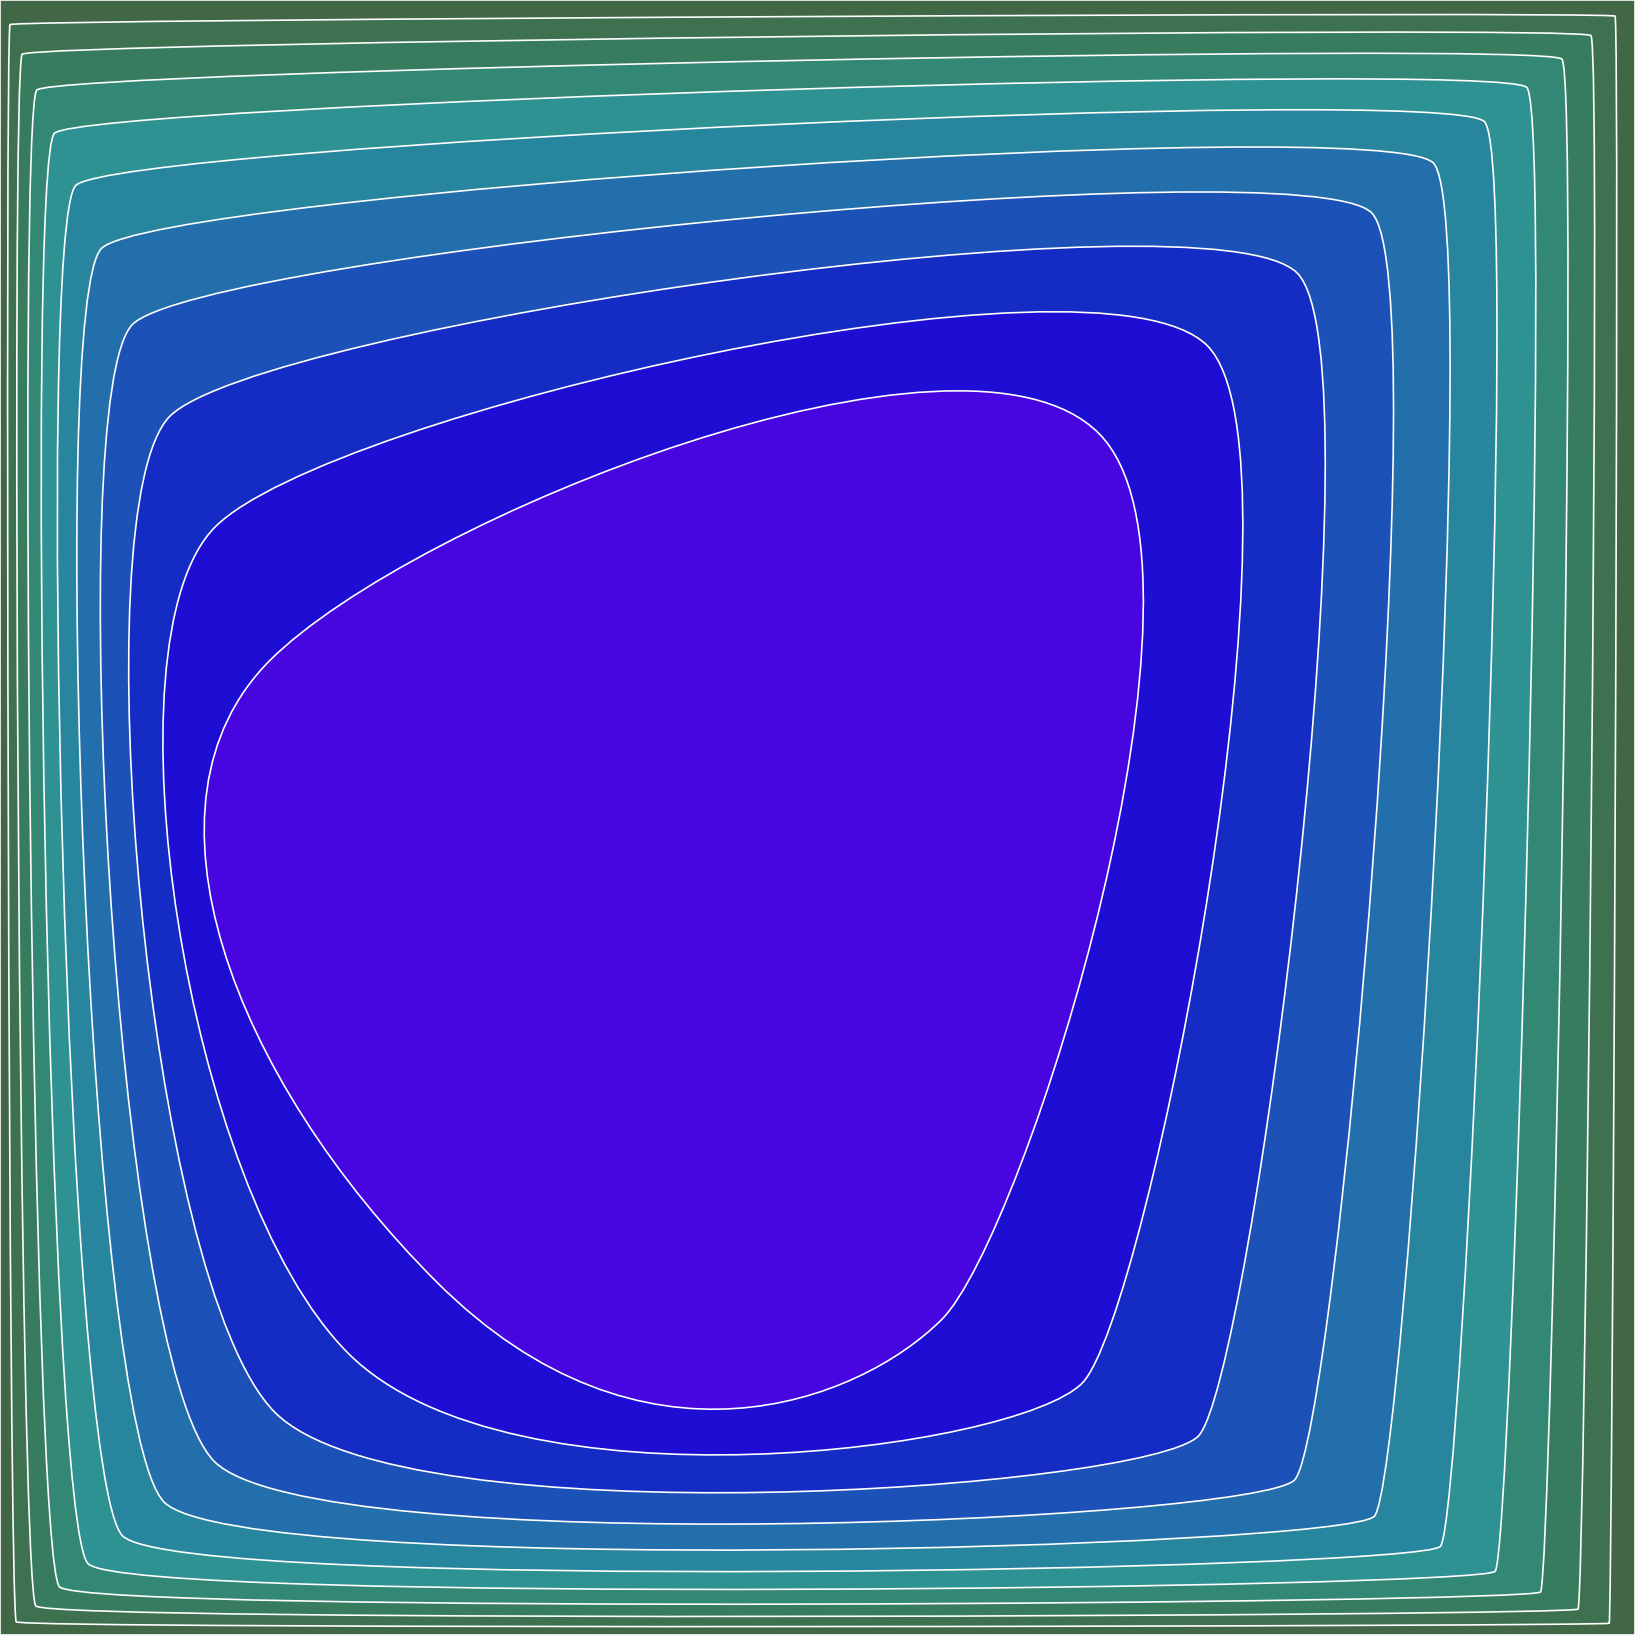

100 random blobs

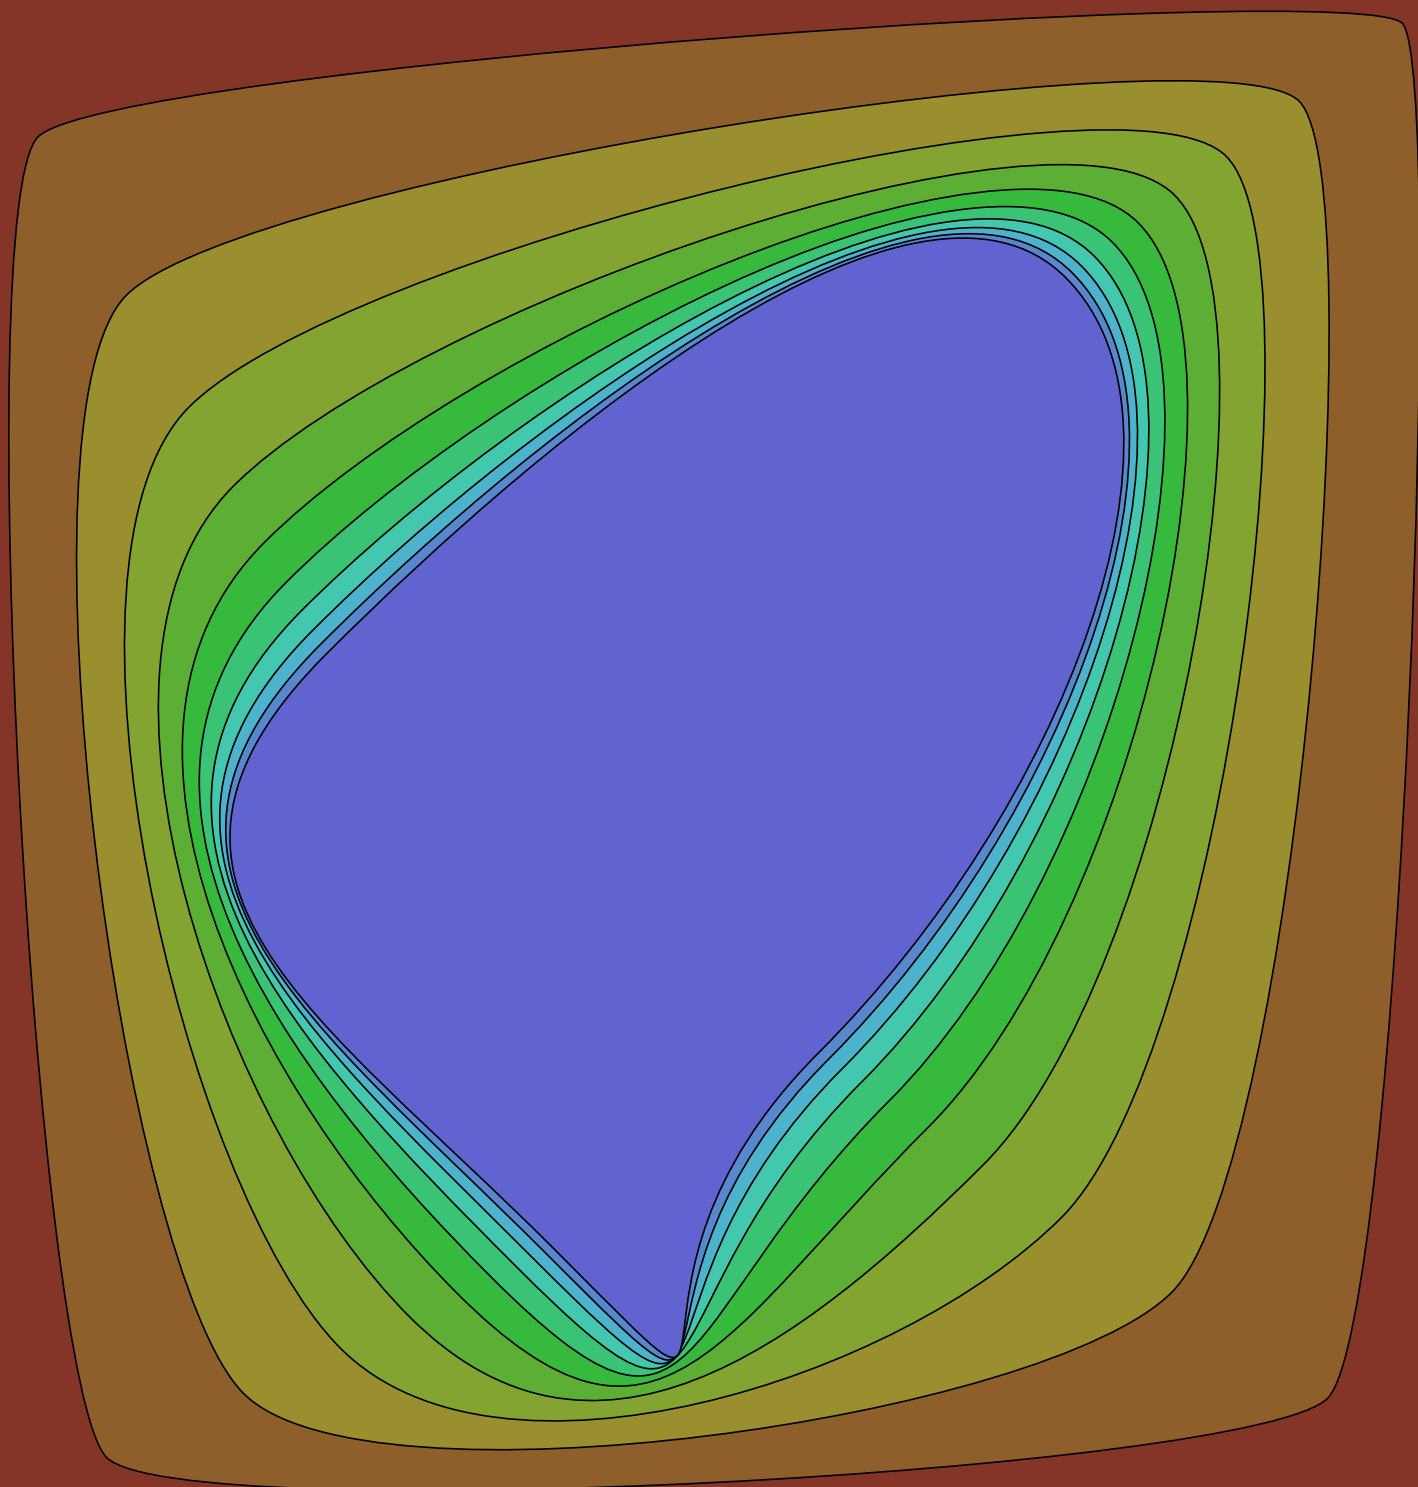

April the 19th, 2016 — Vasilis van Gemert

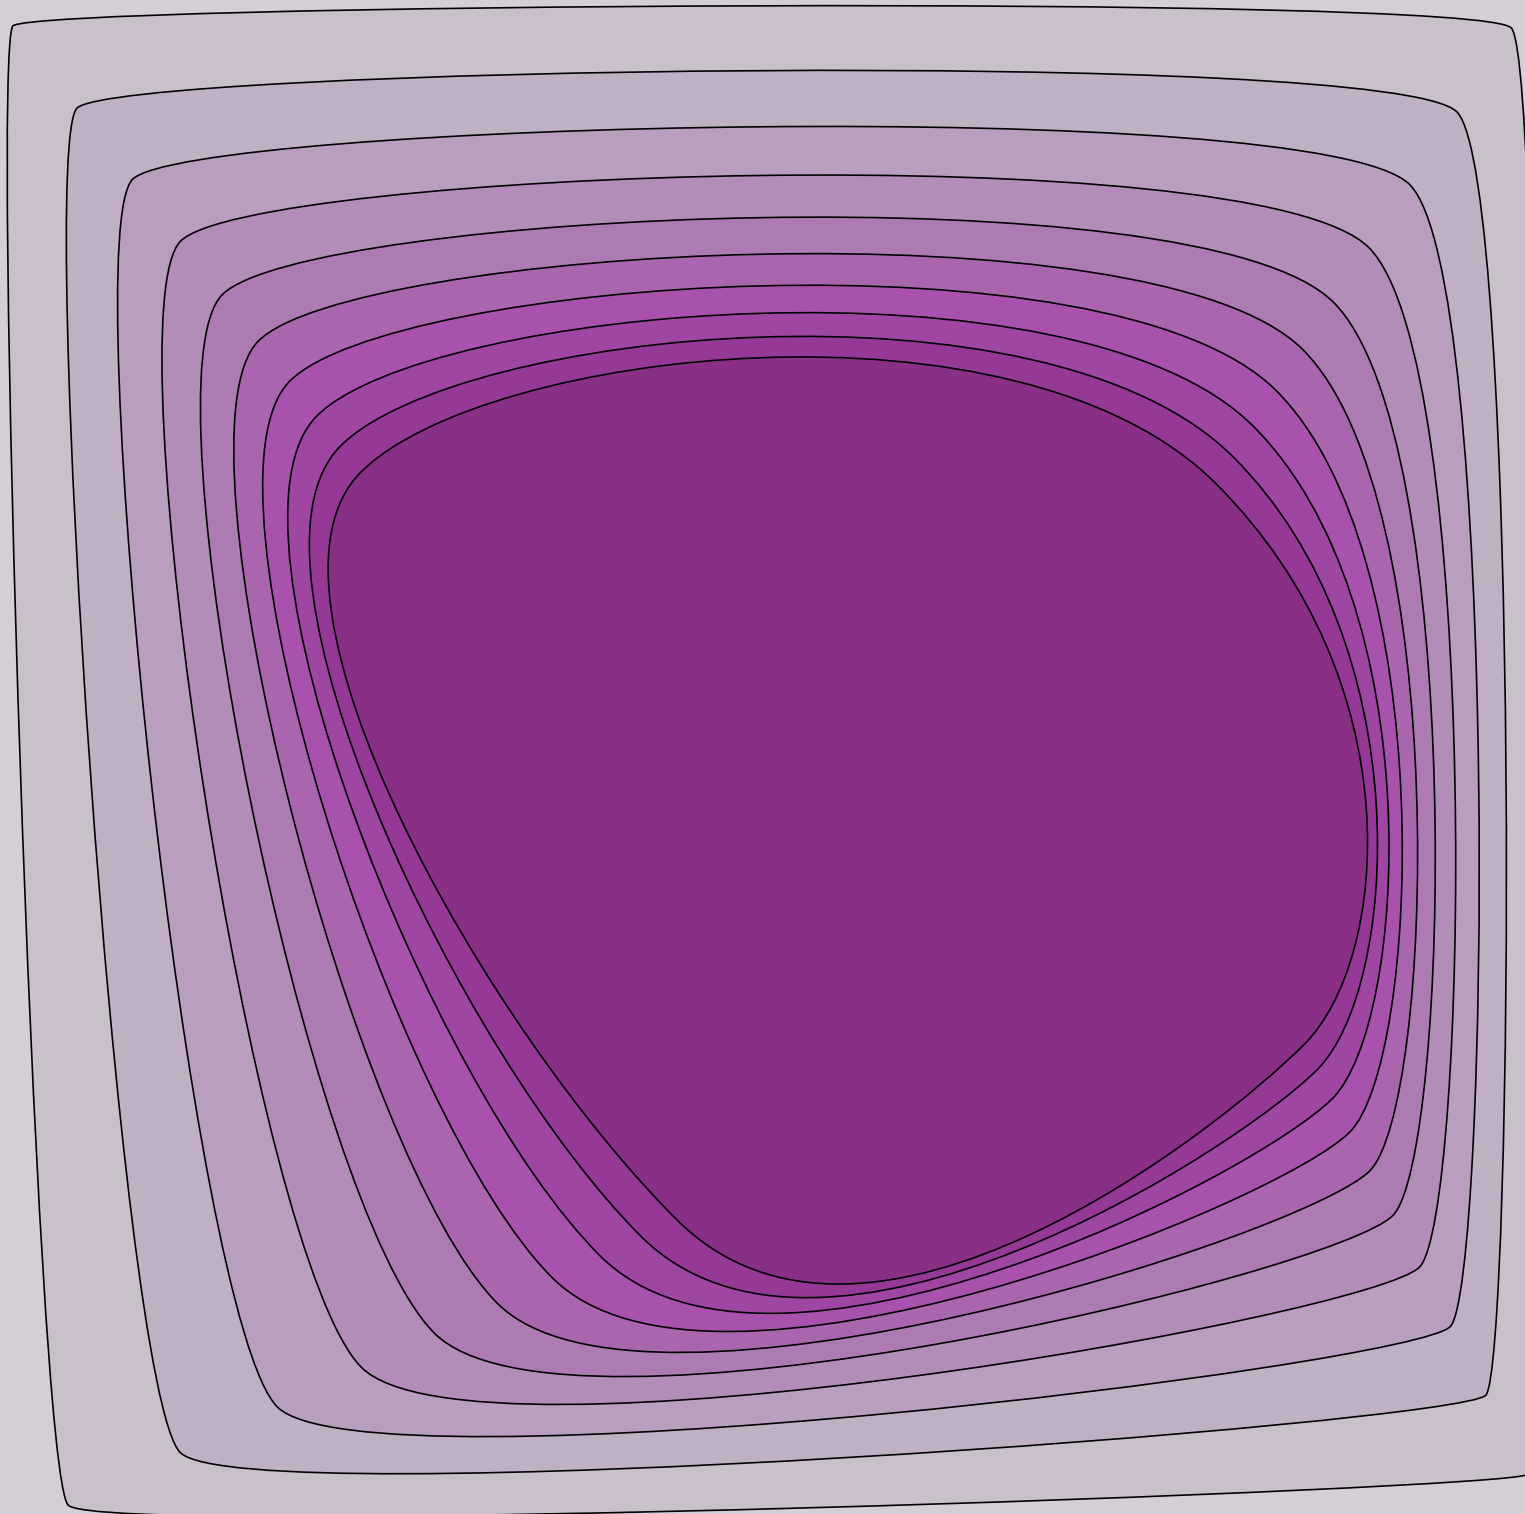

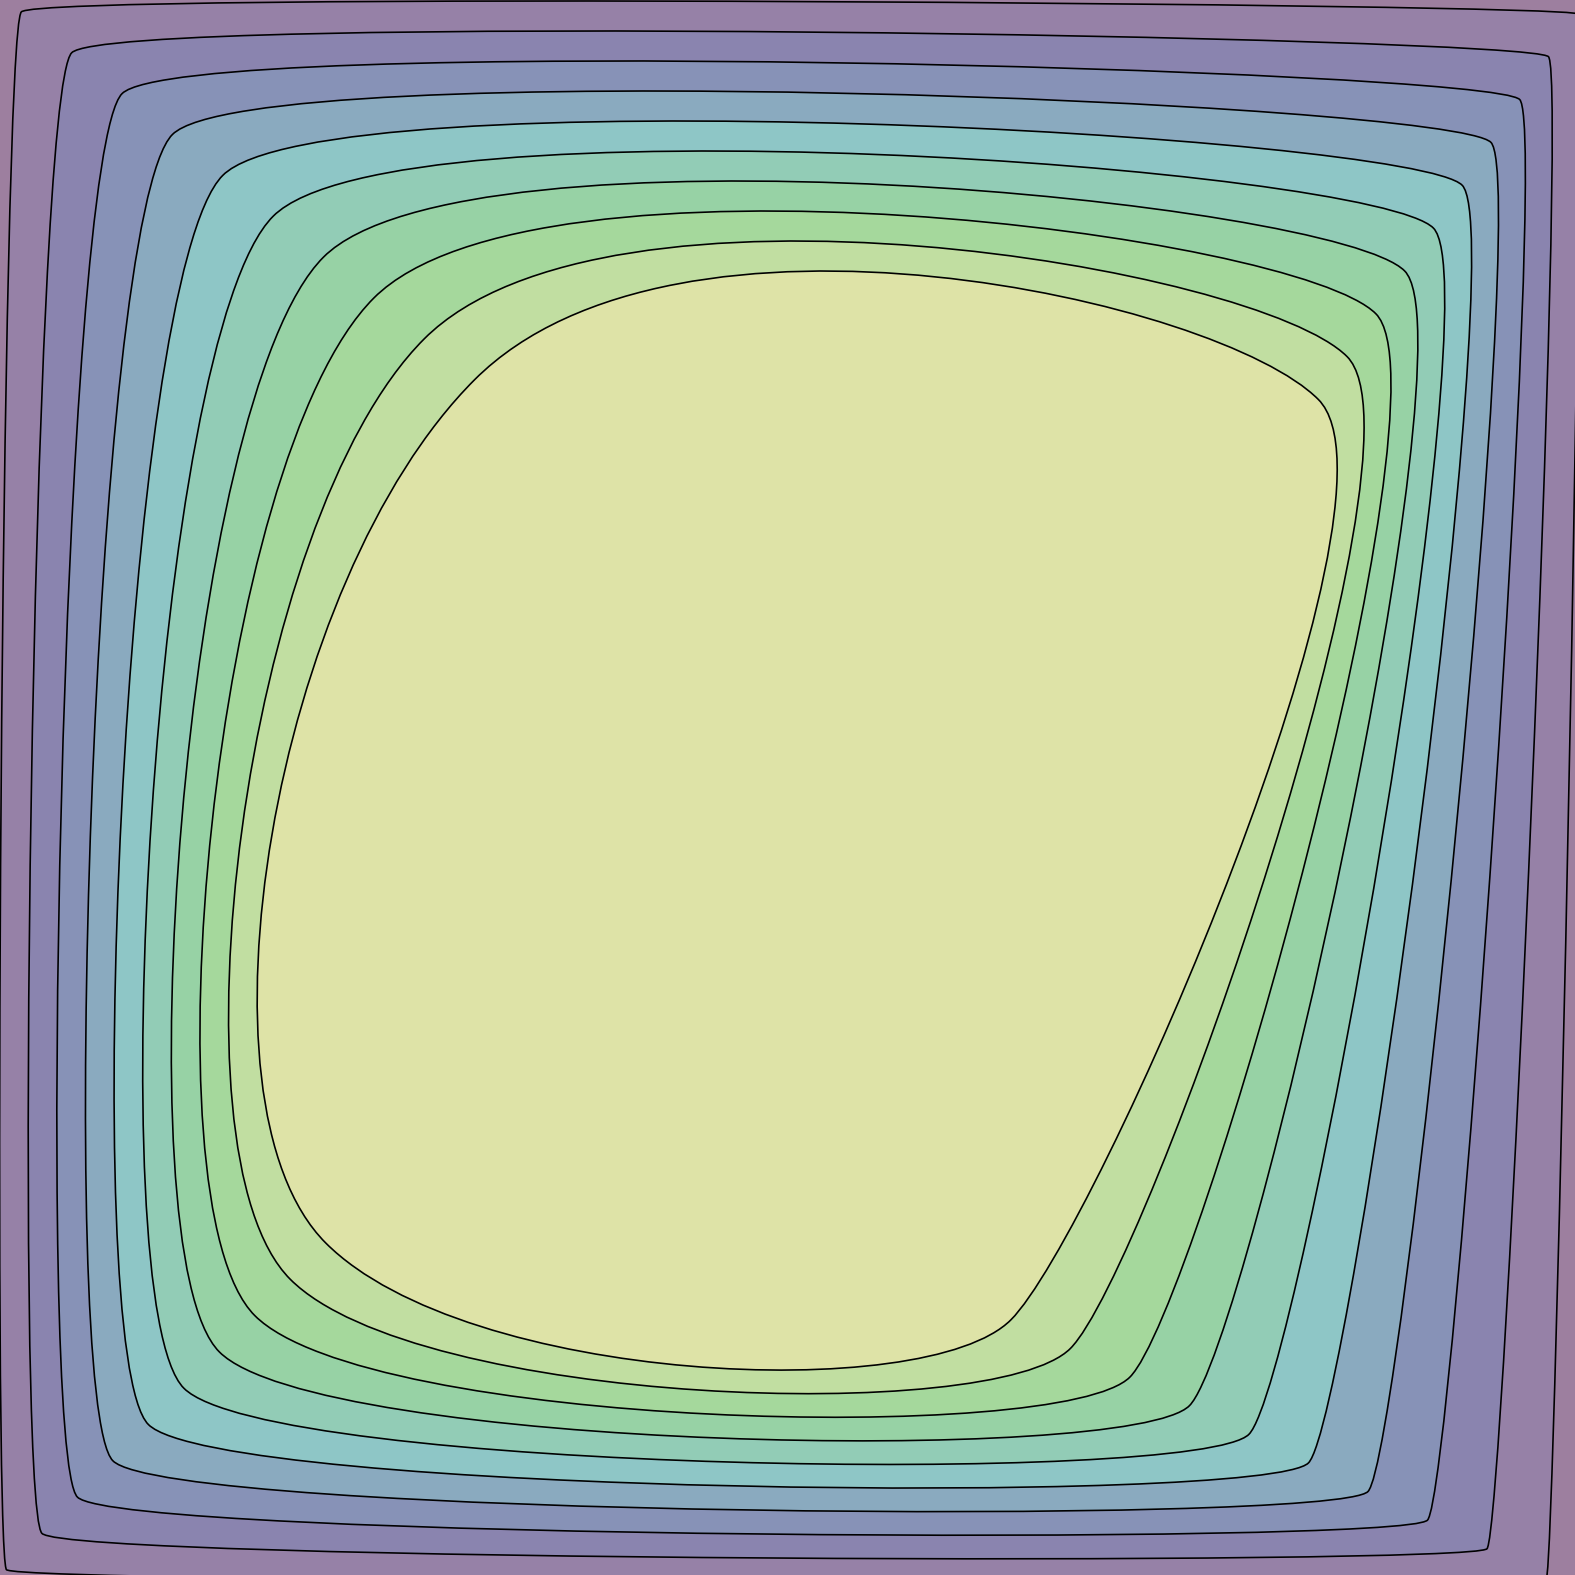

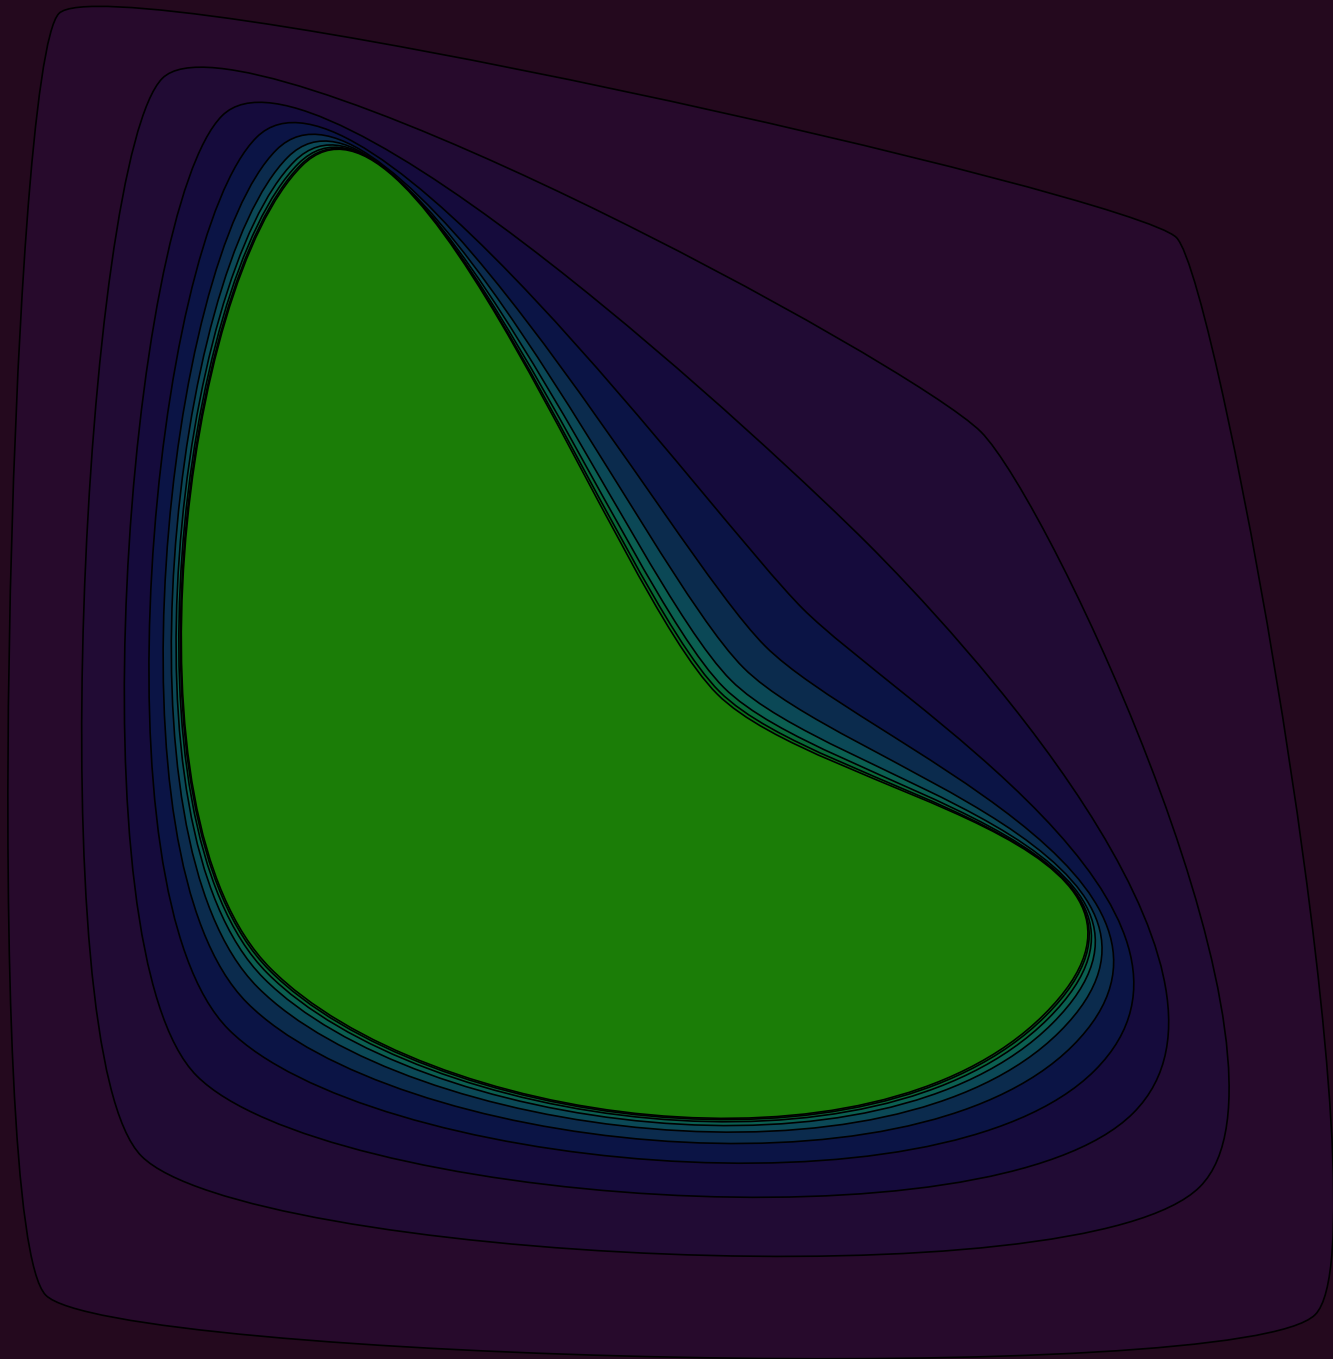

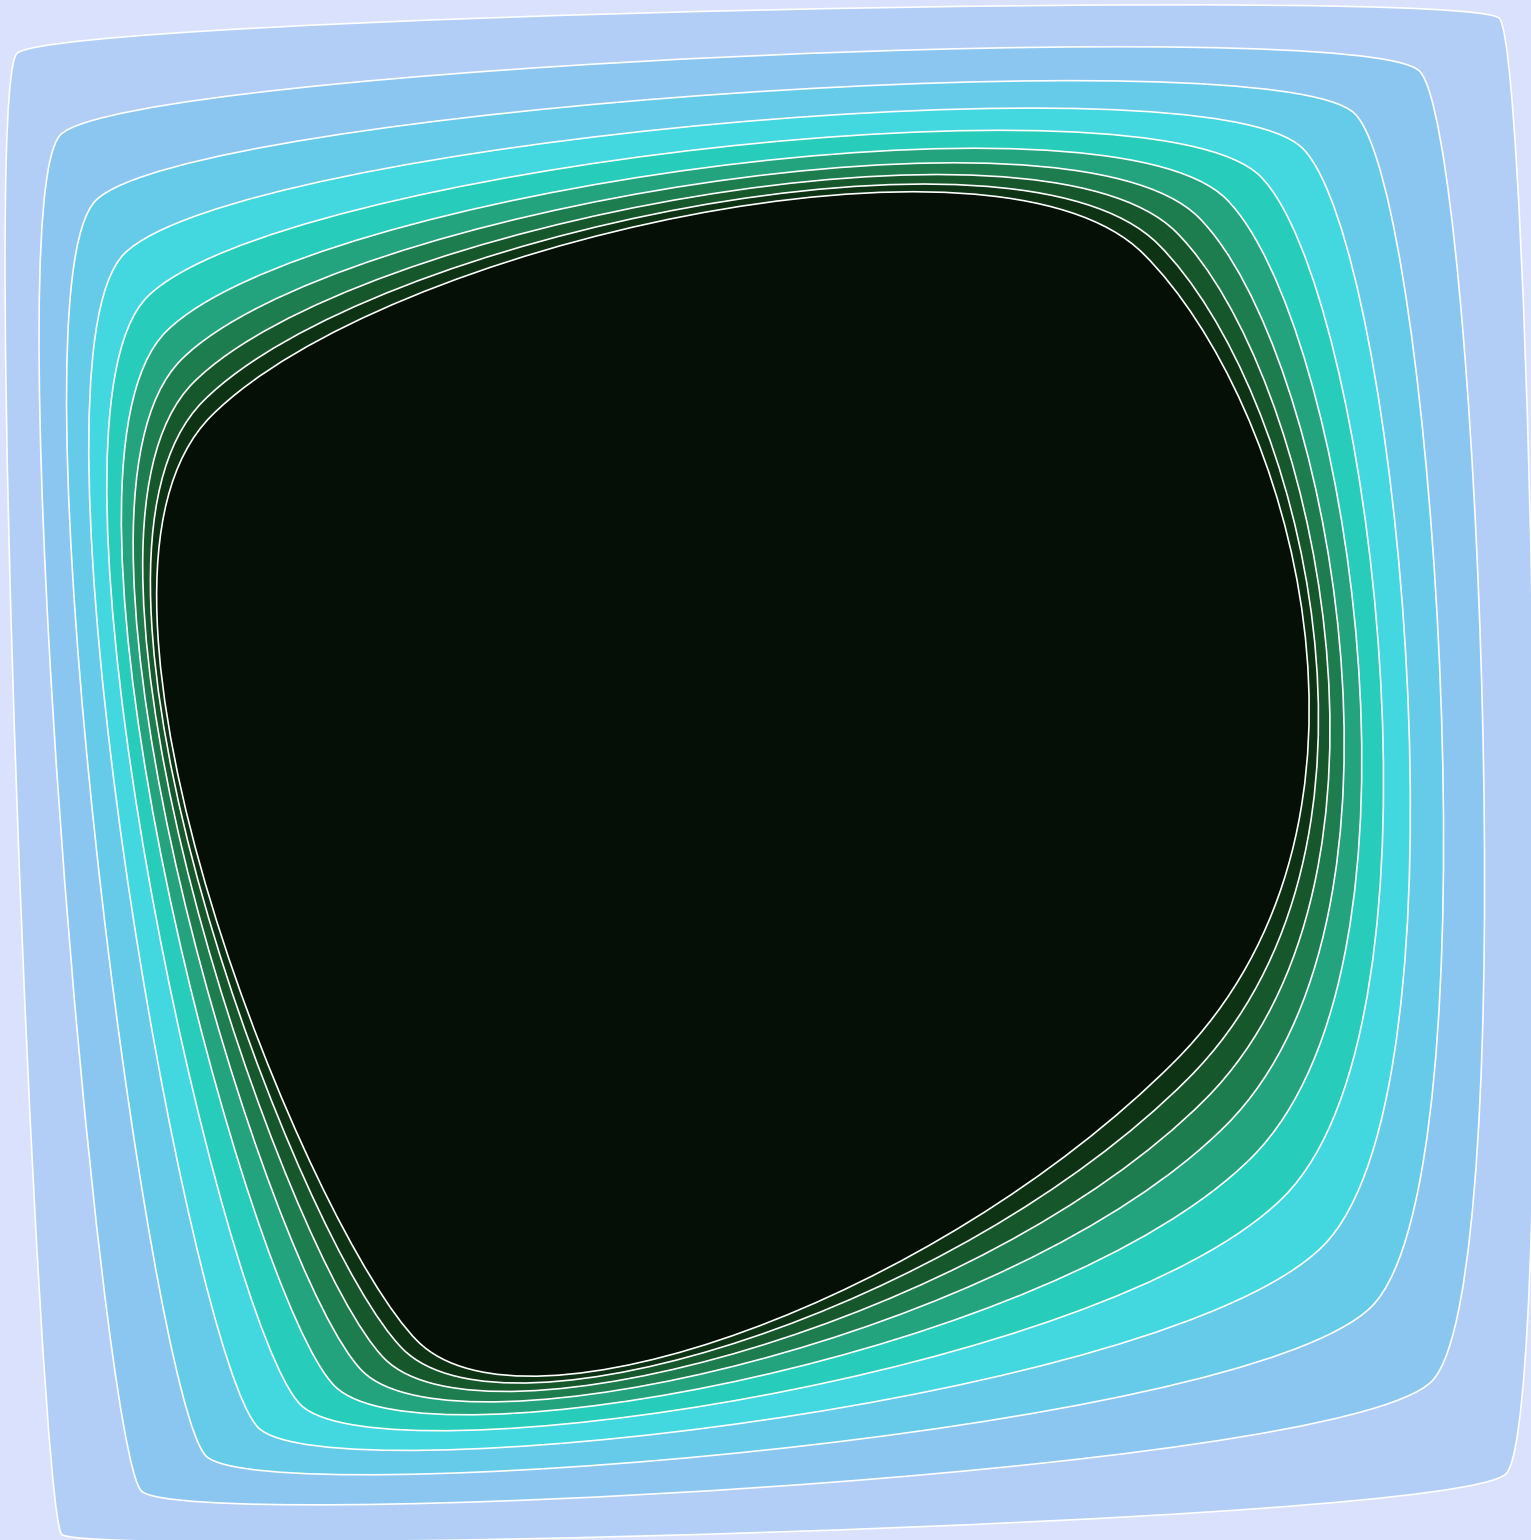

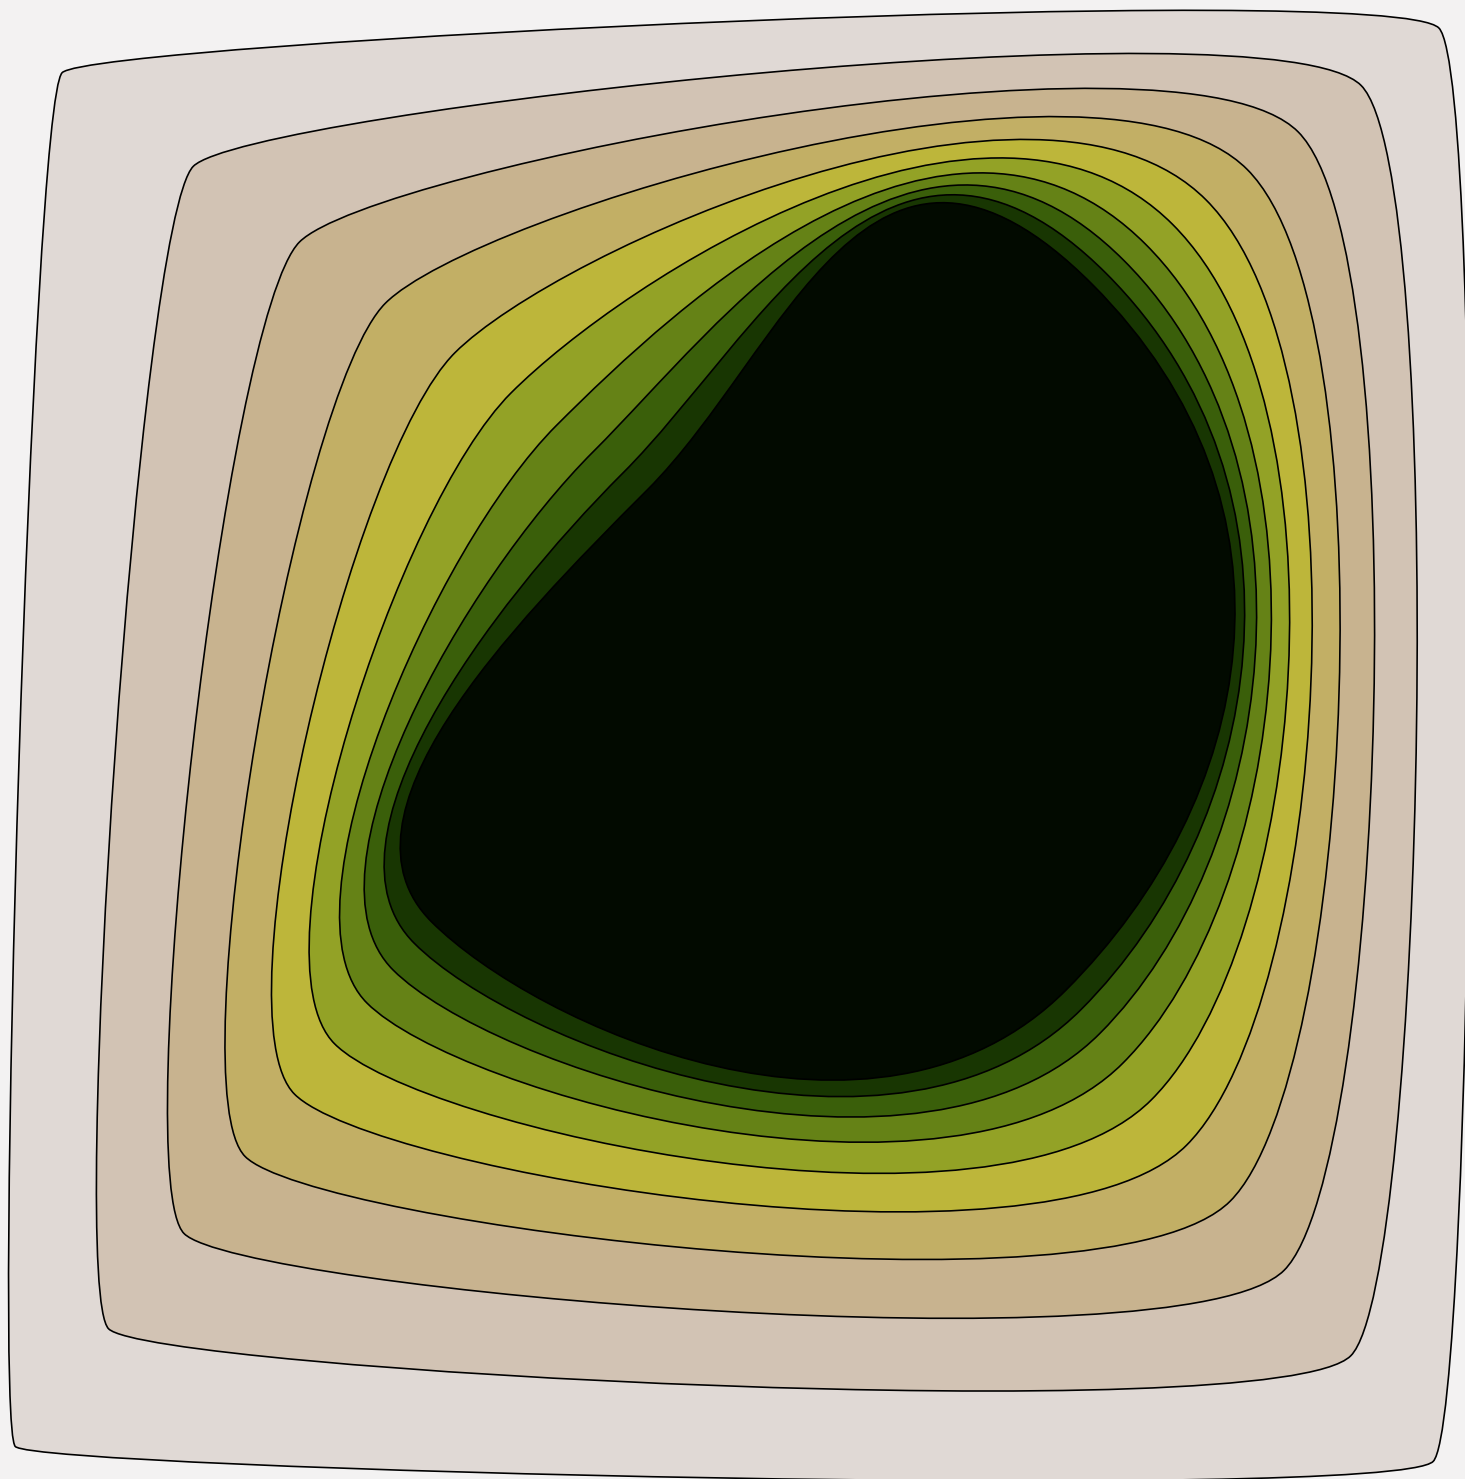

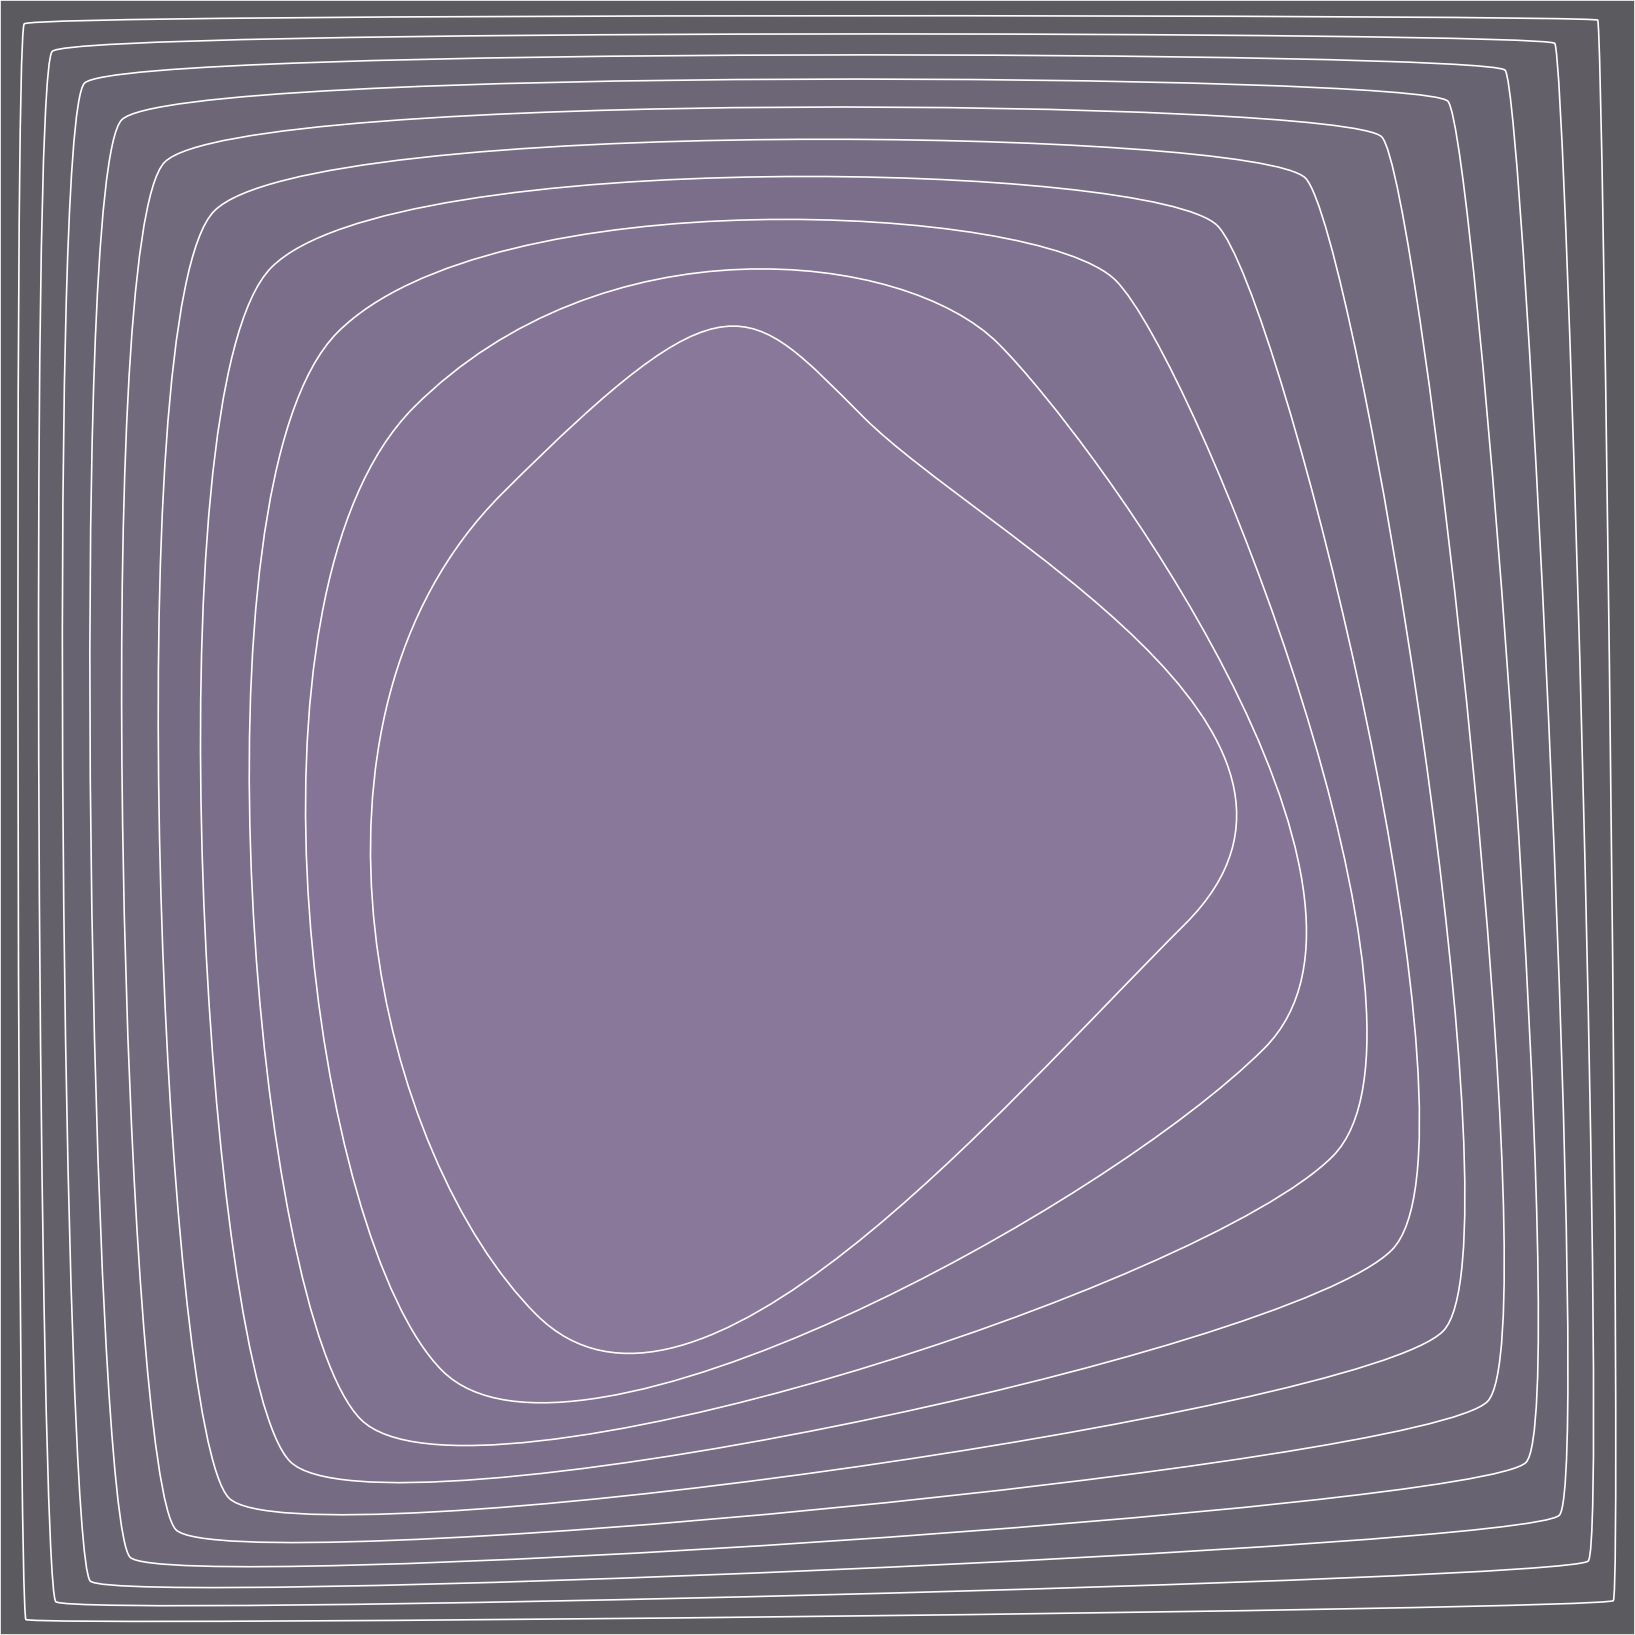

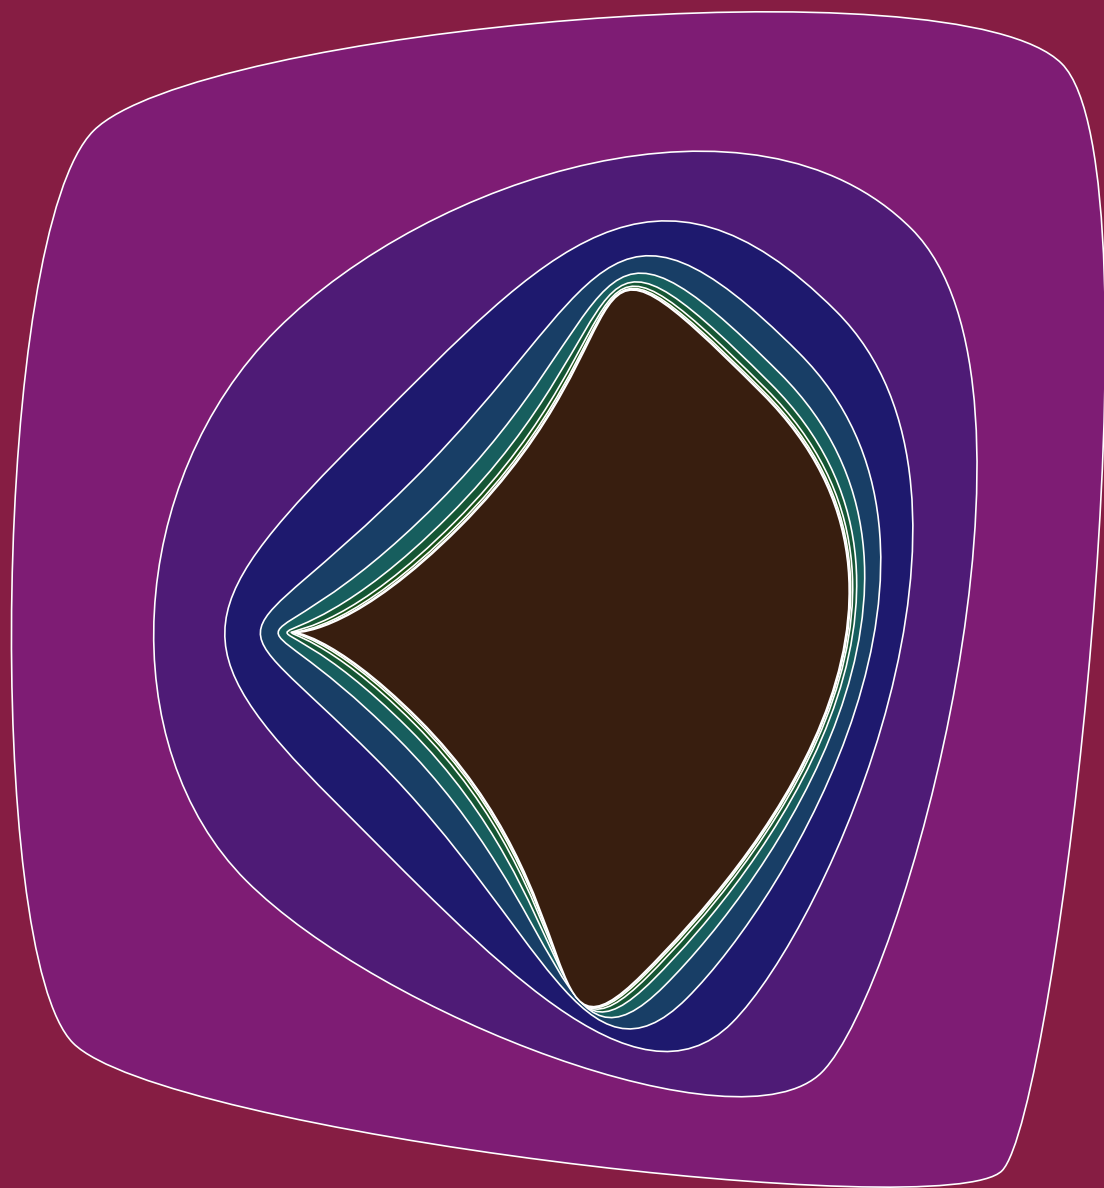

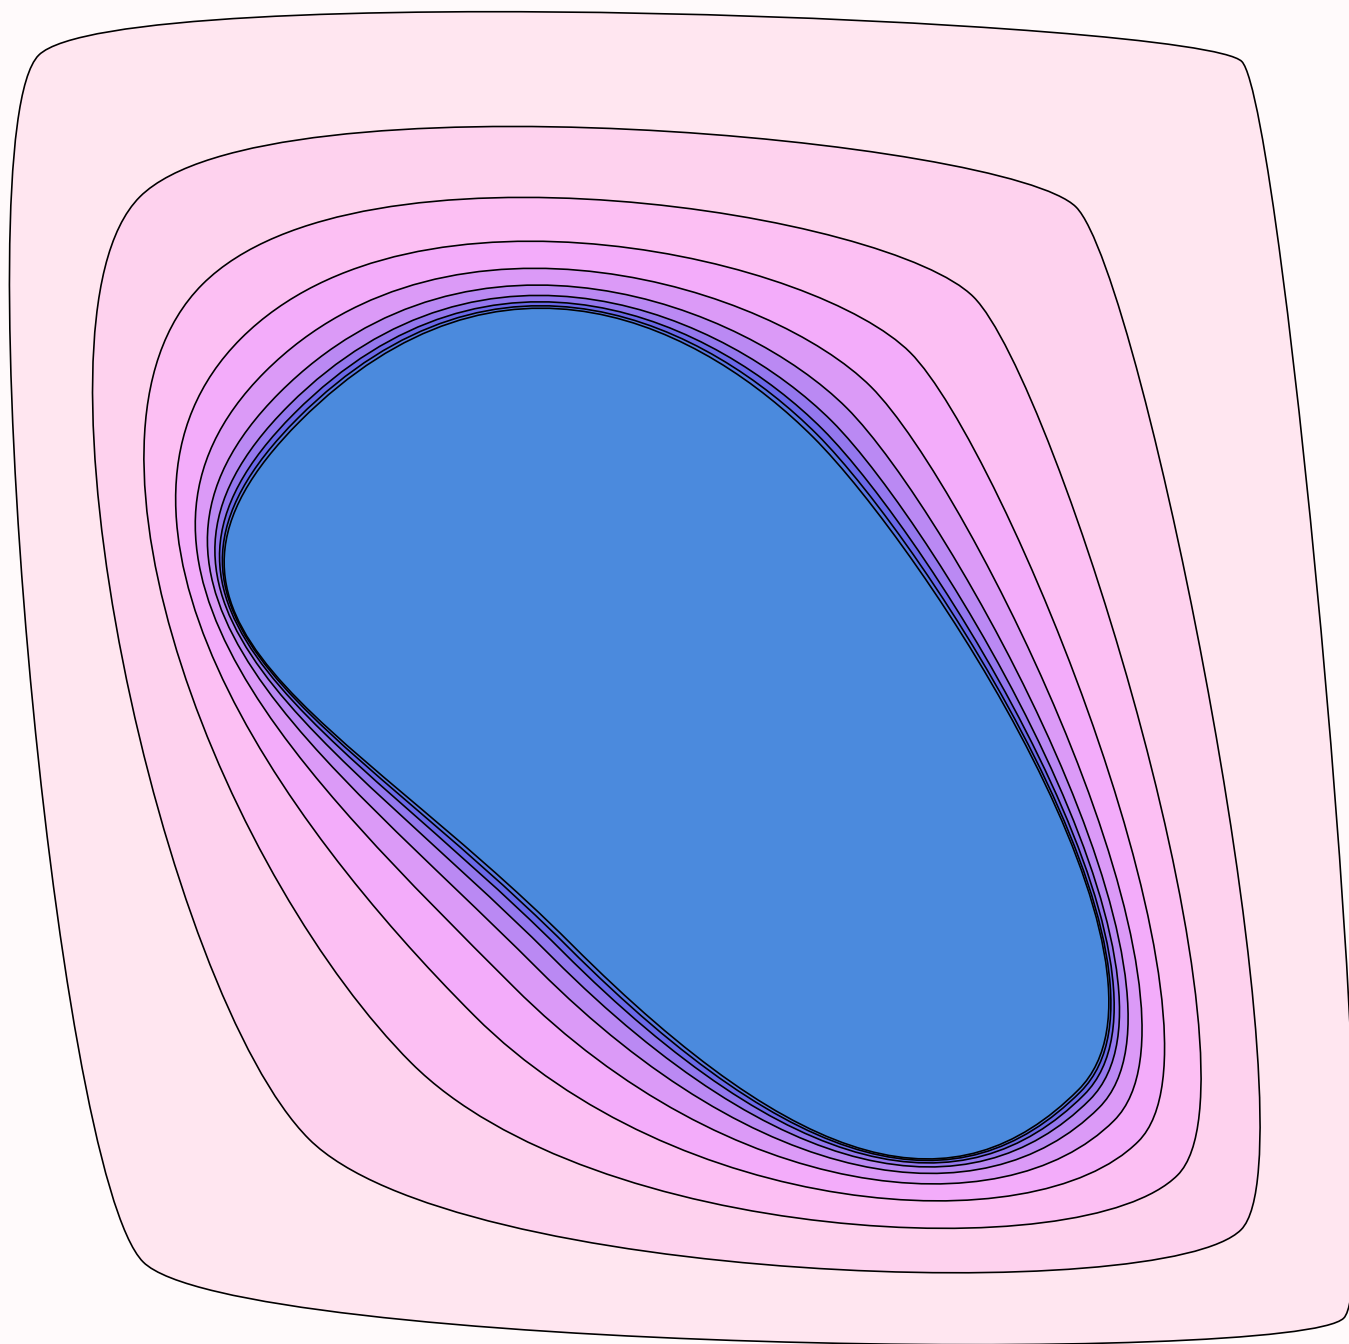

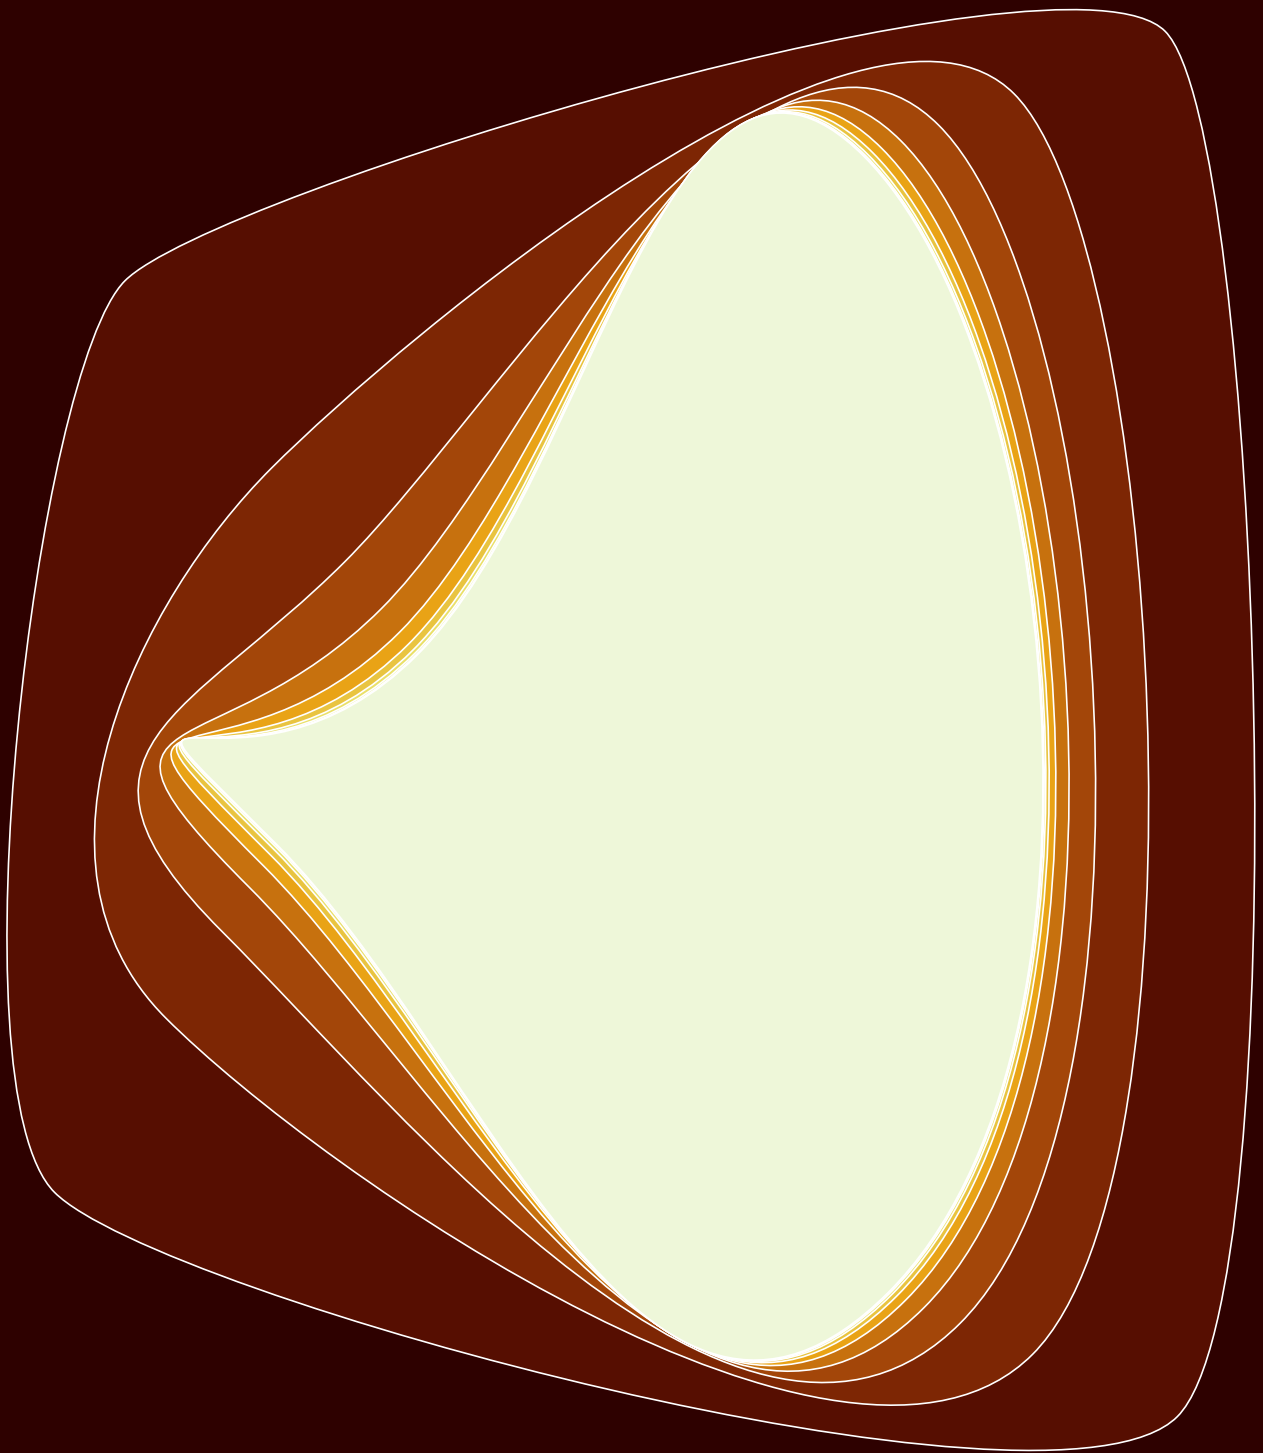

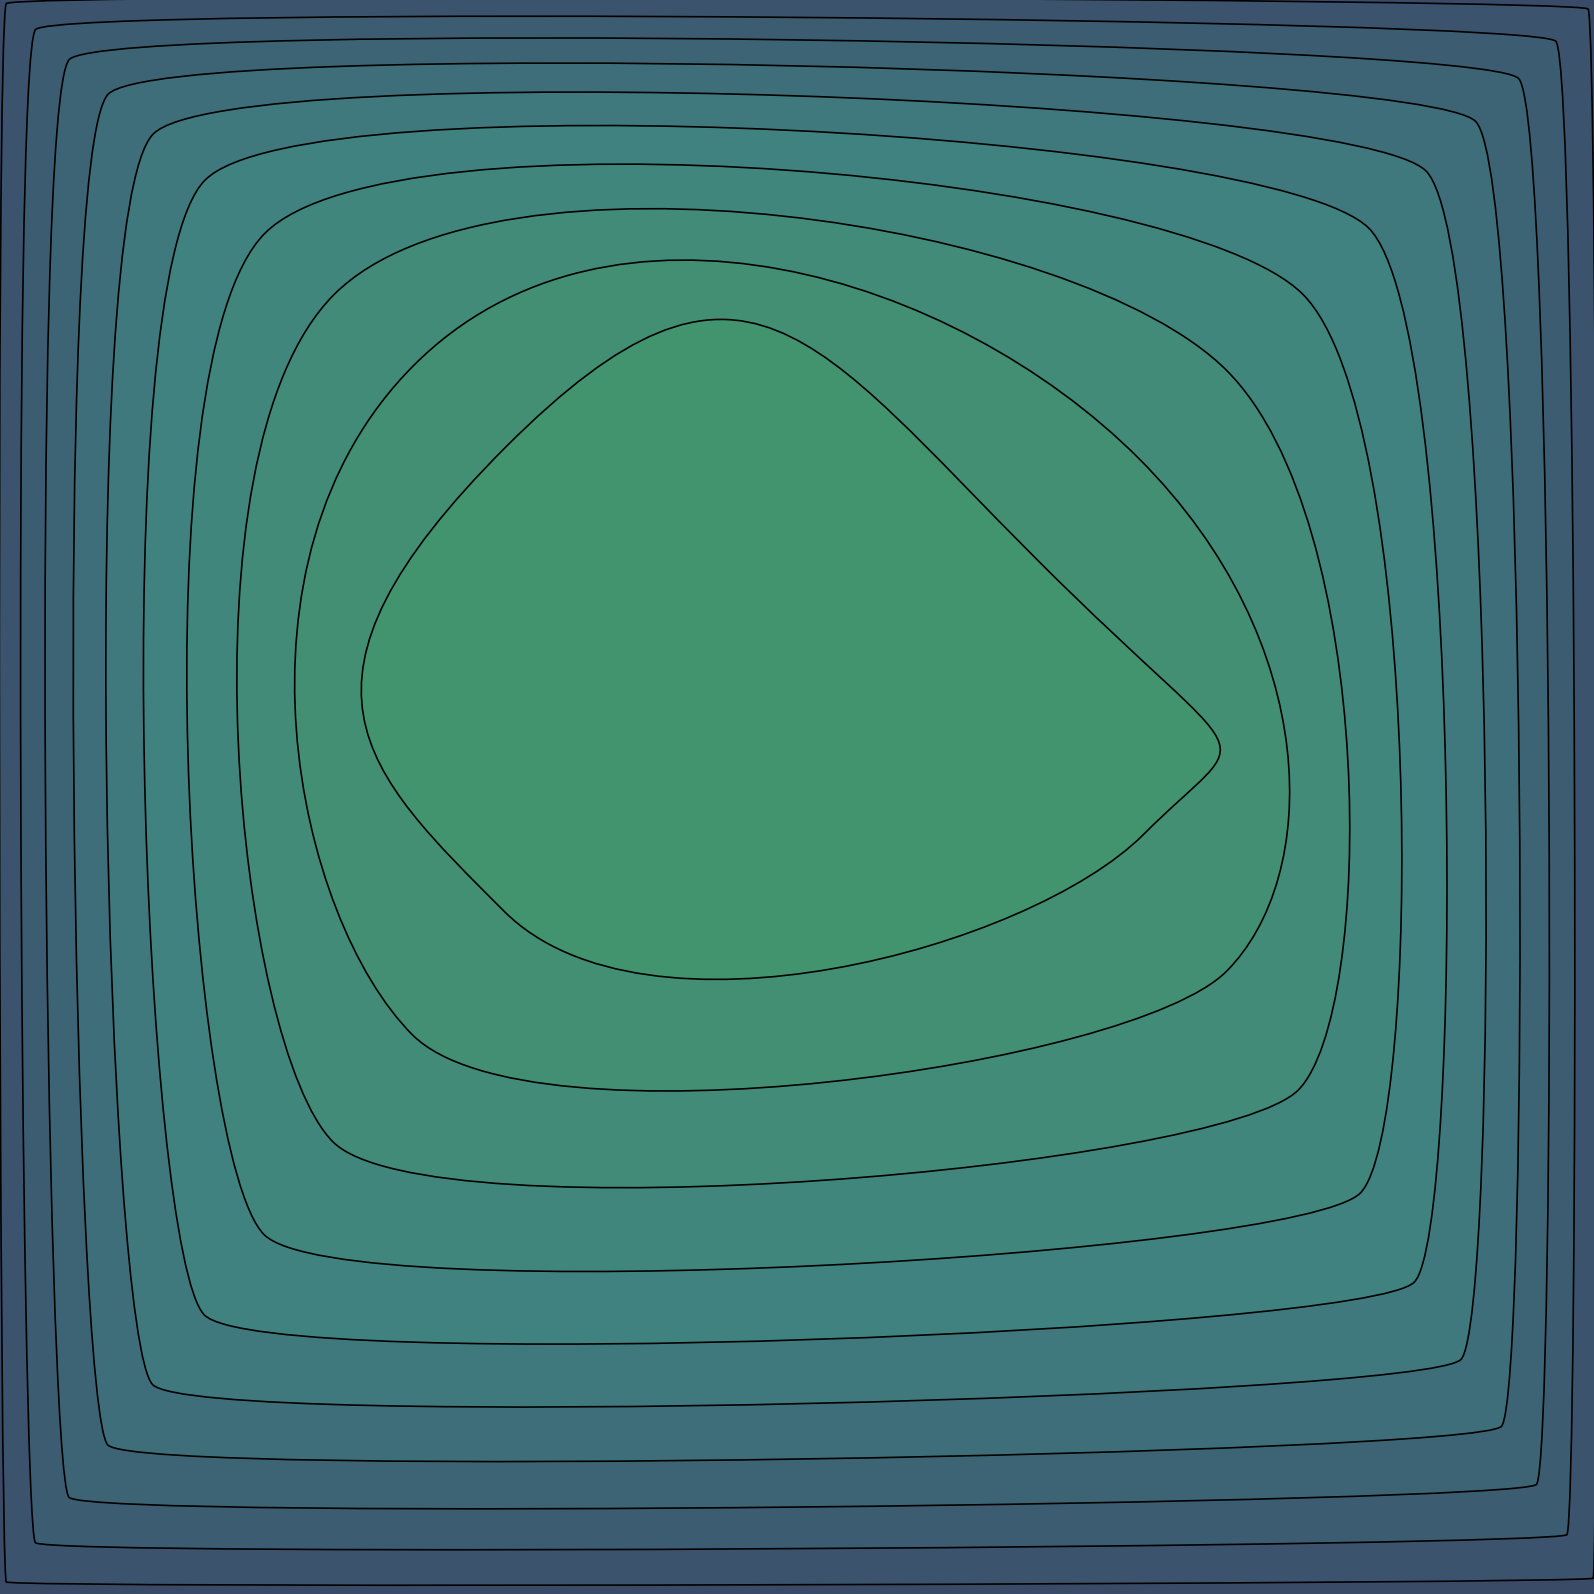

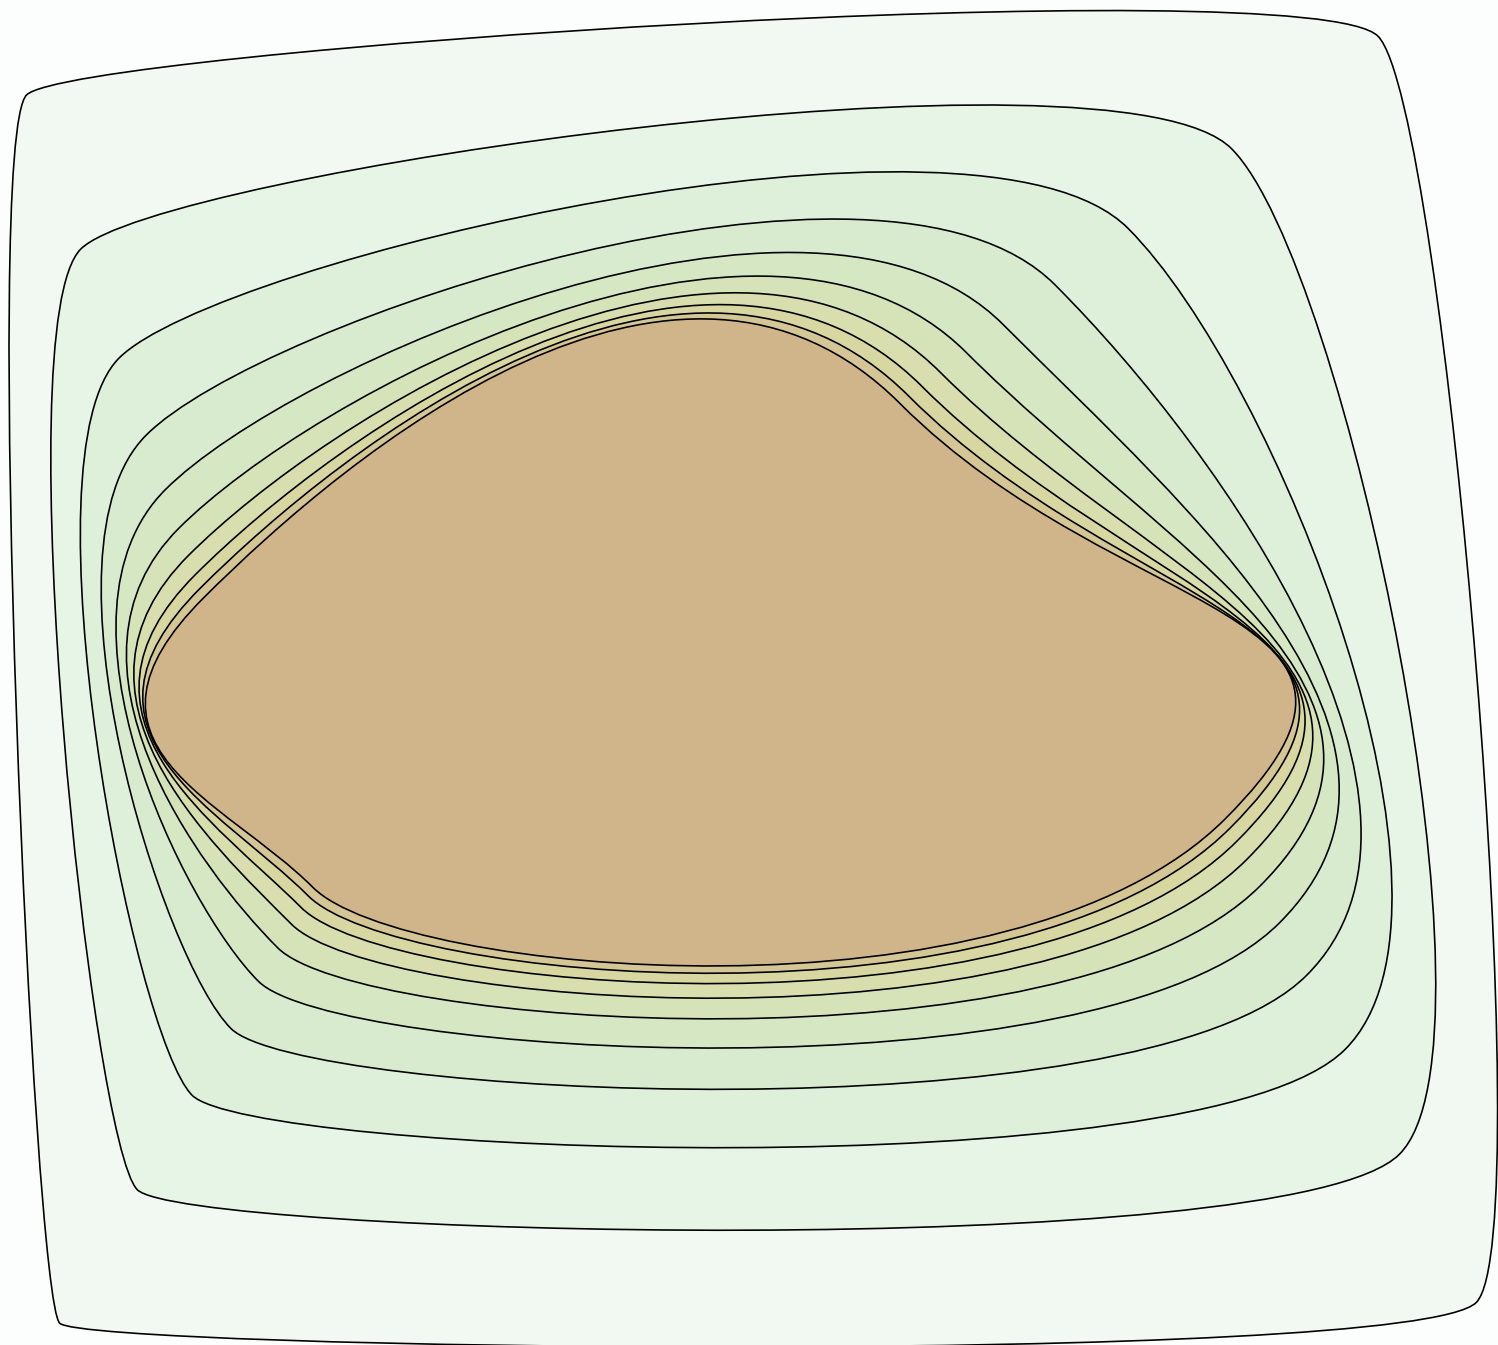

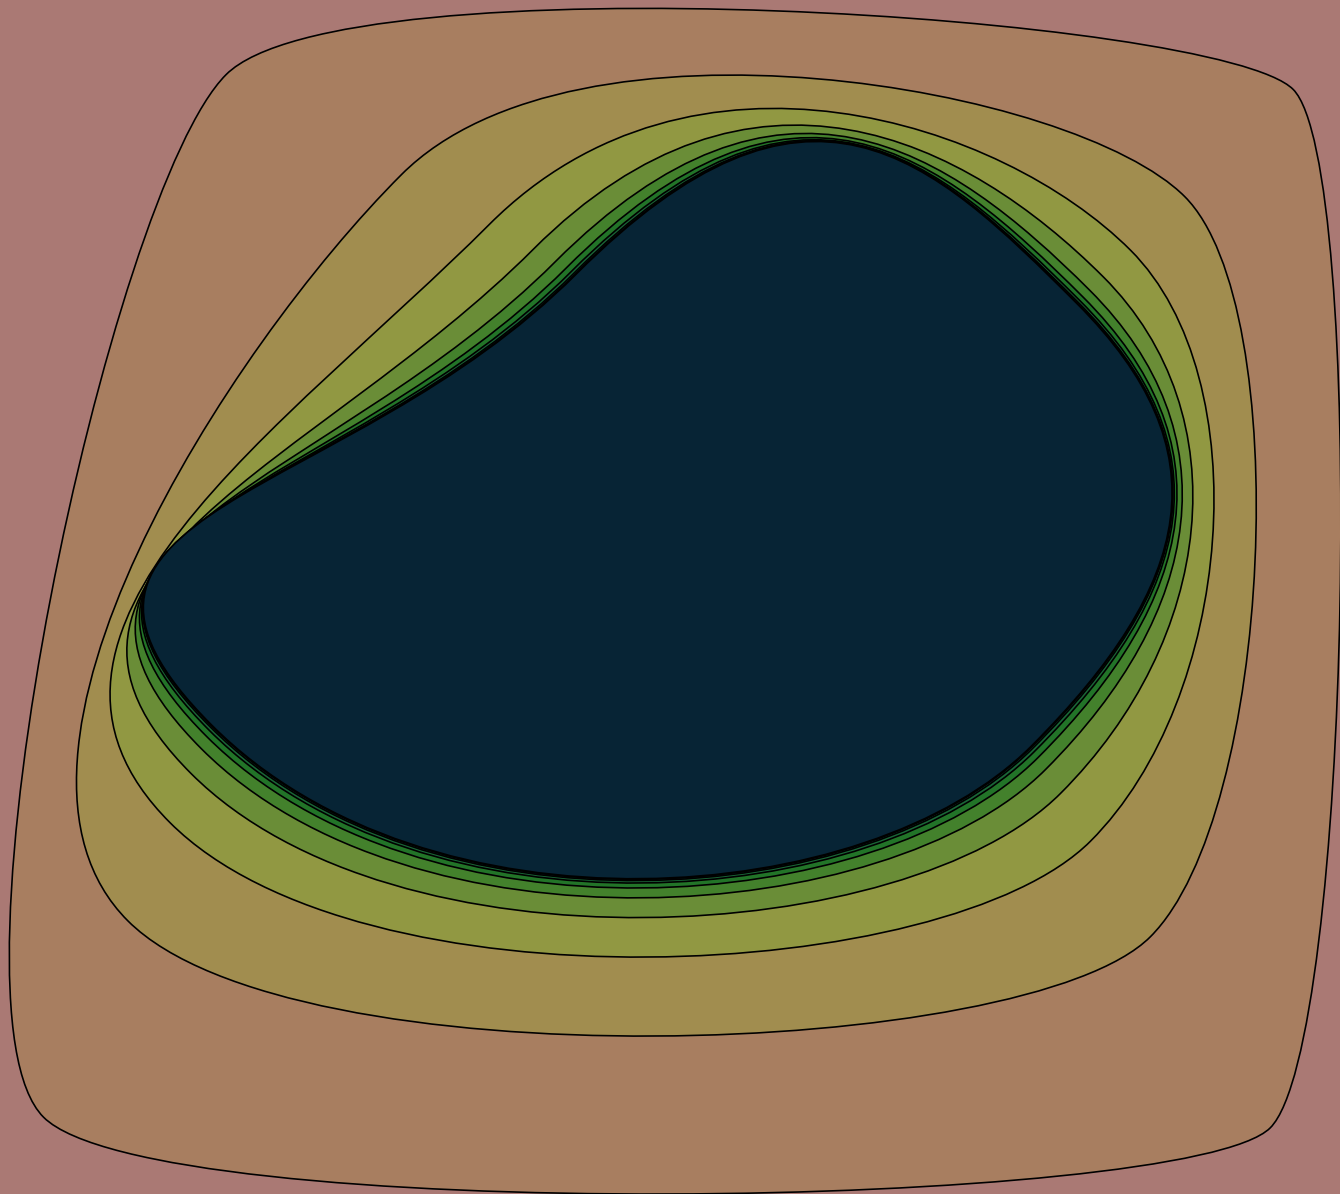

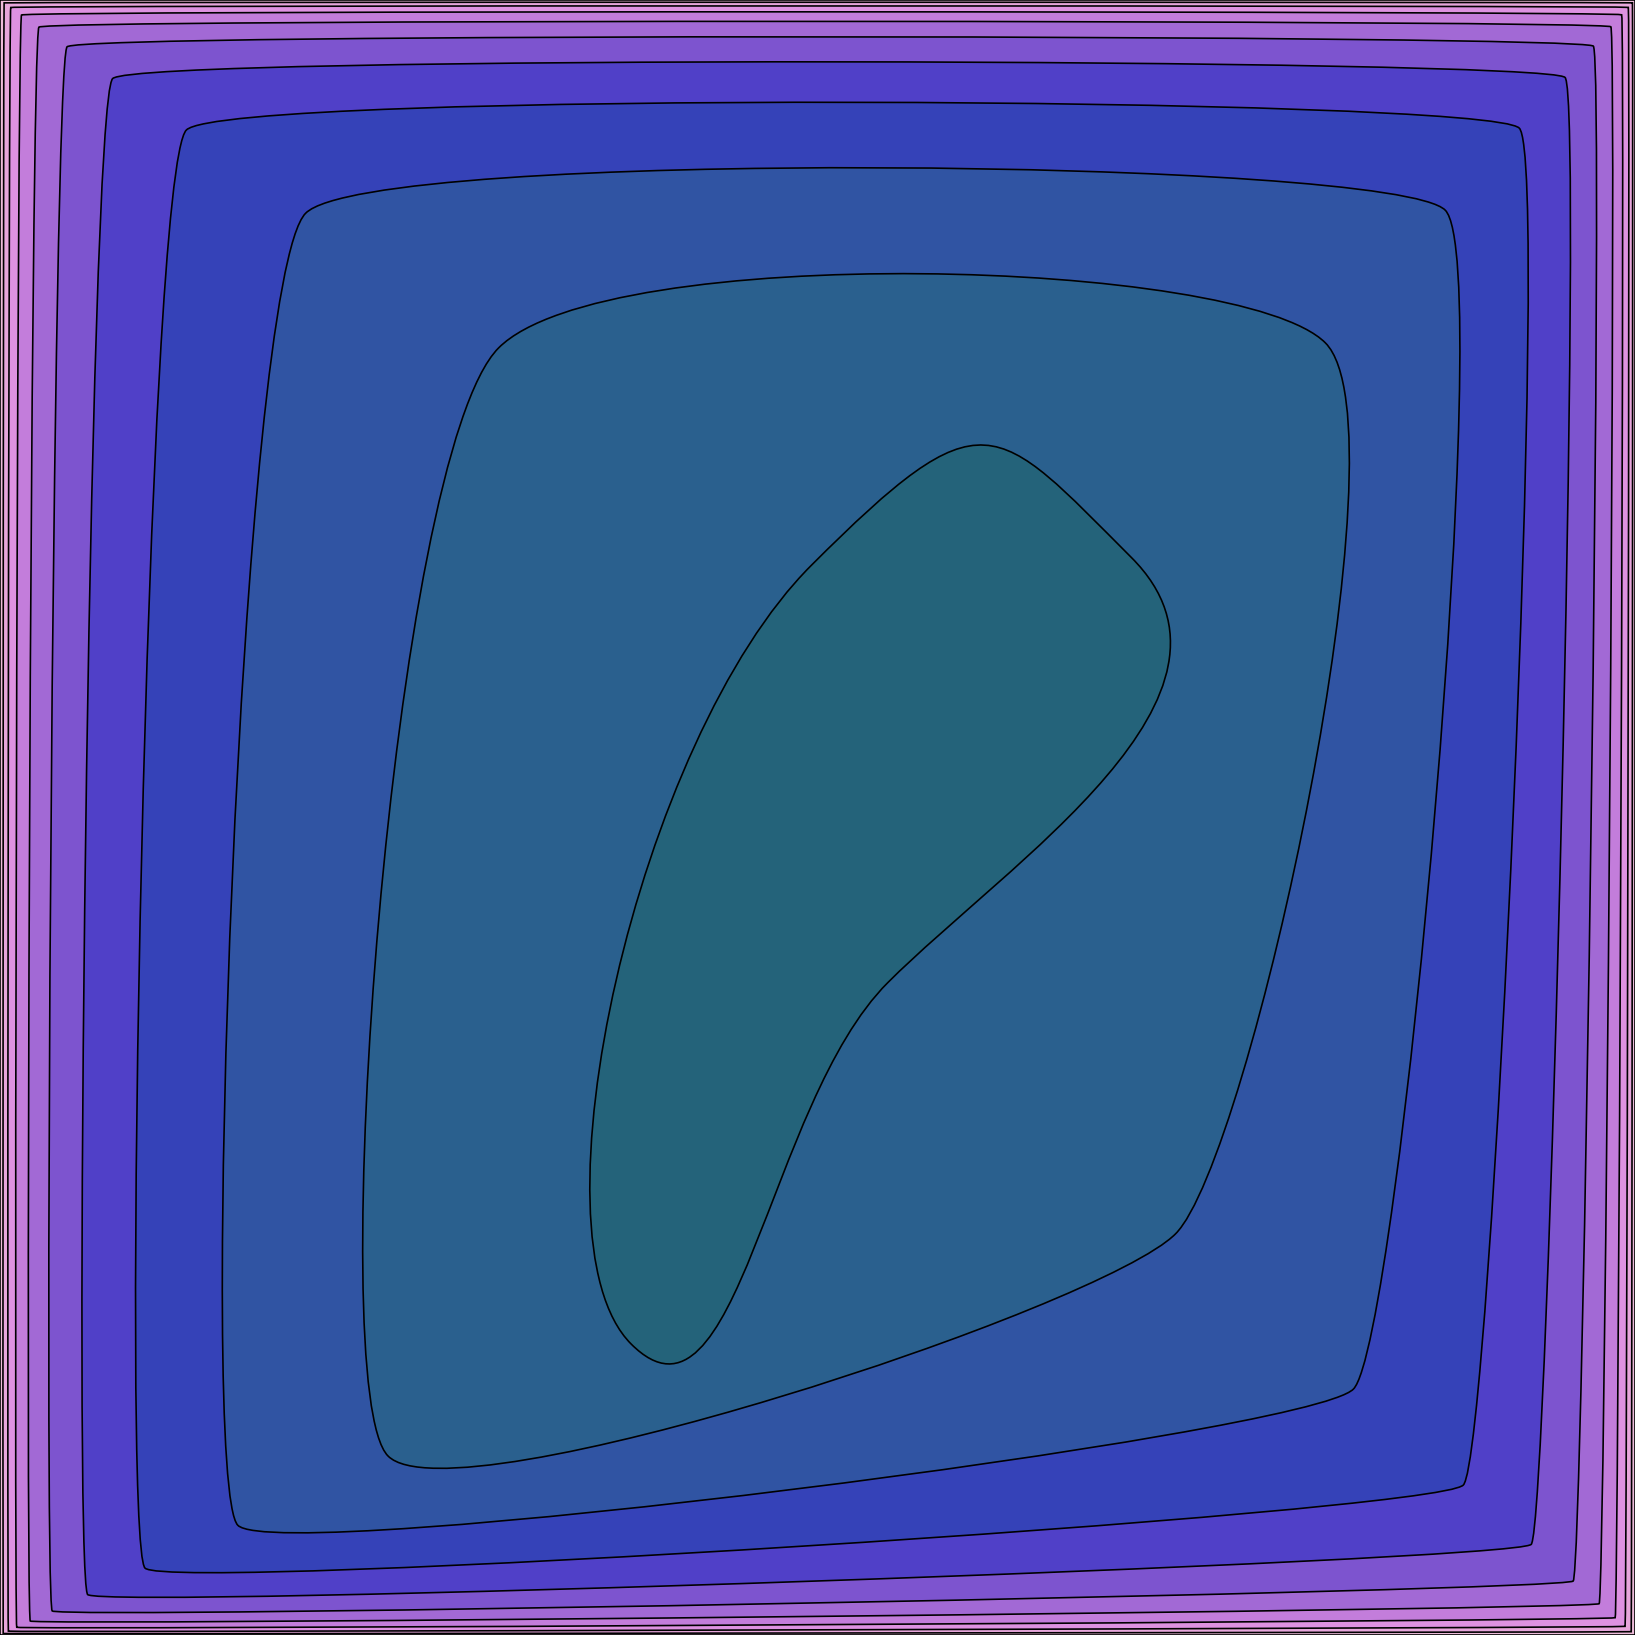

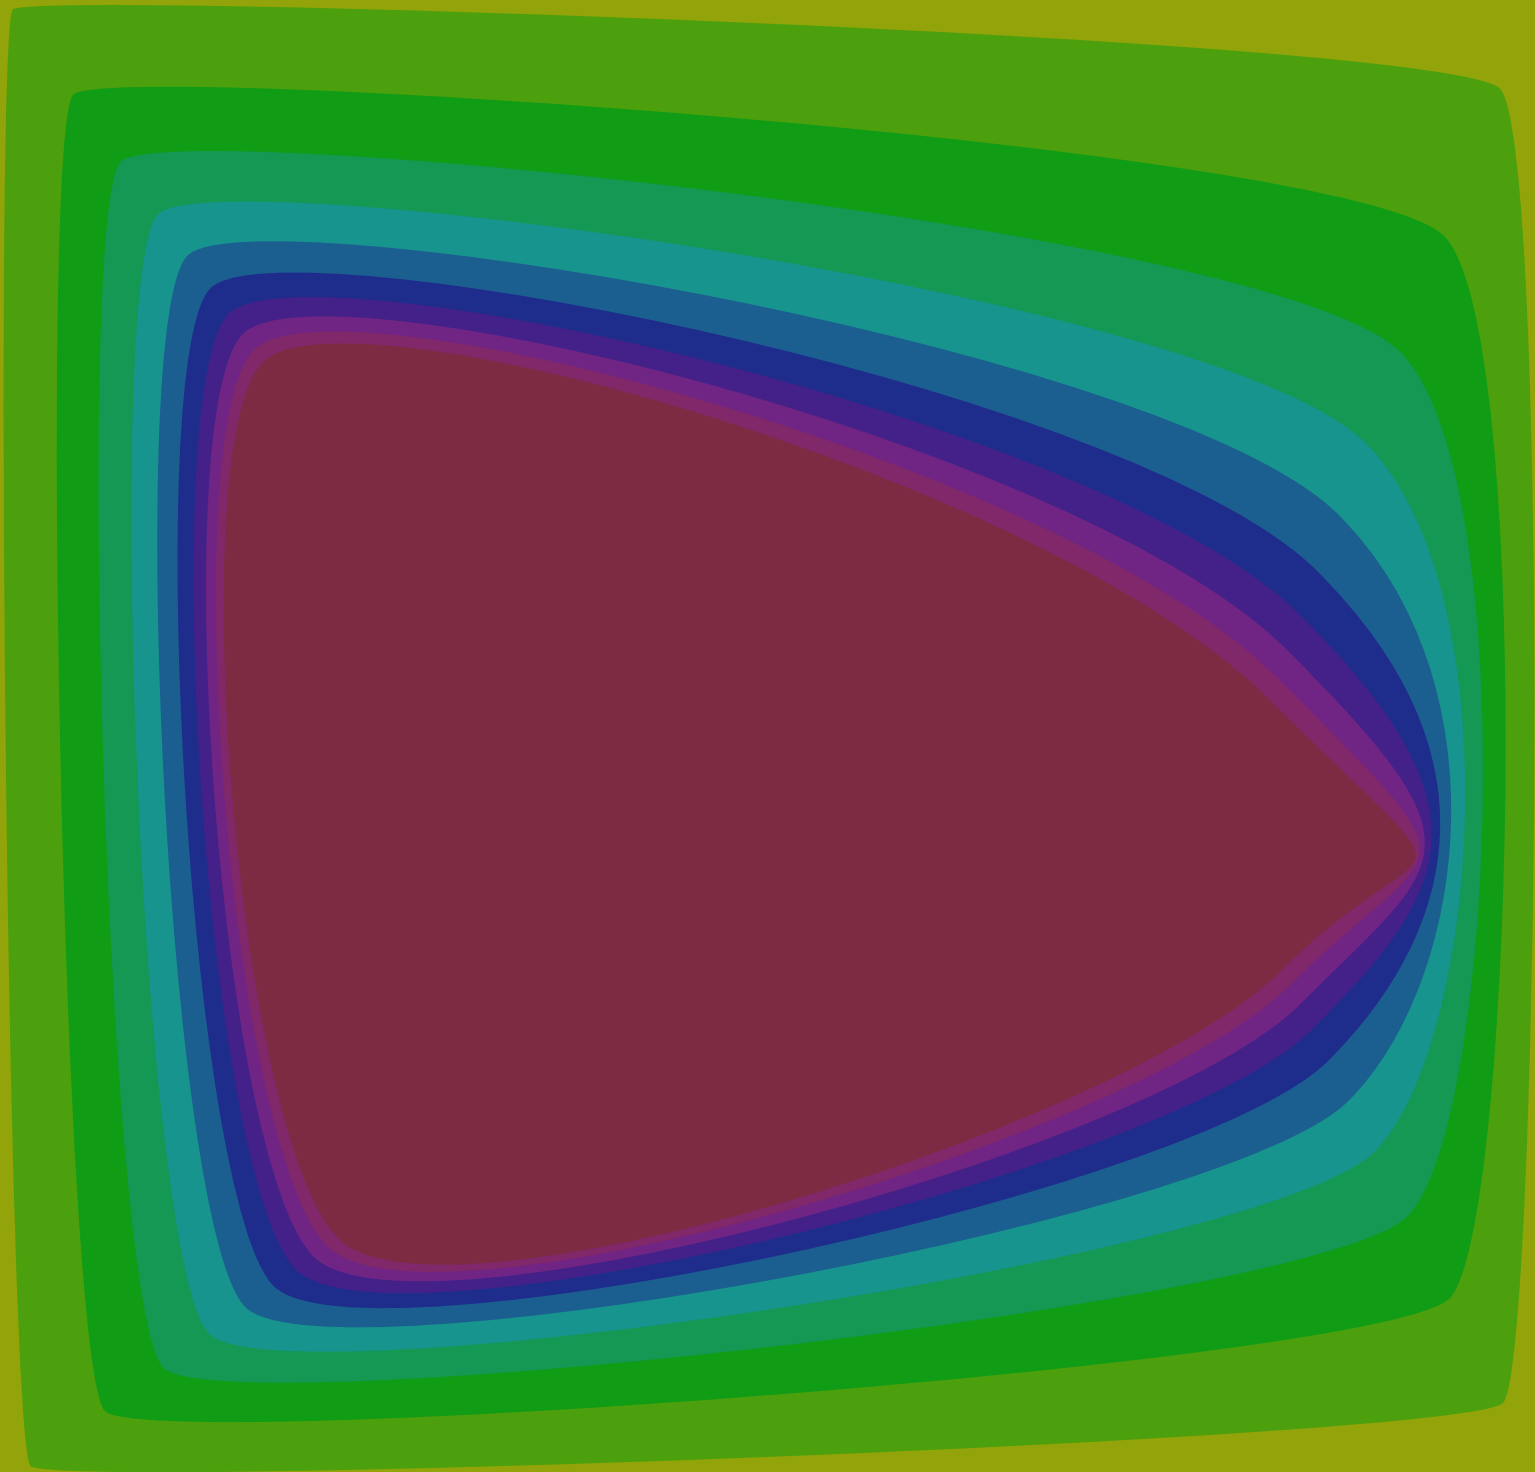

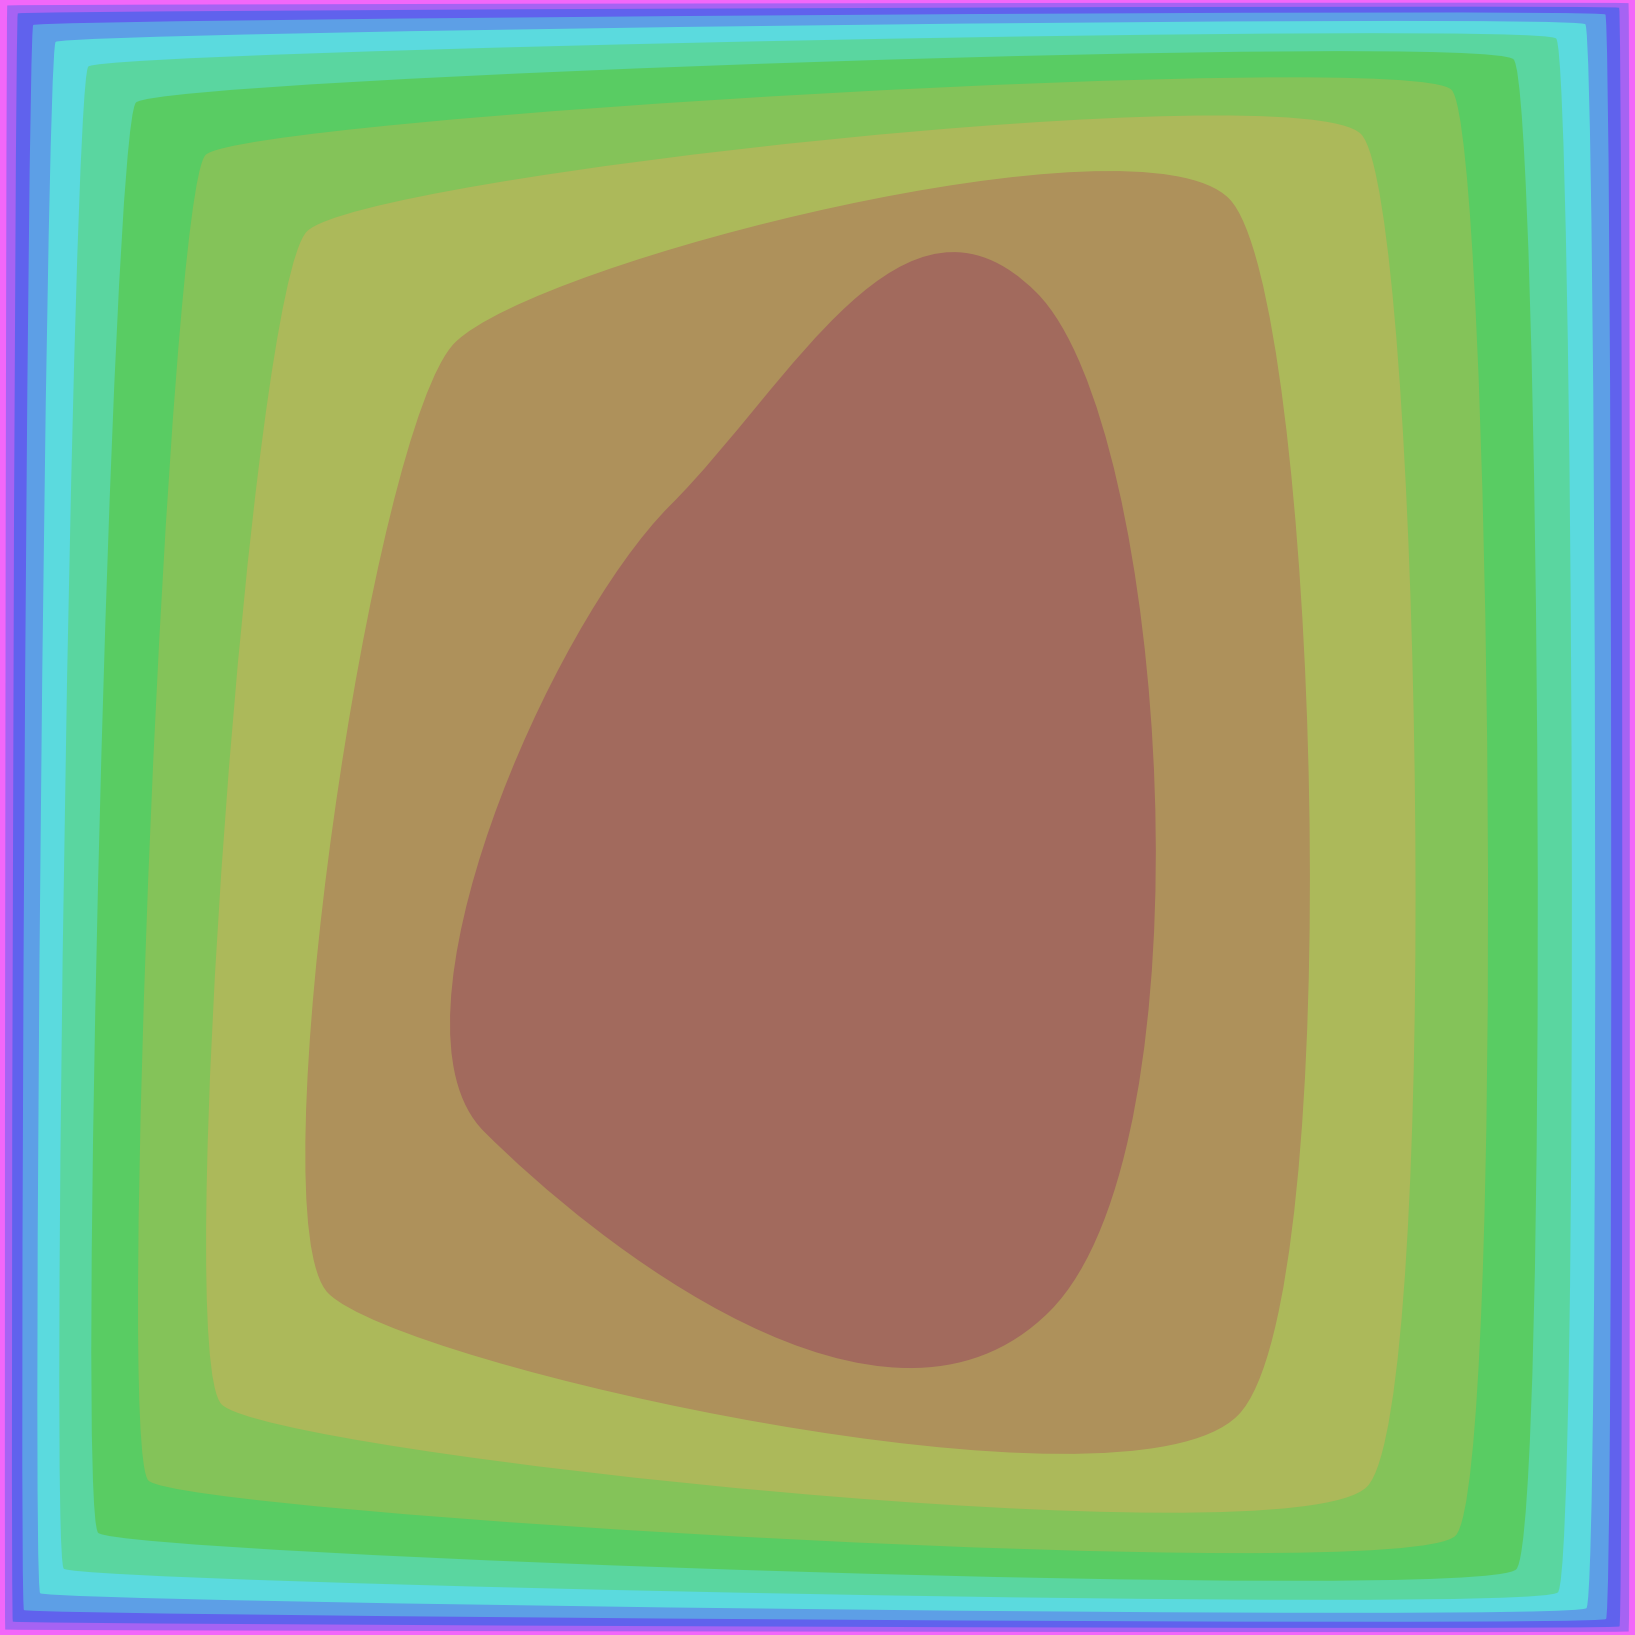

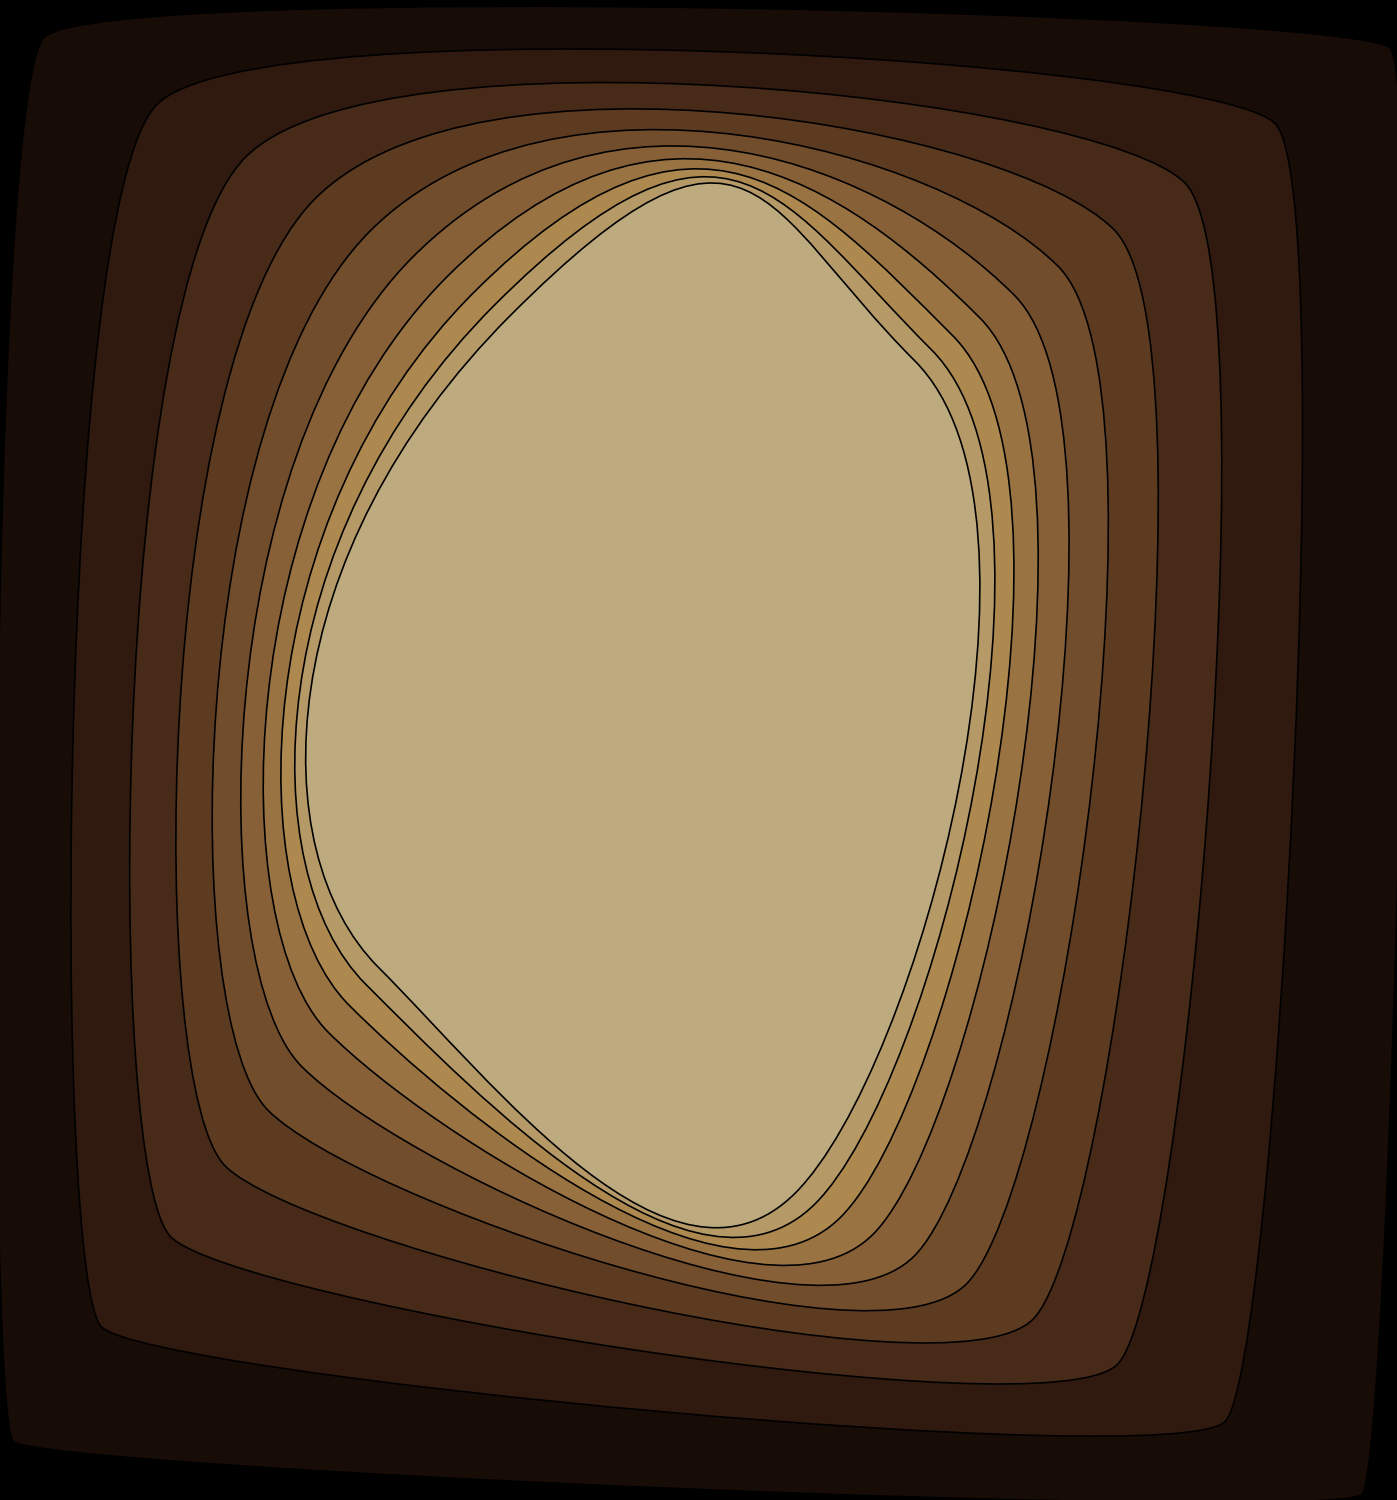

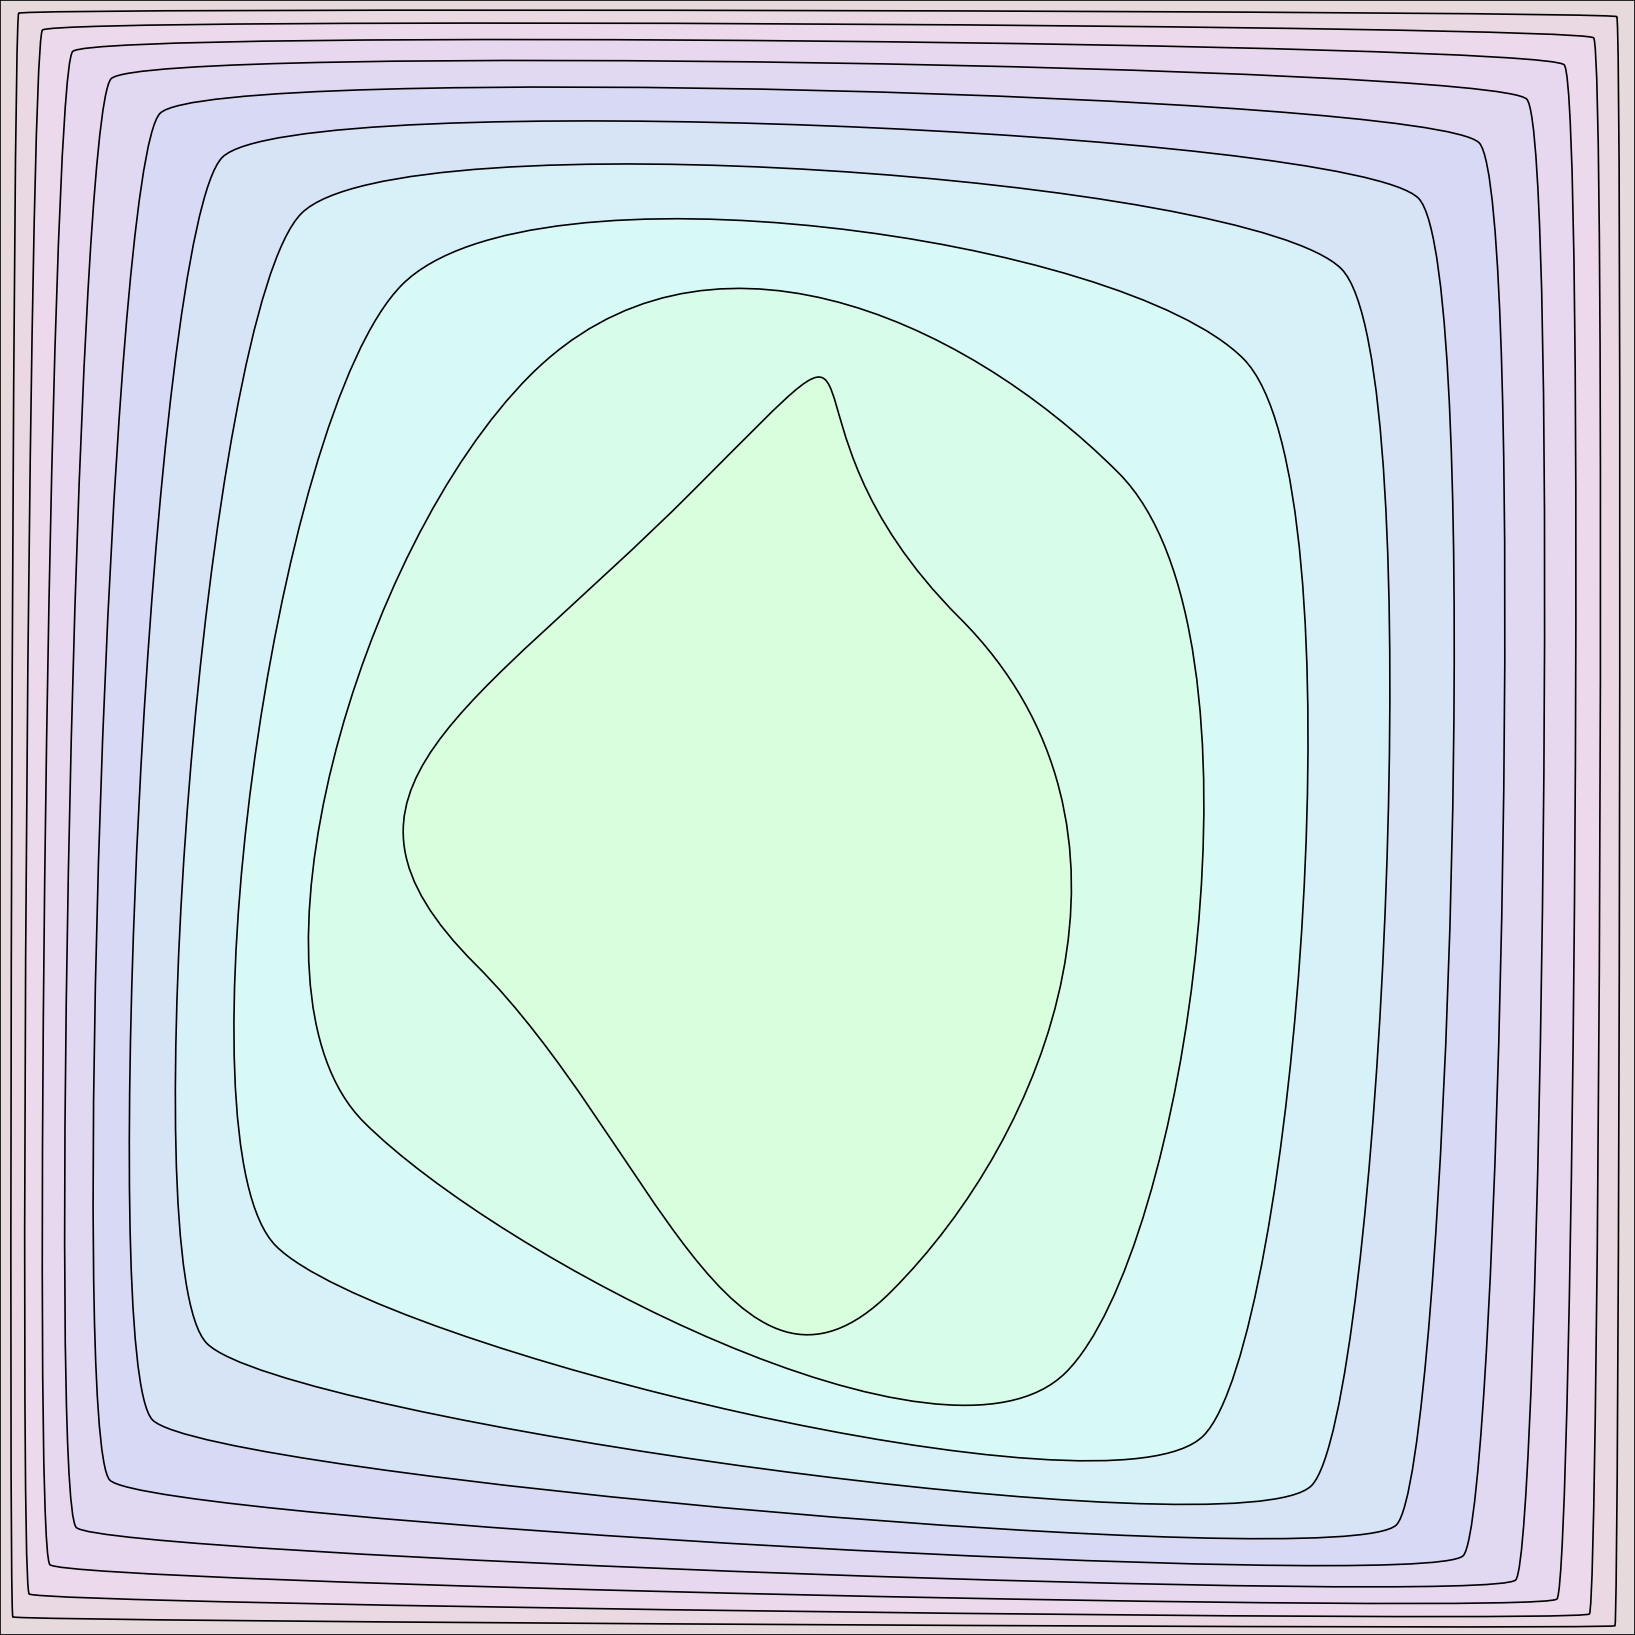

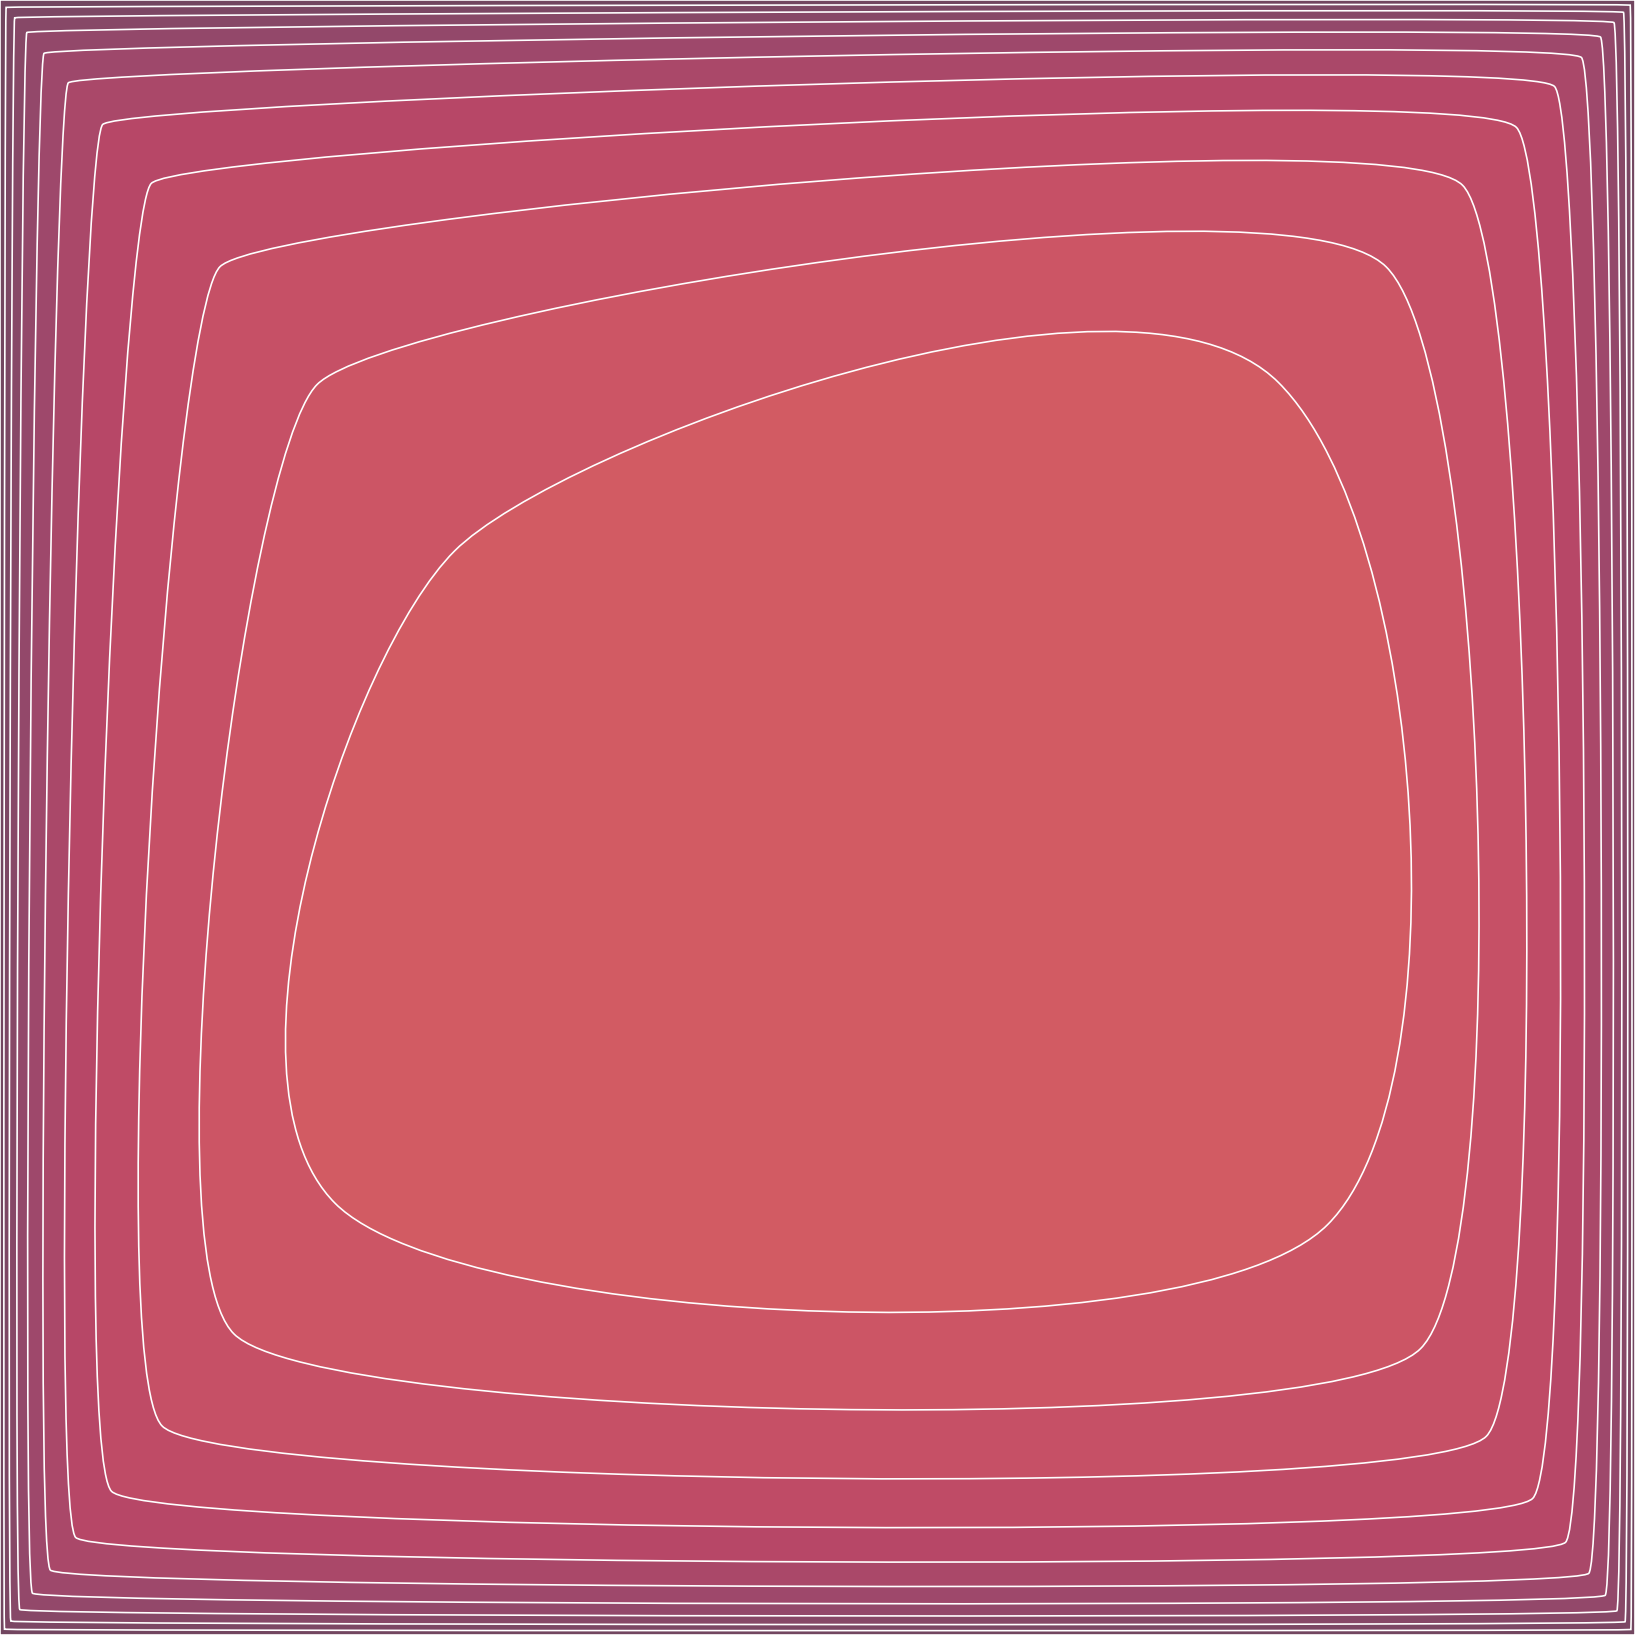

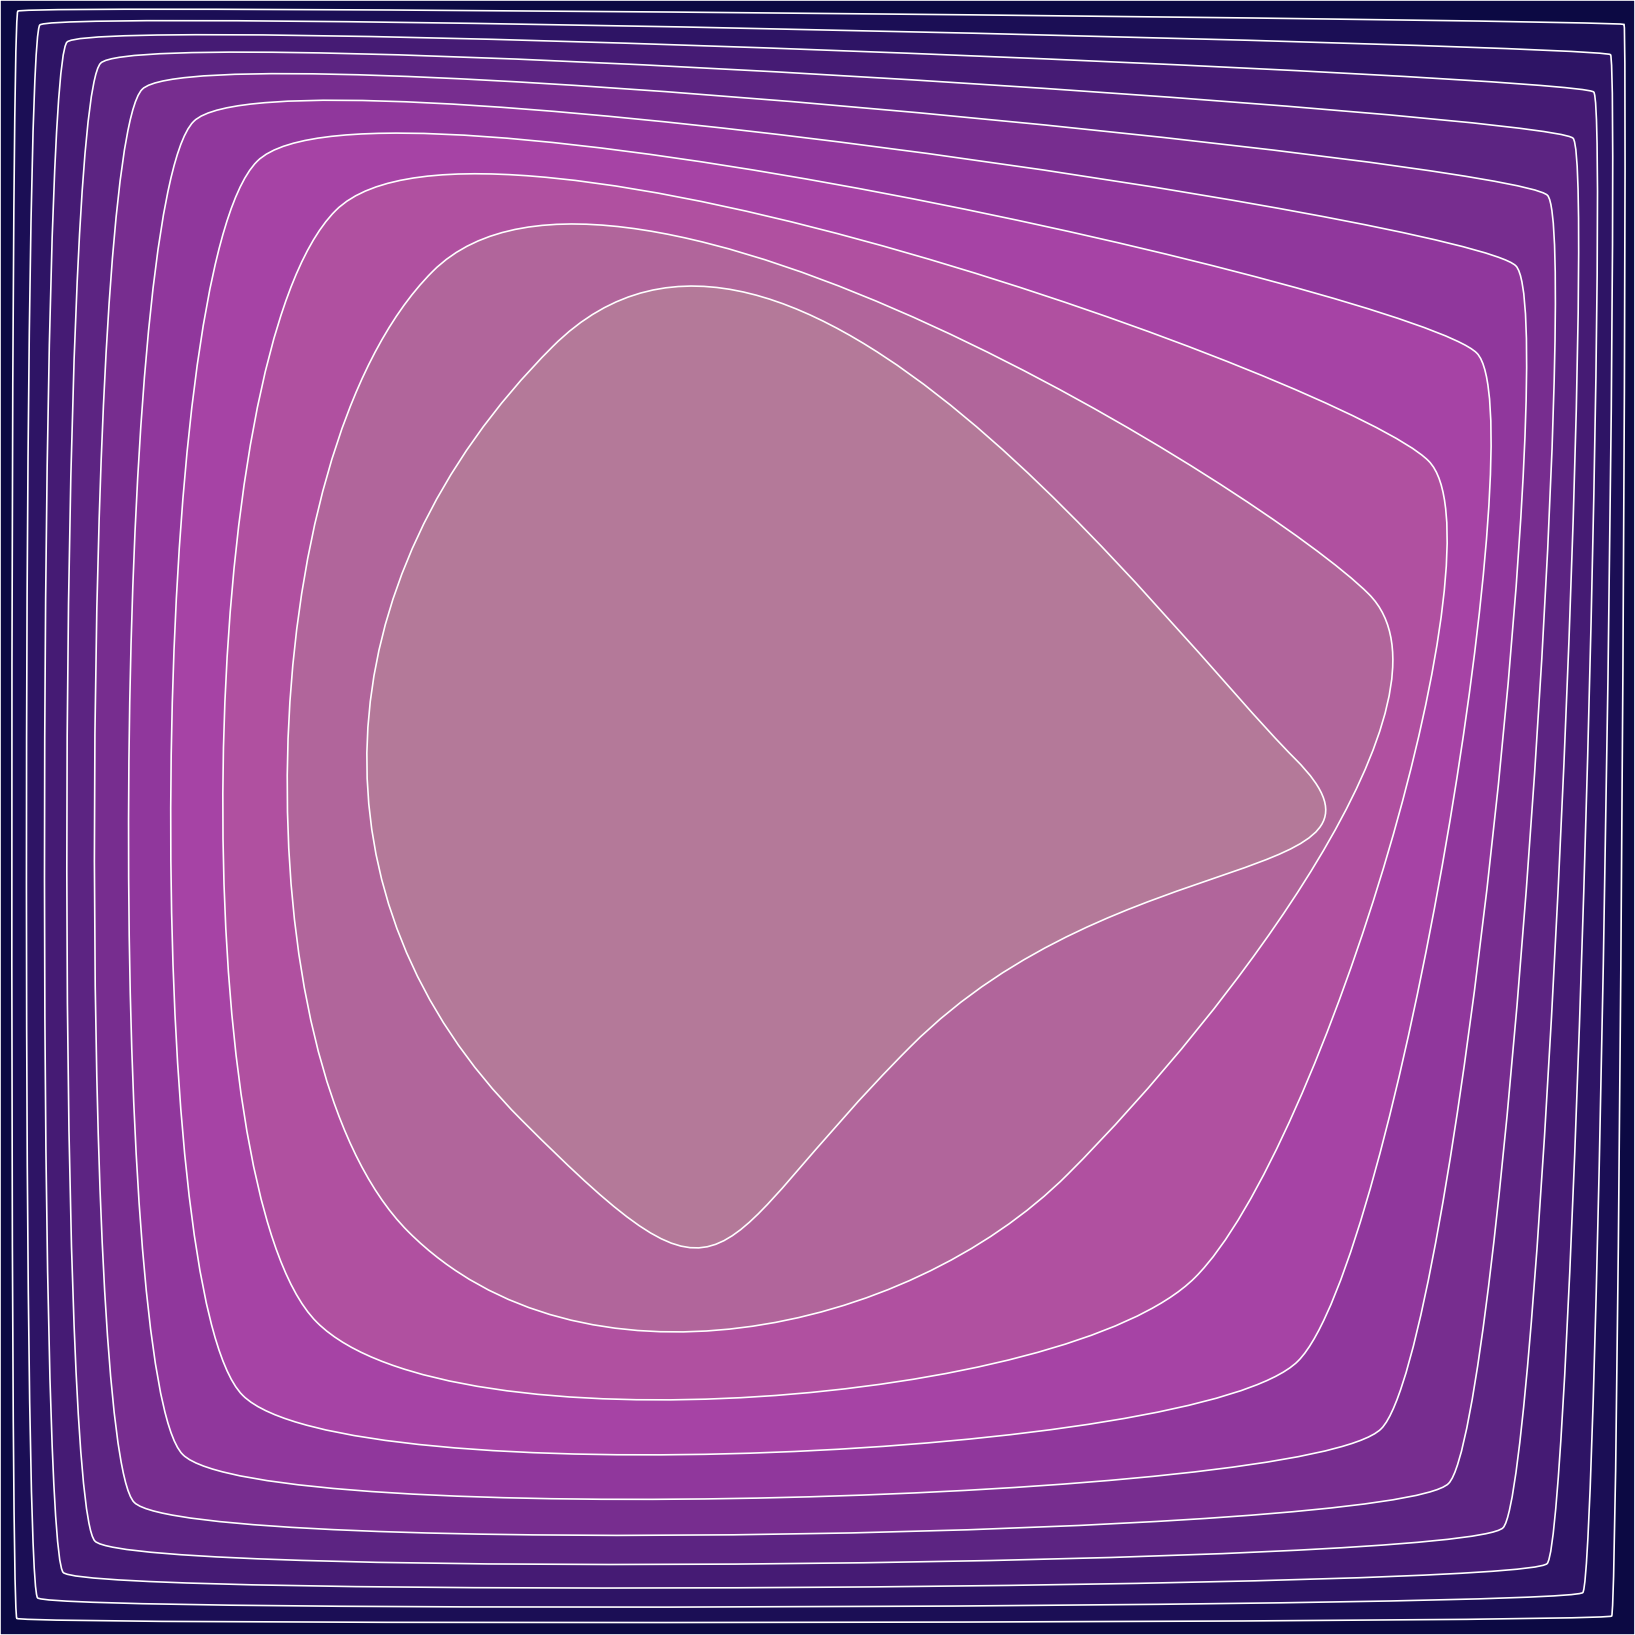

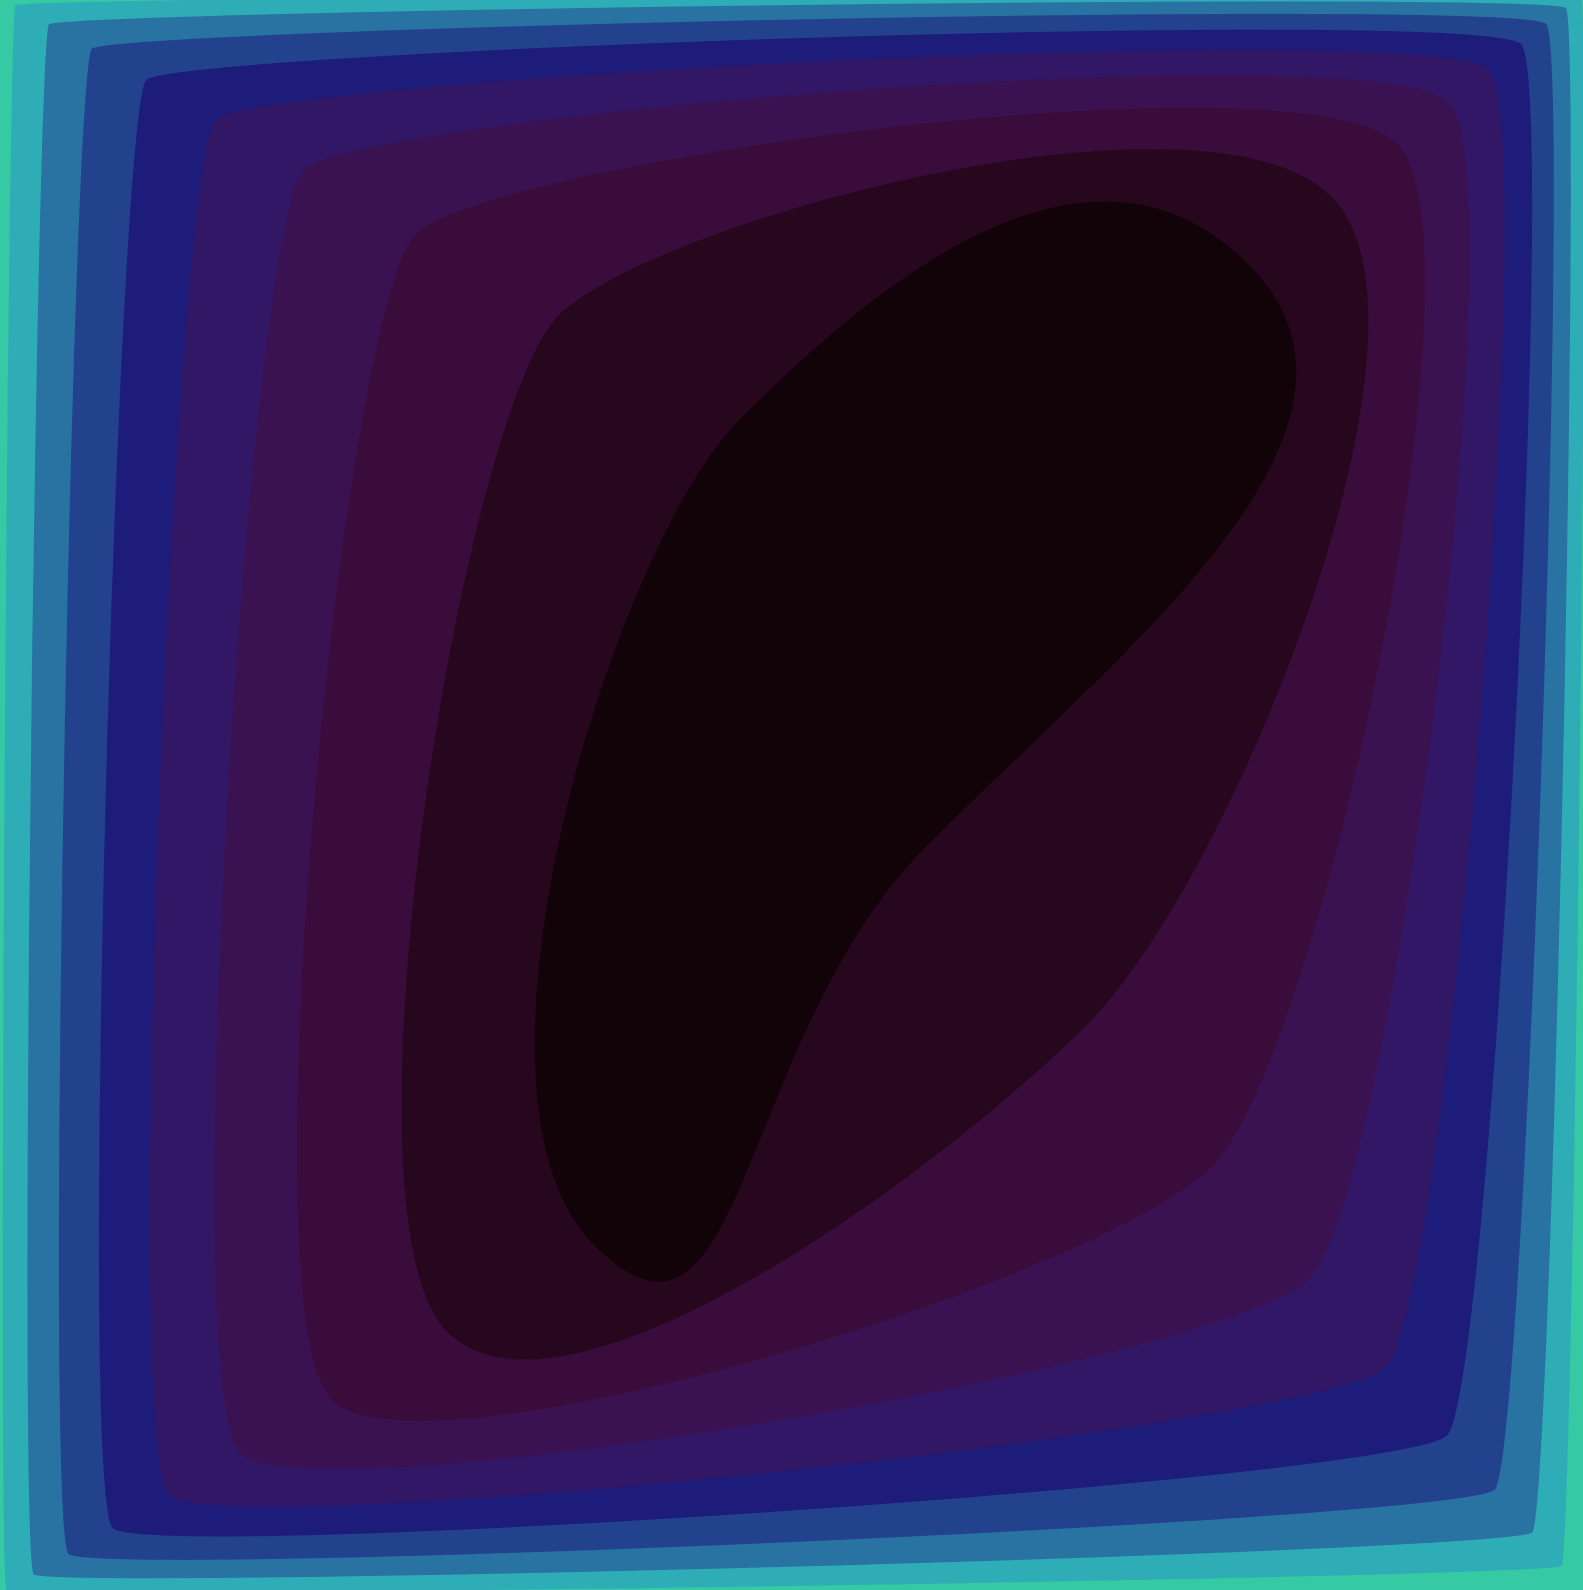

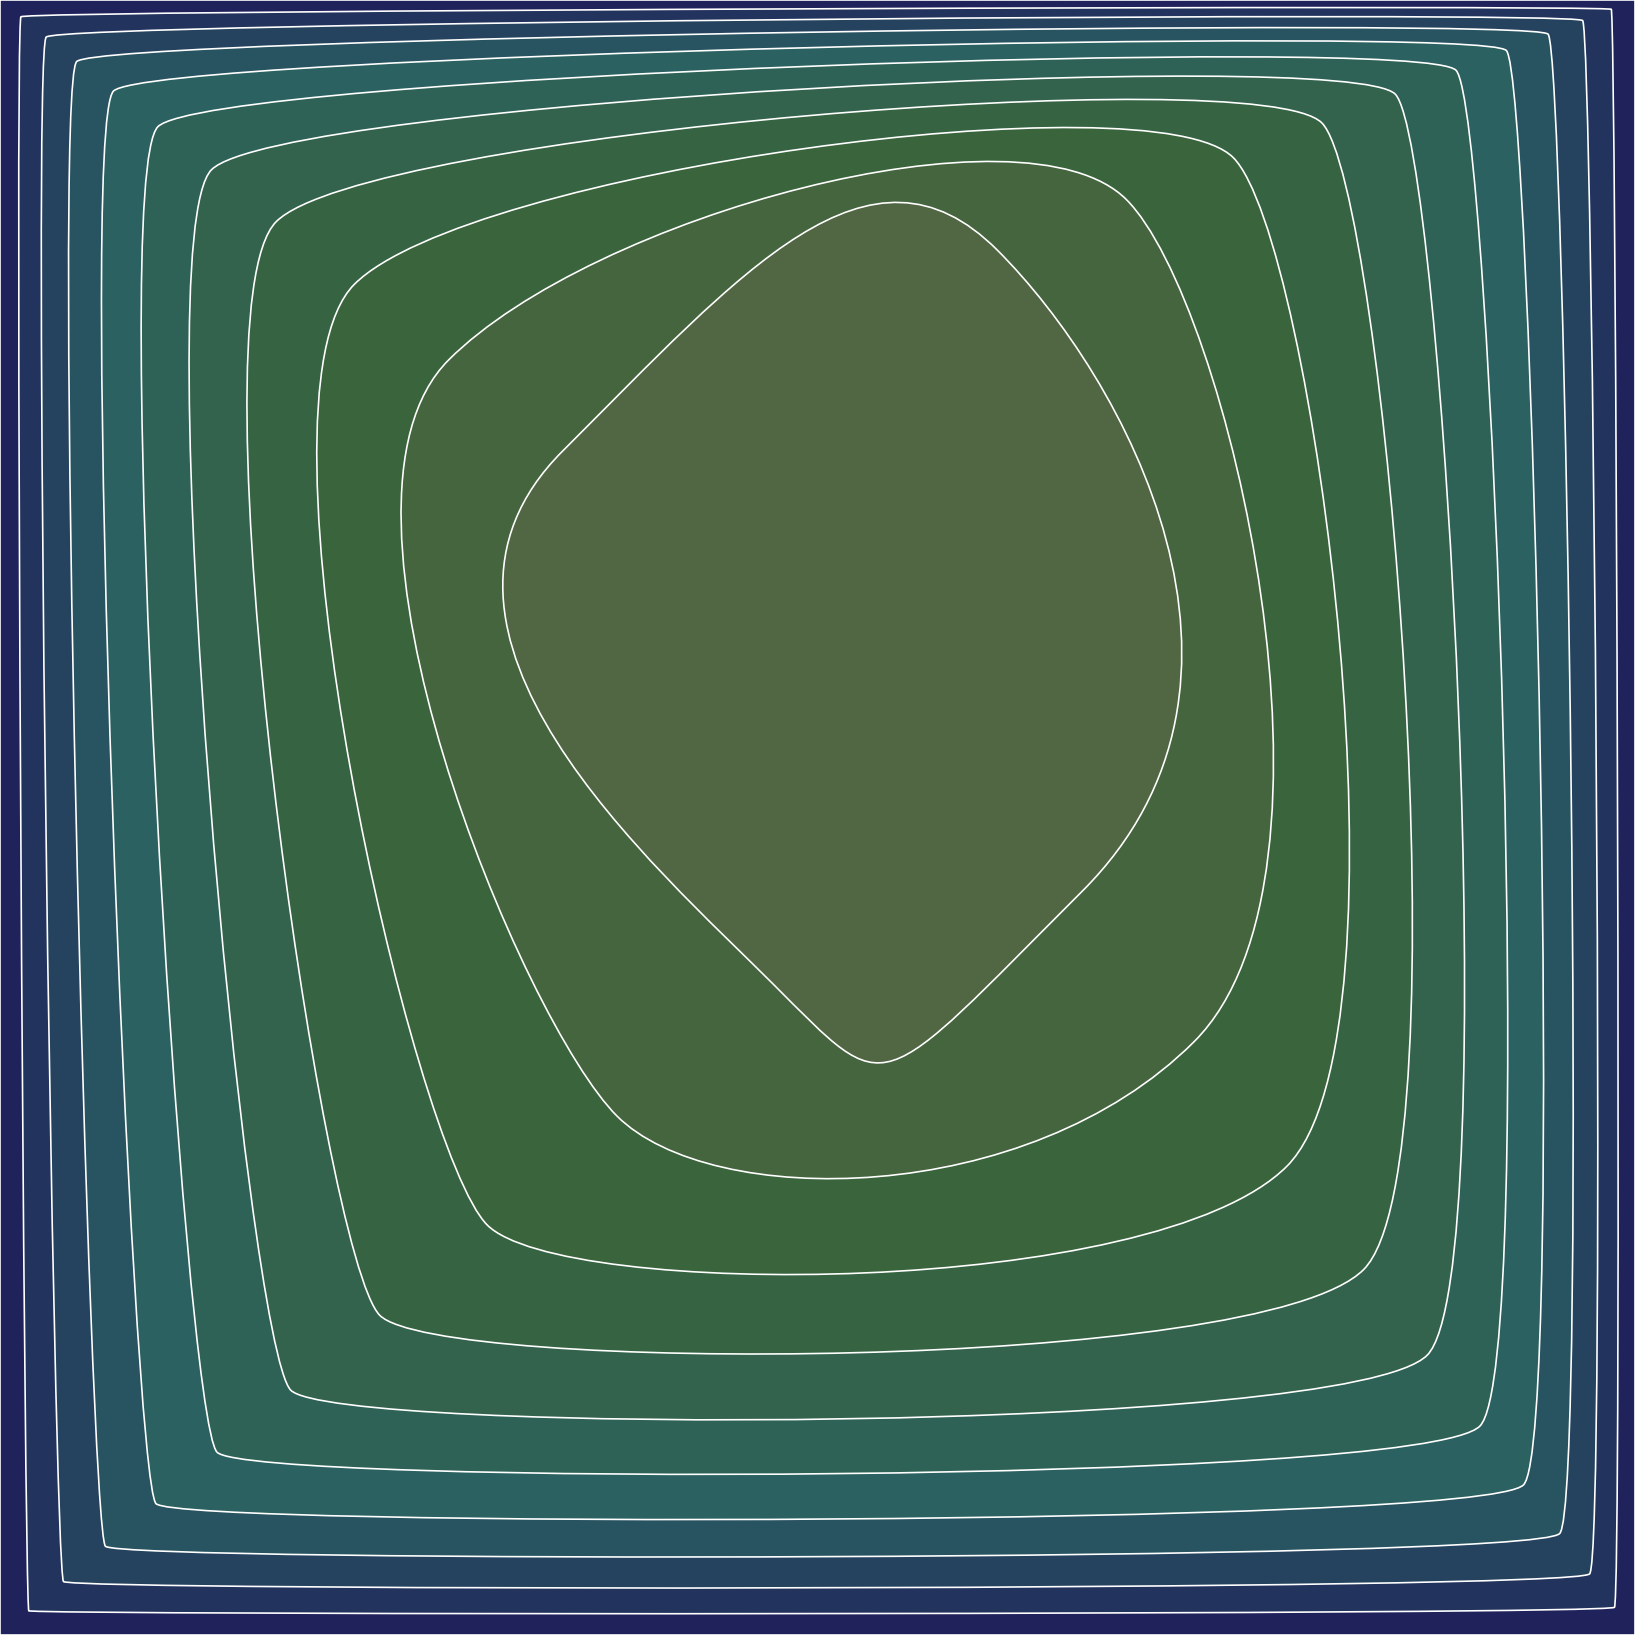

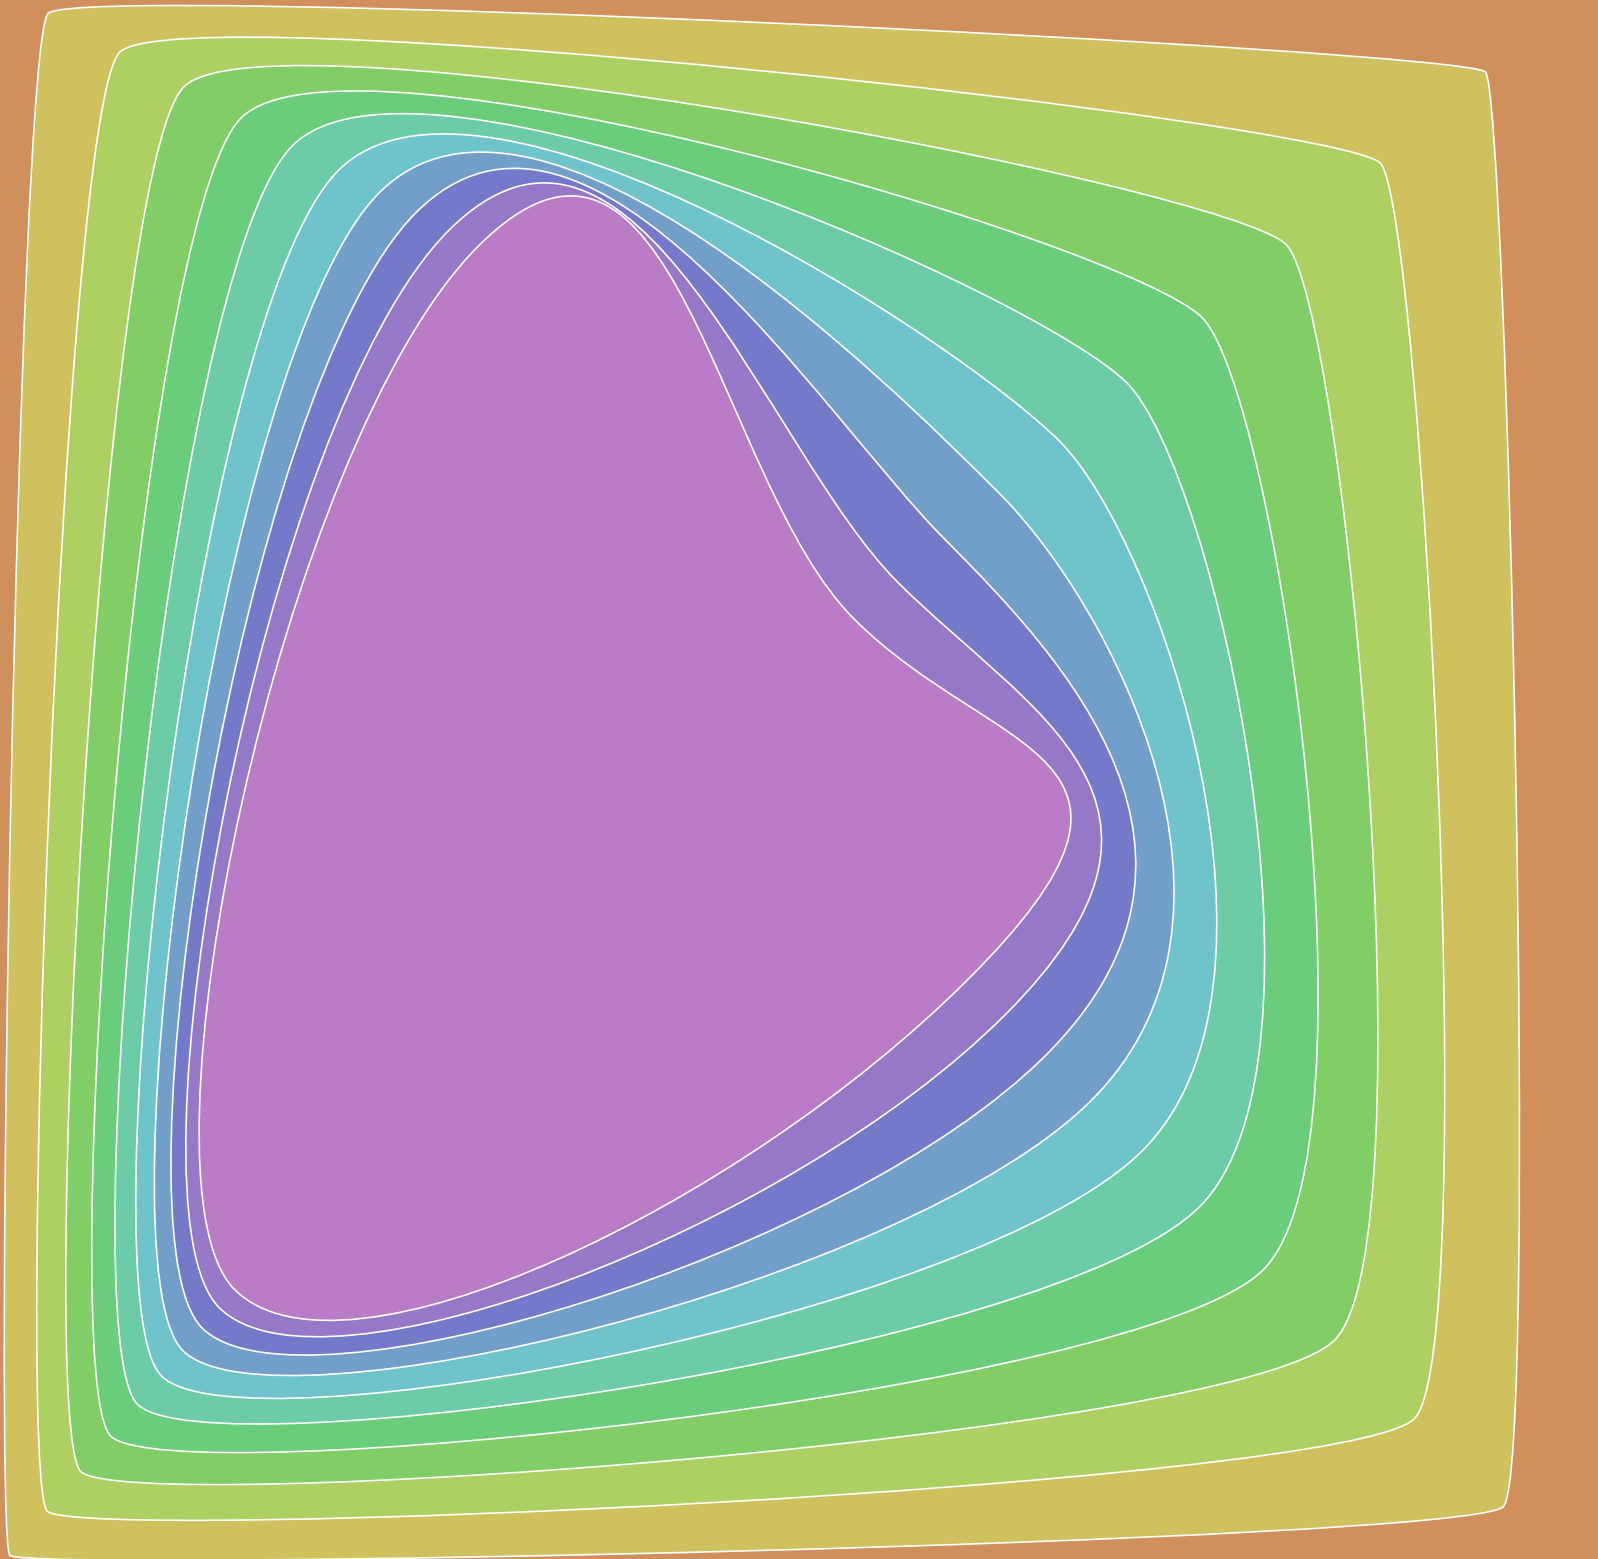

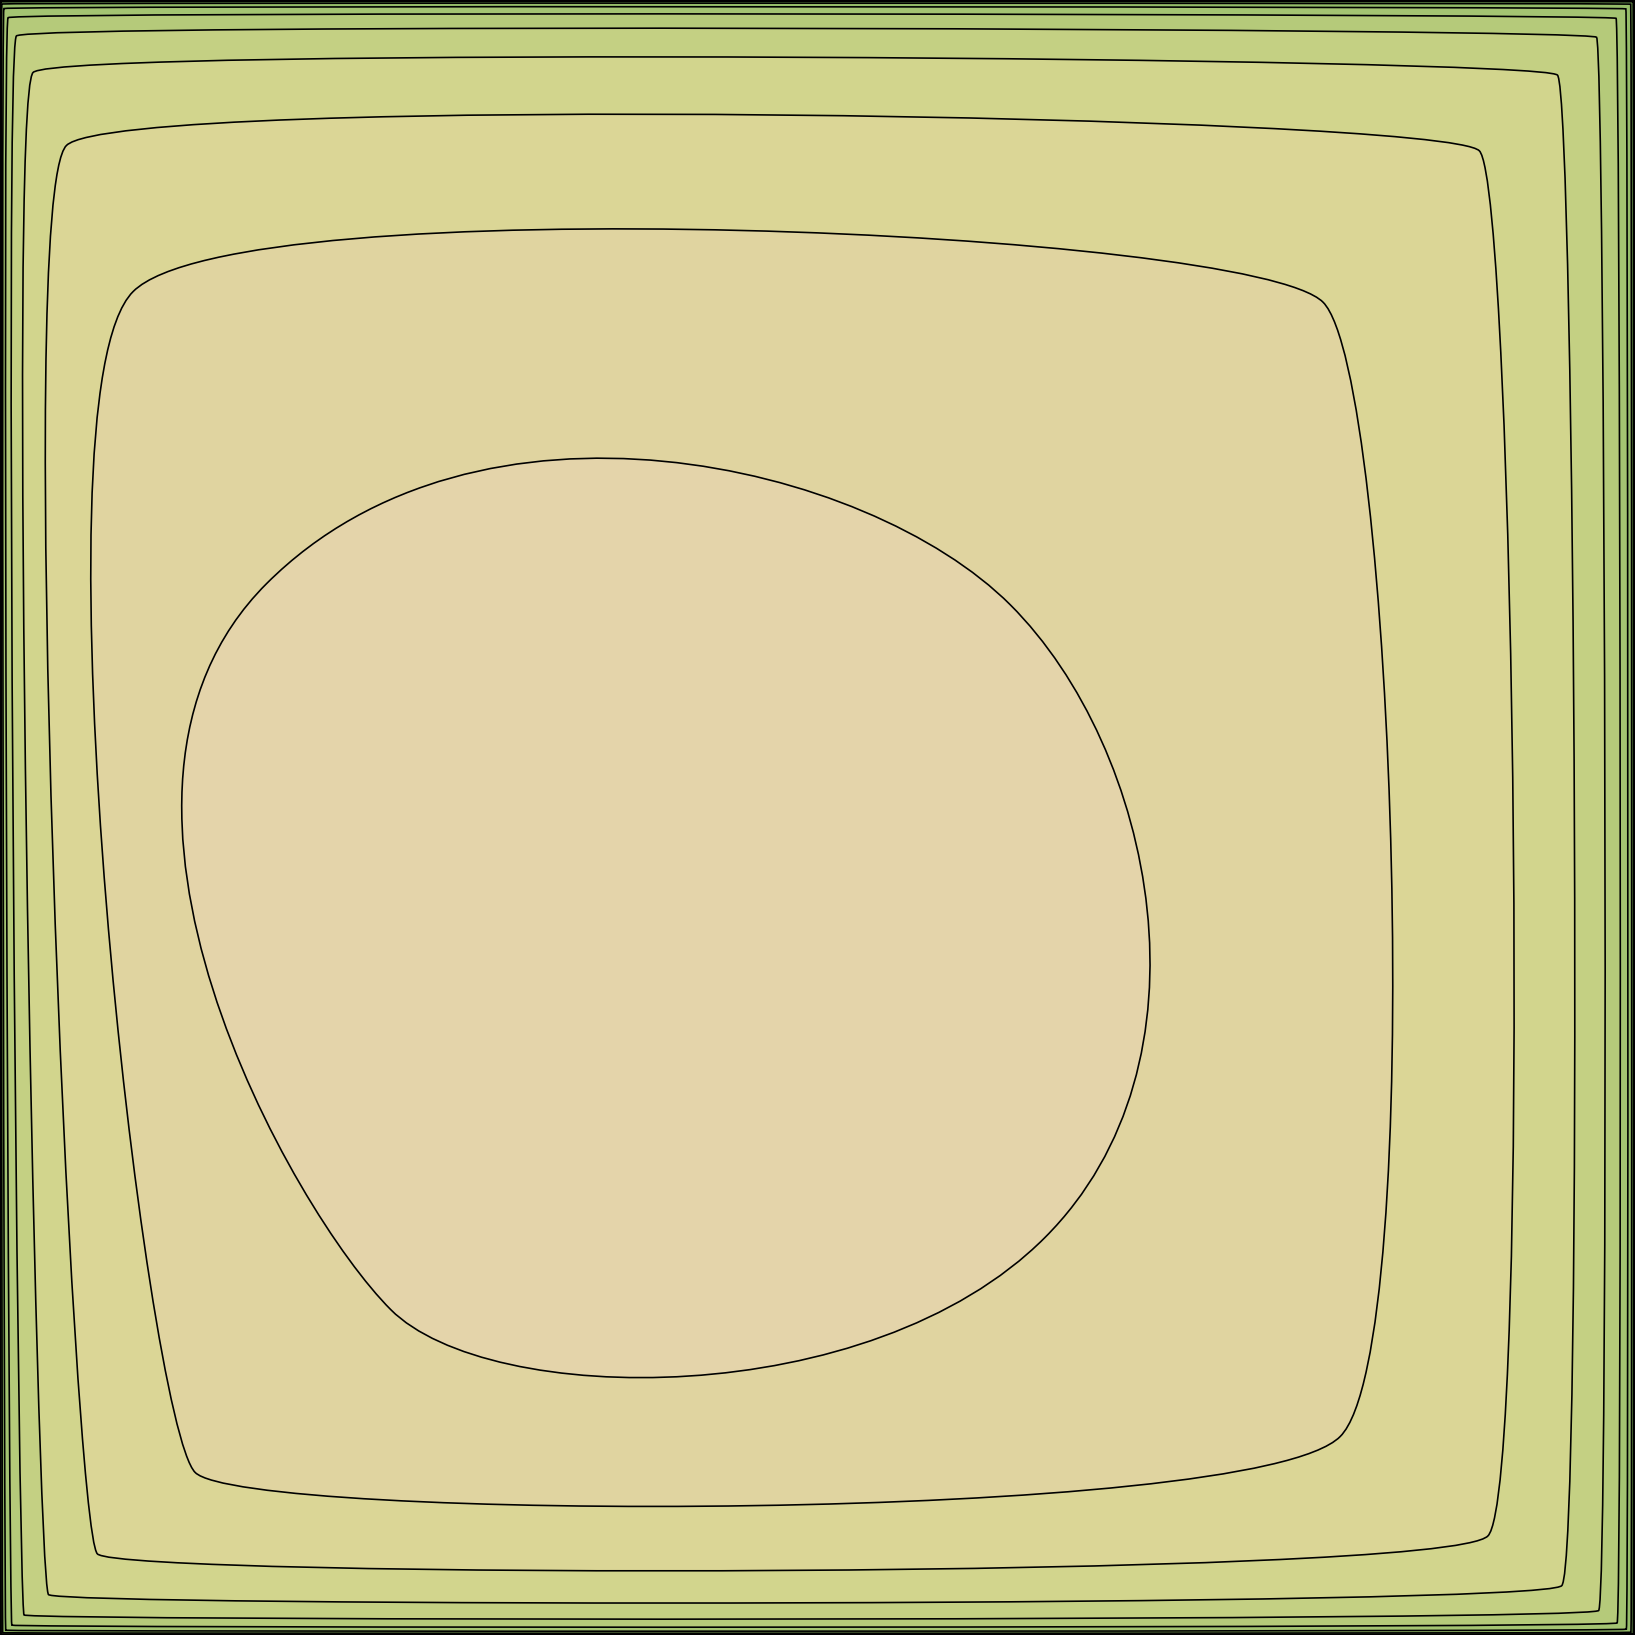

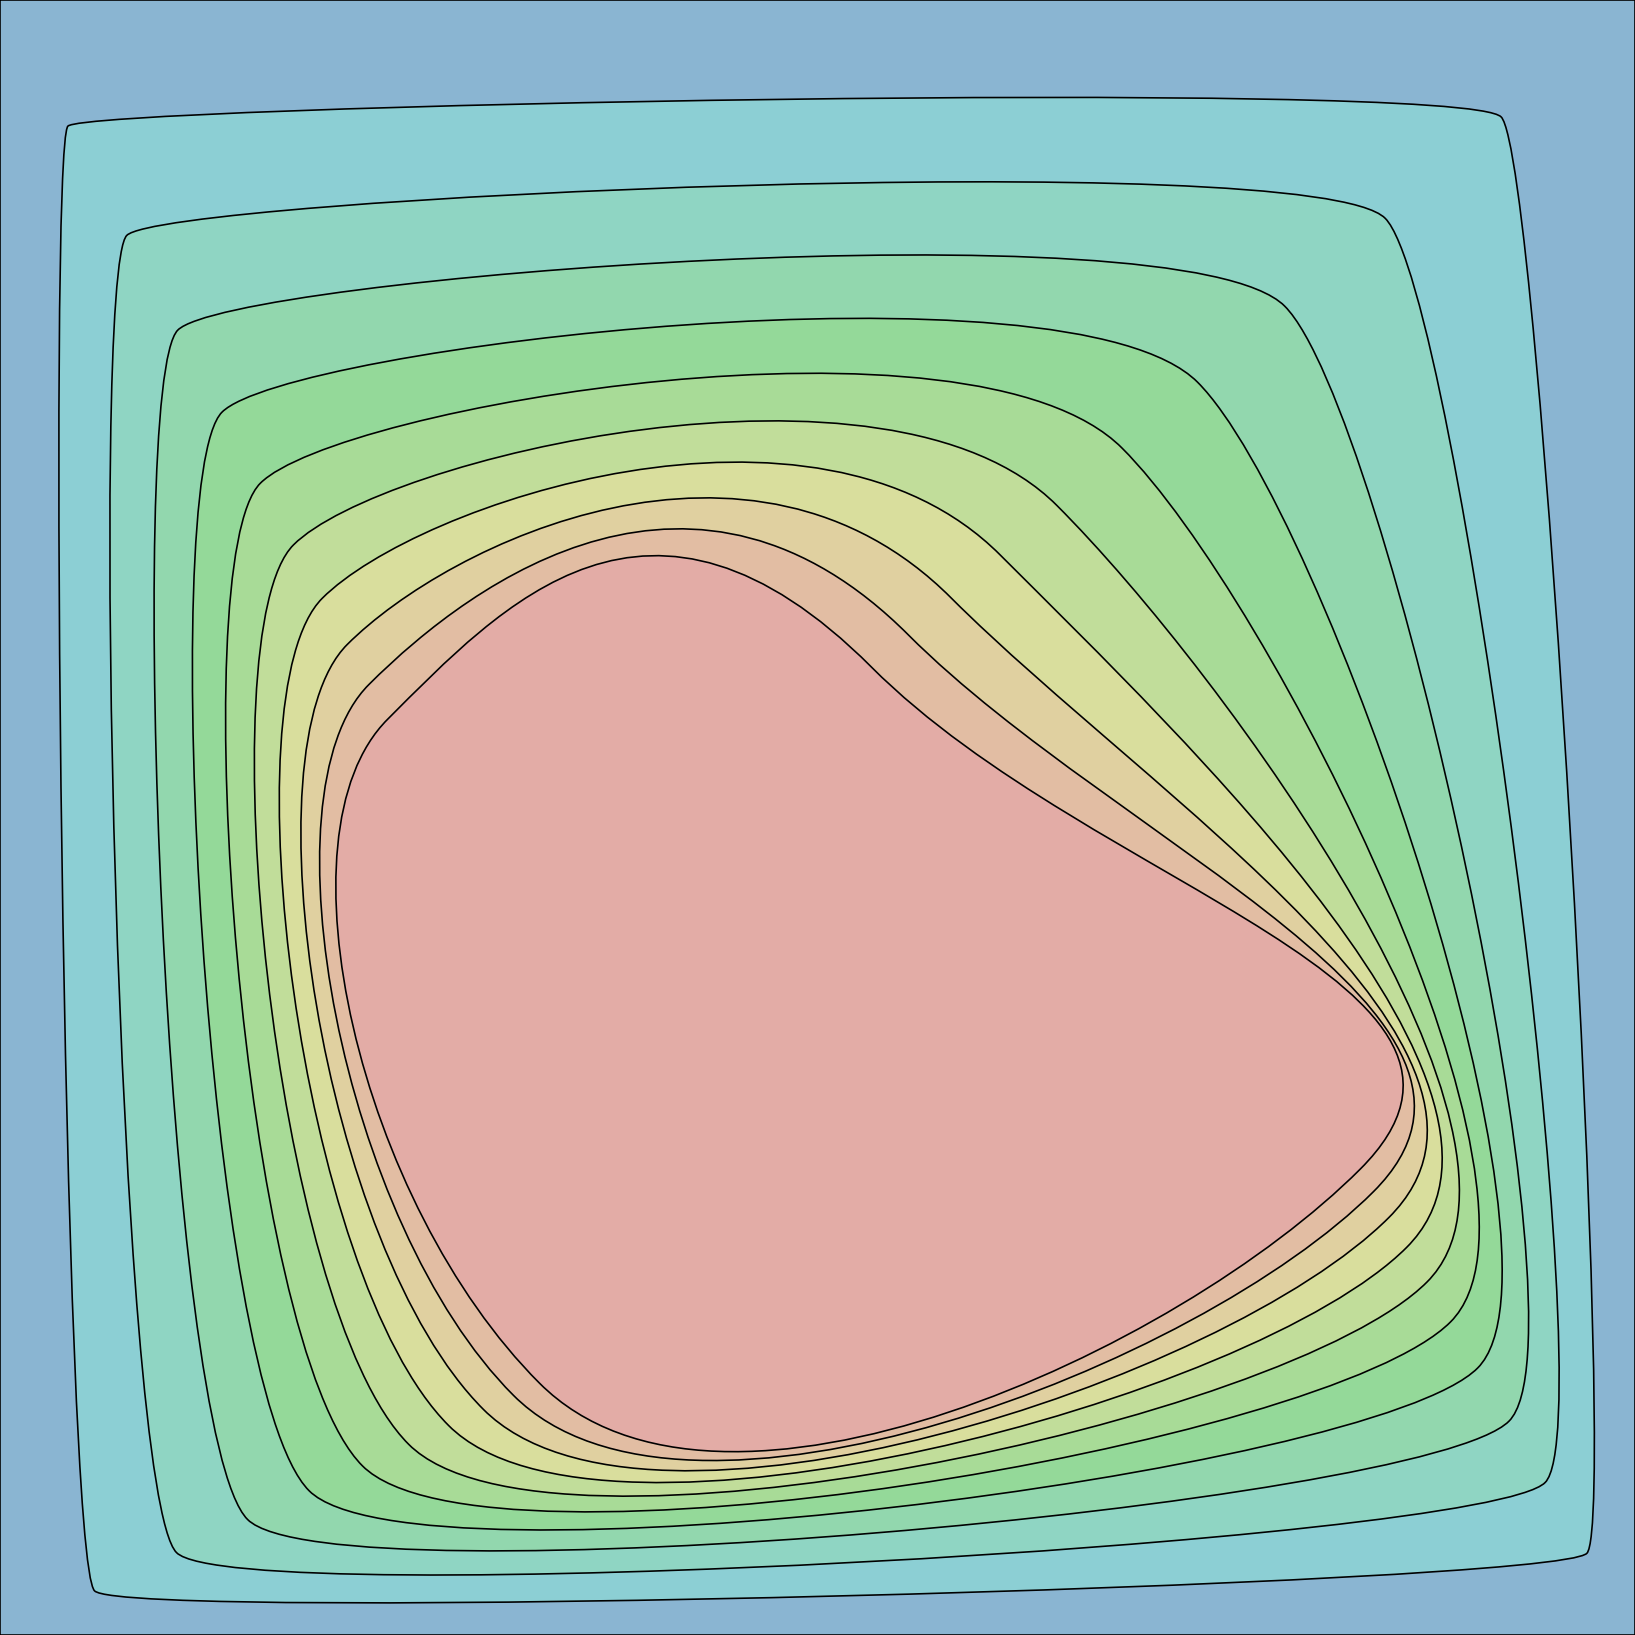

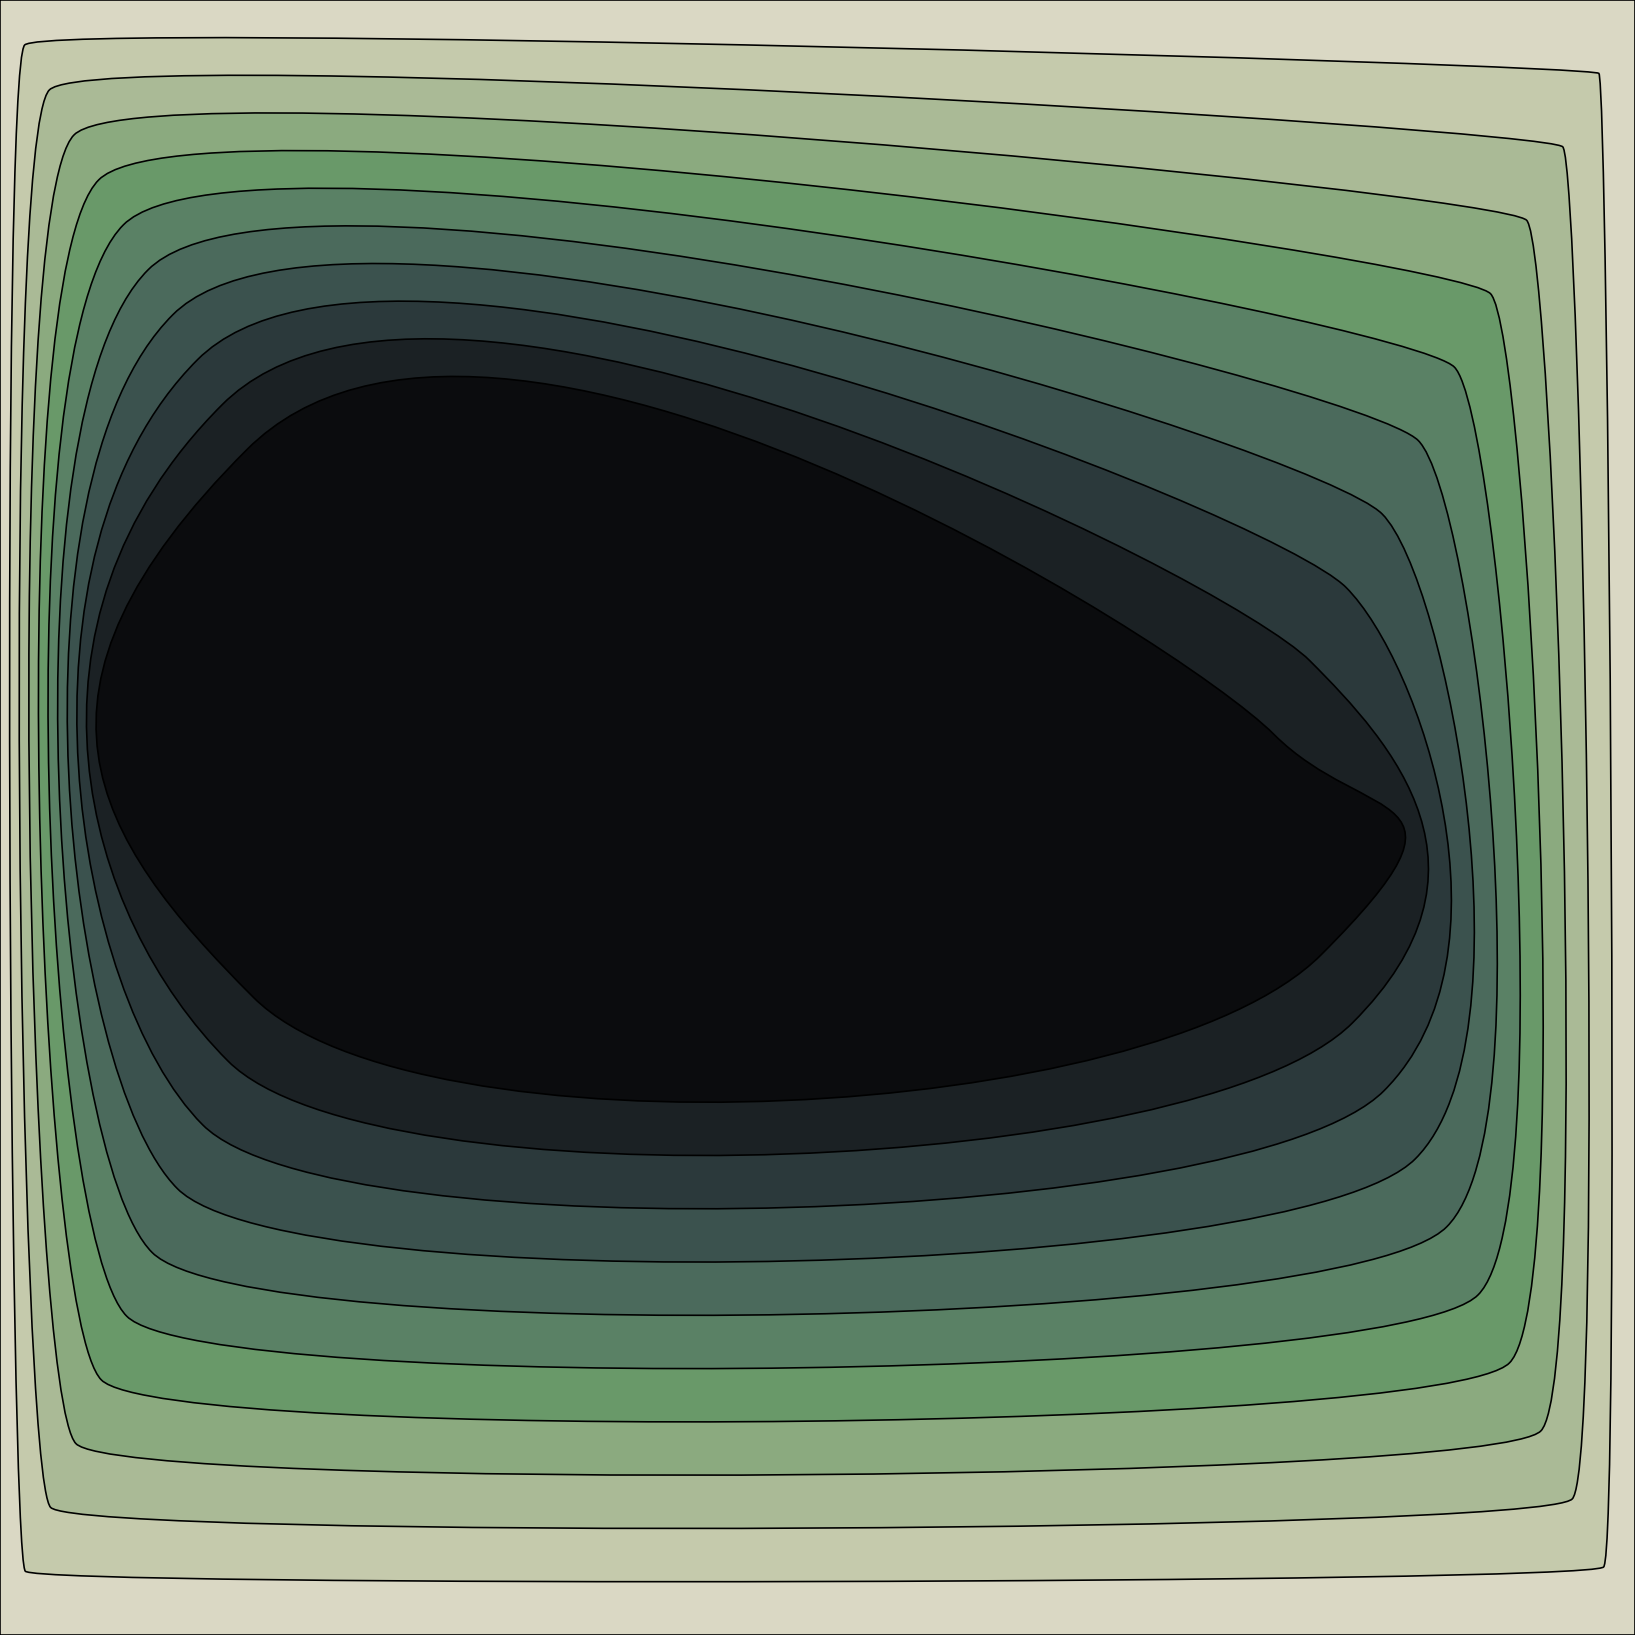

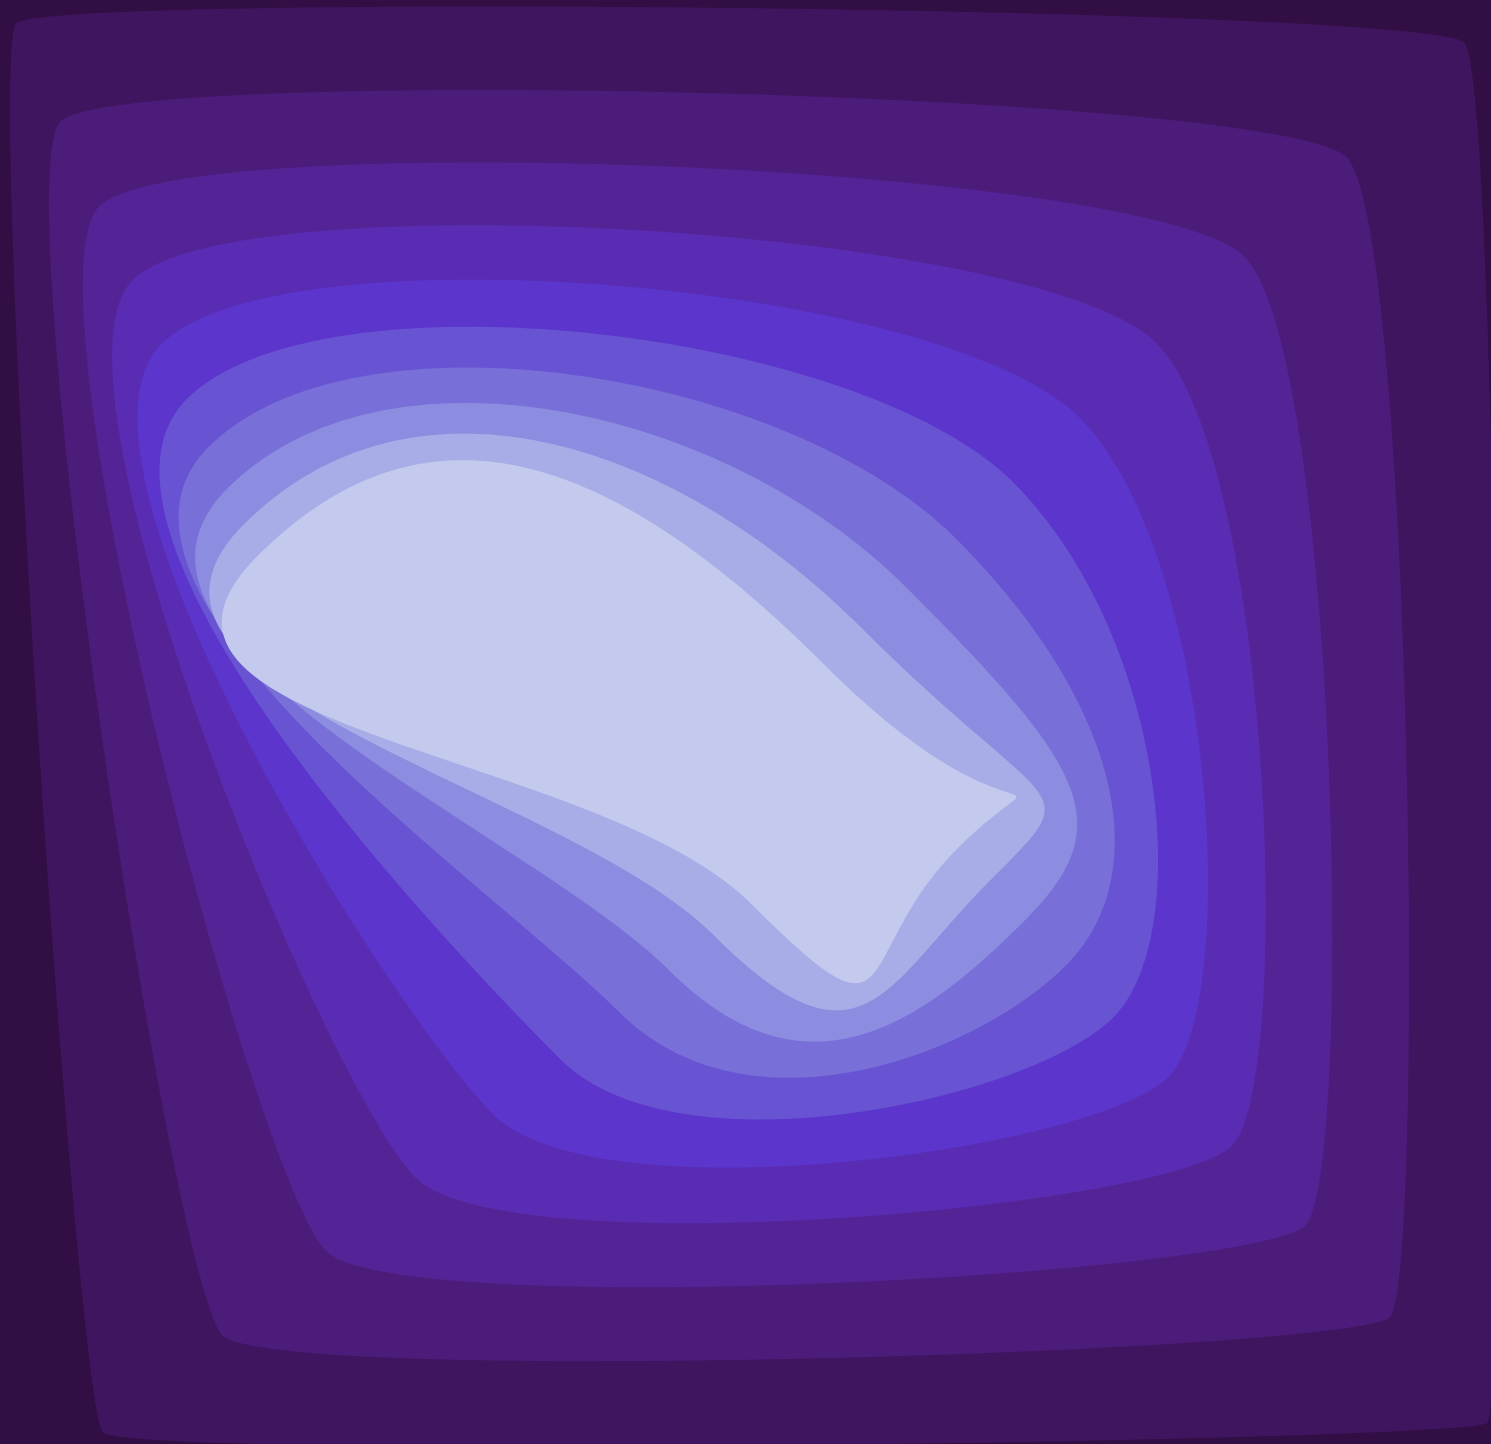

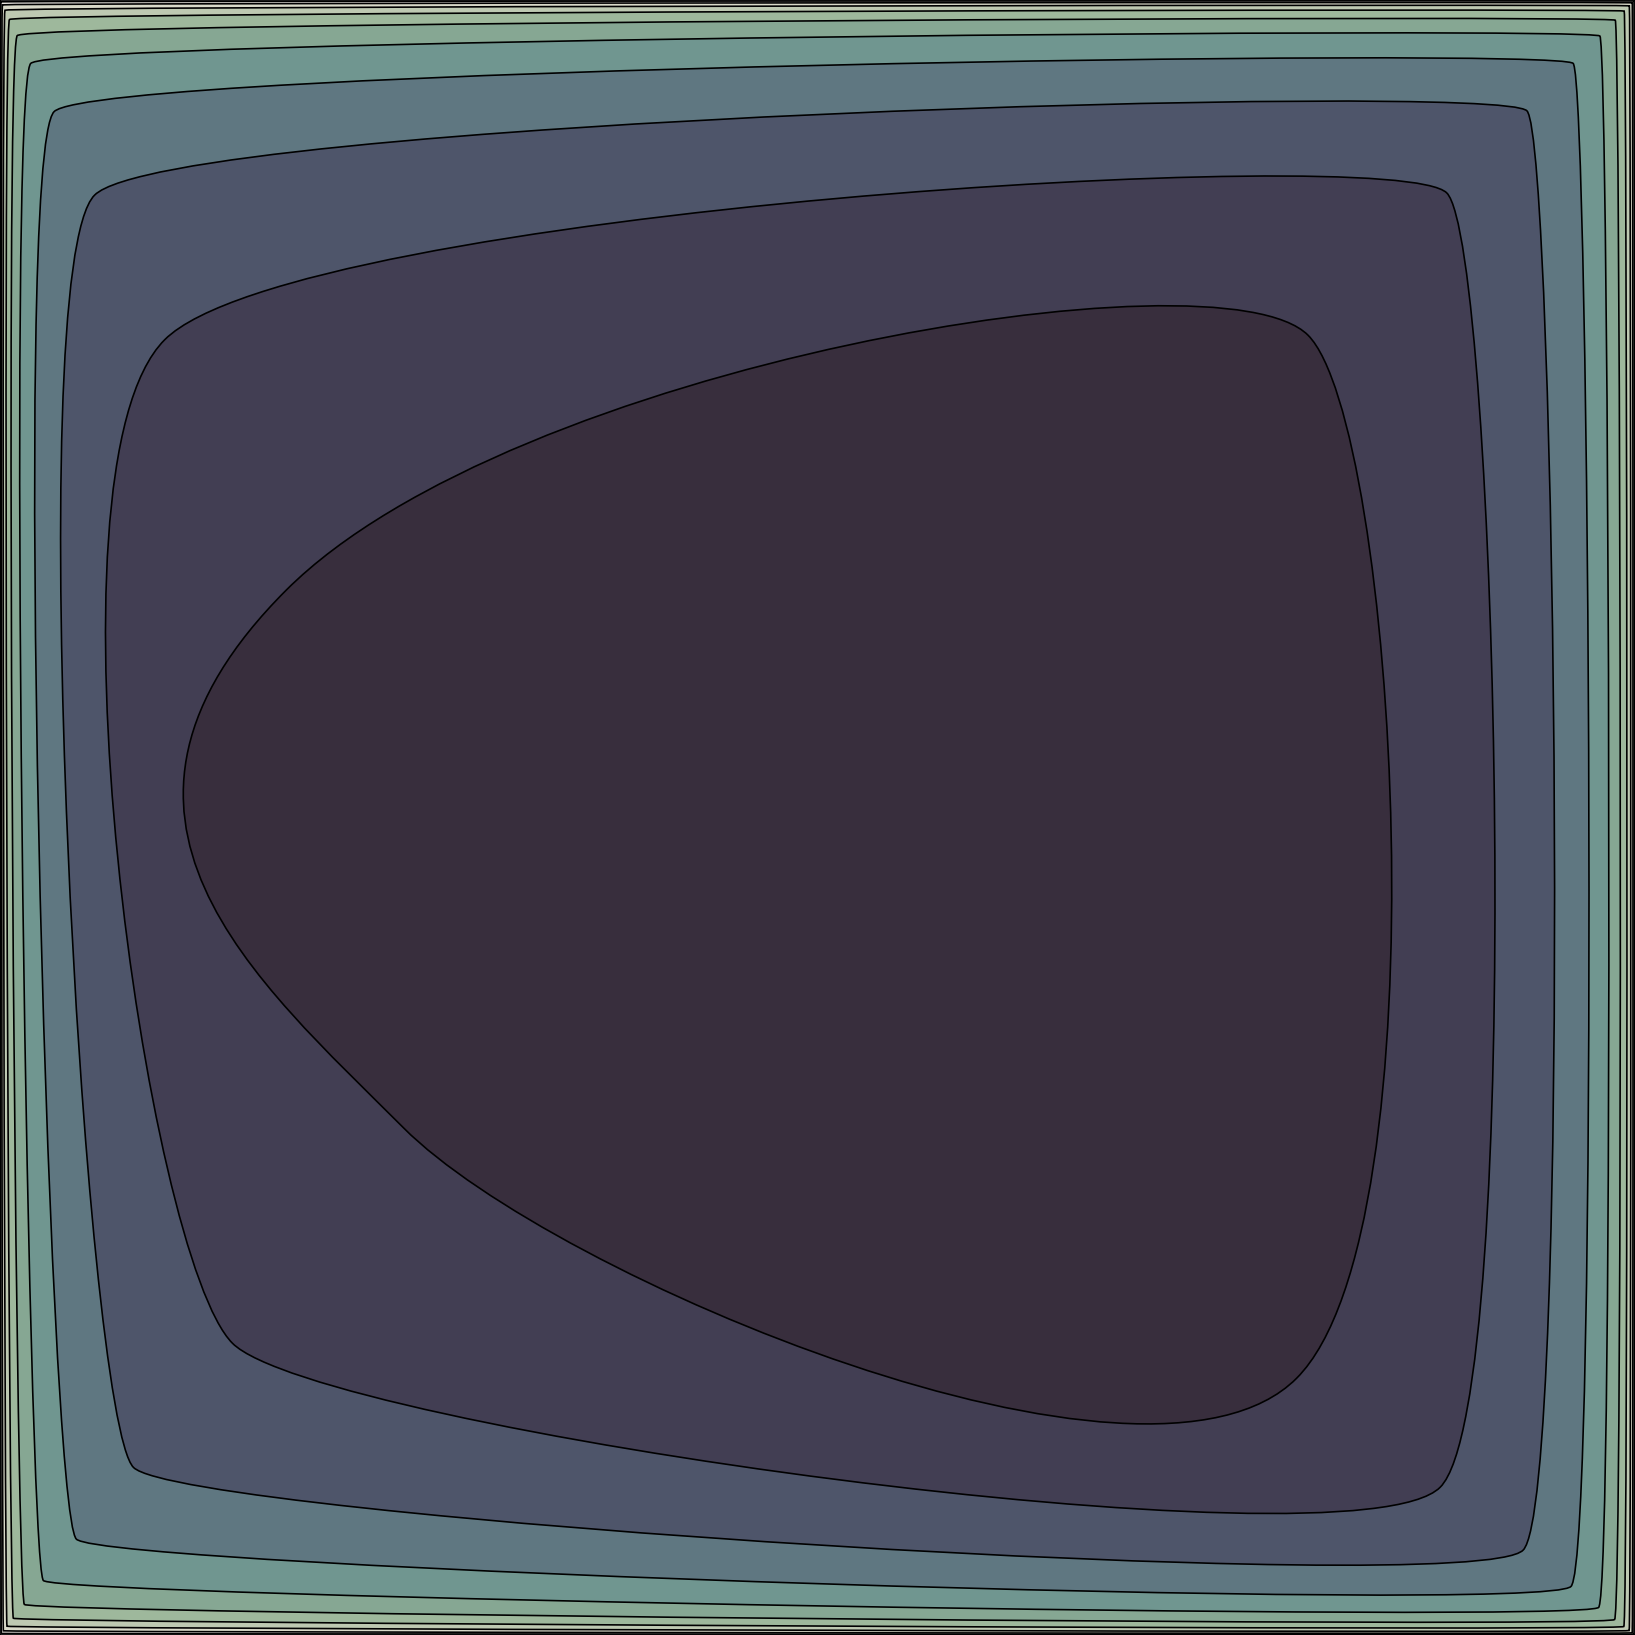

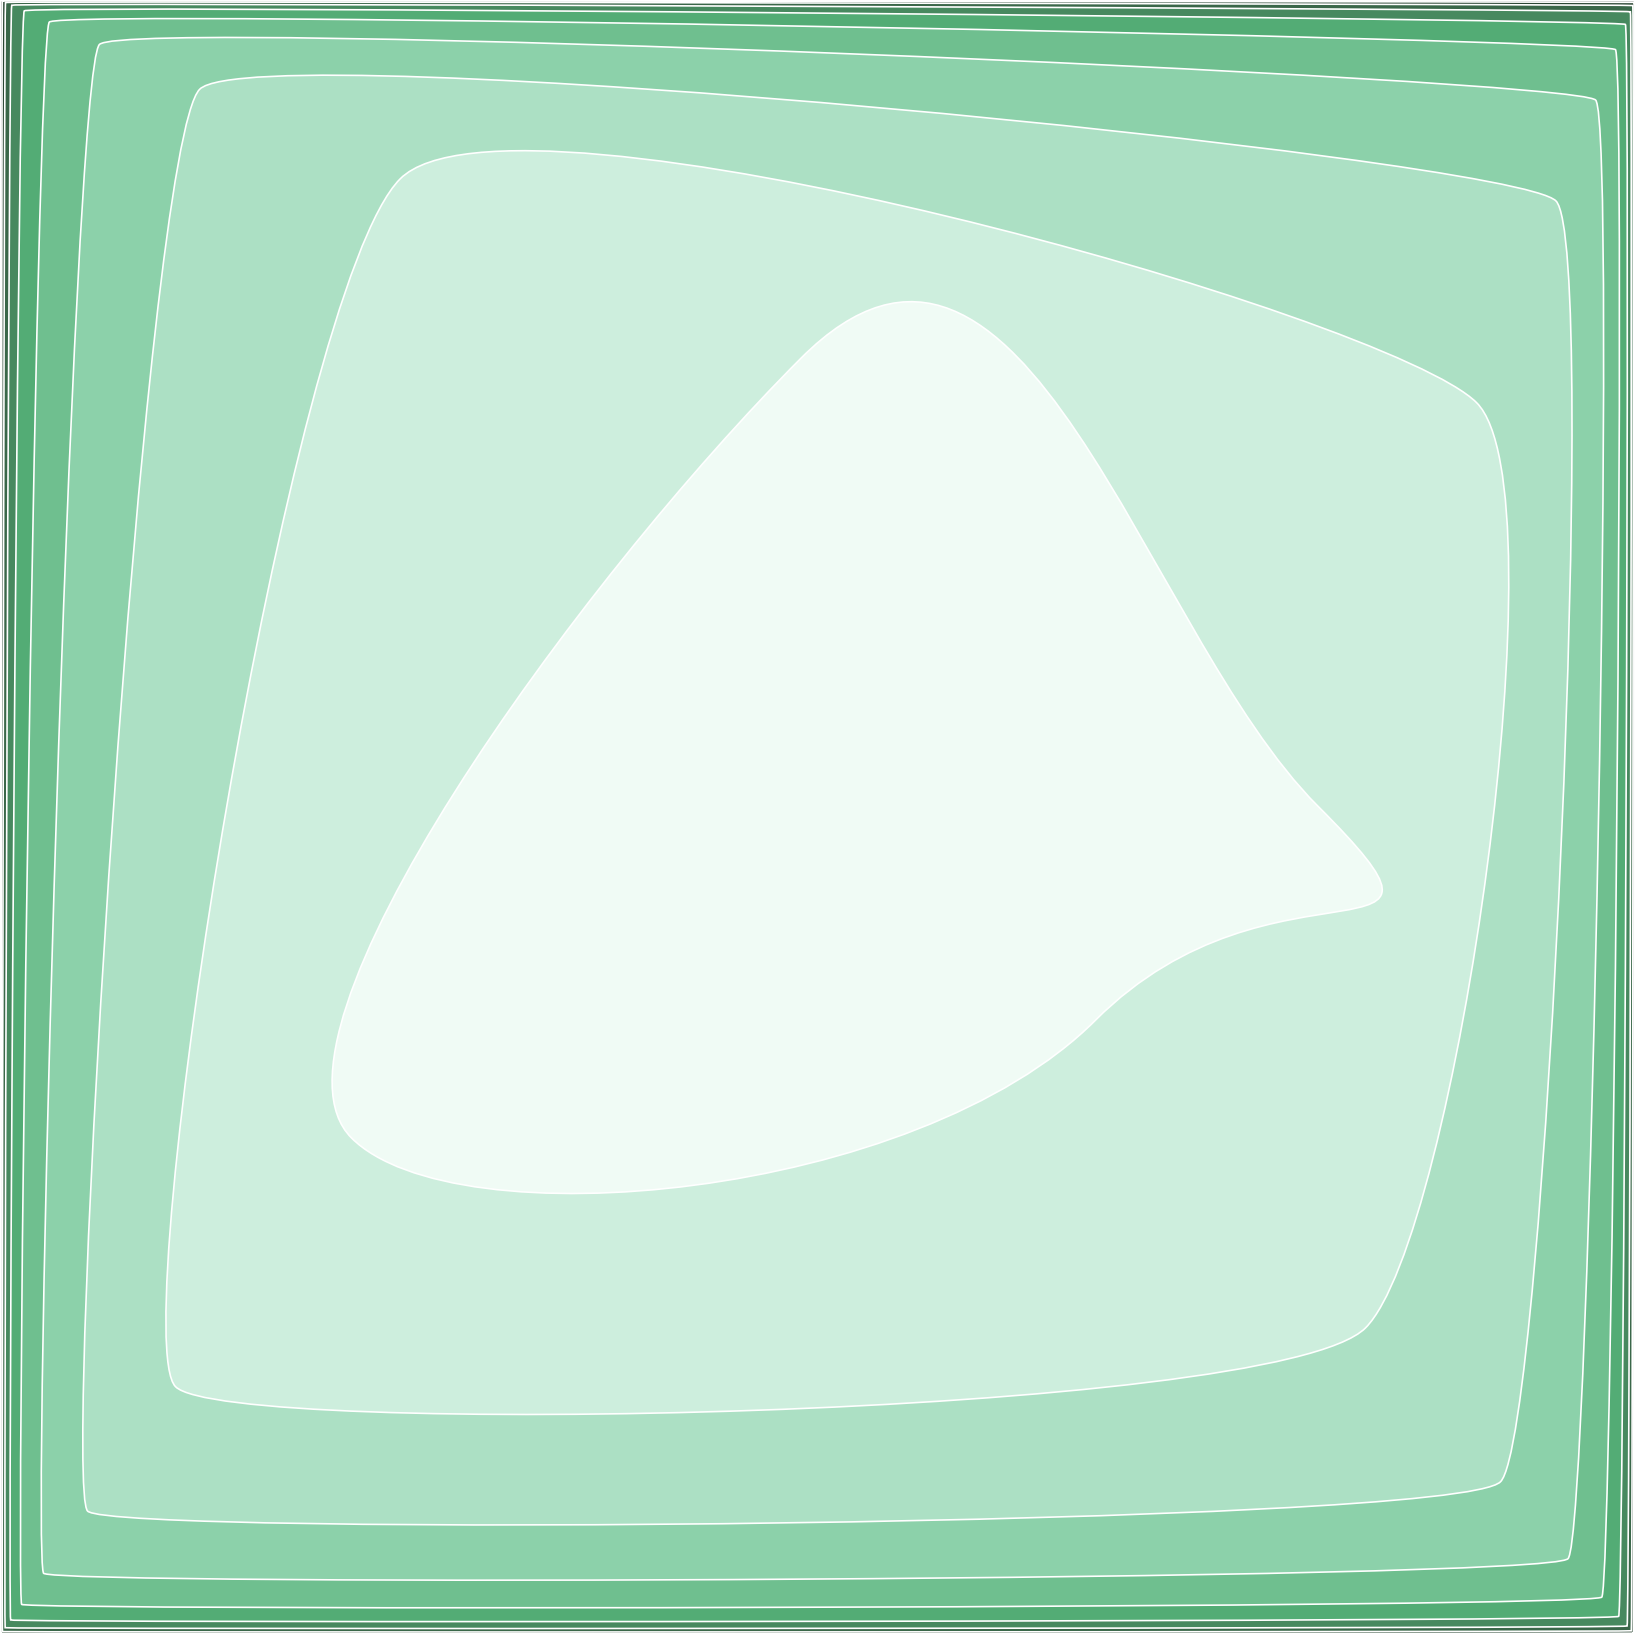

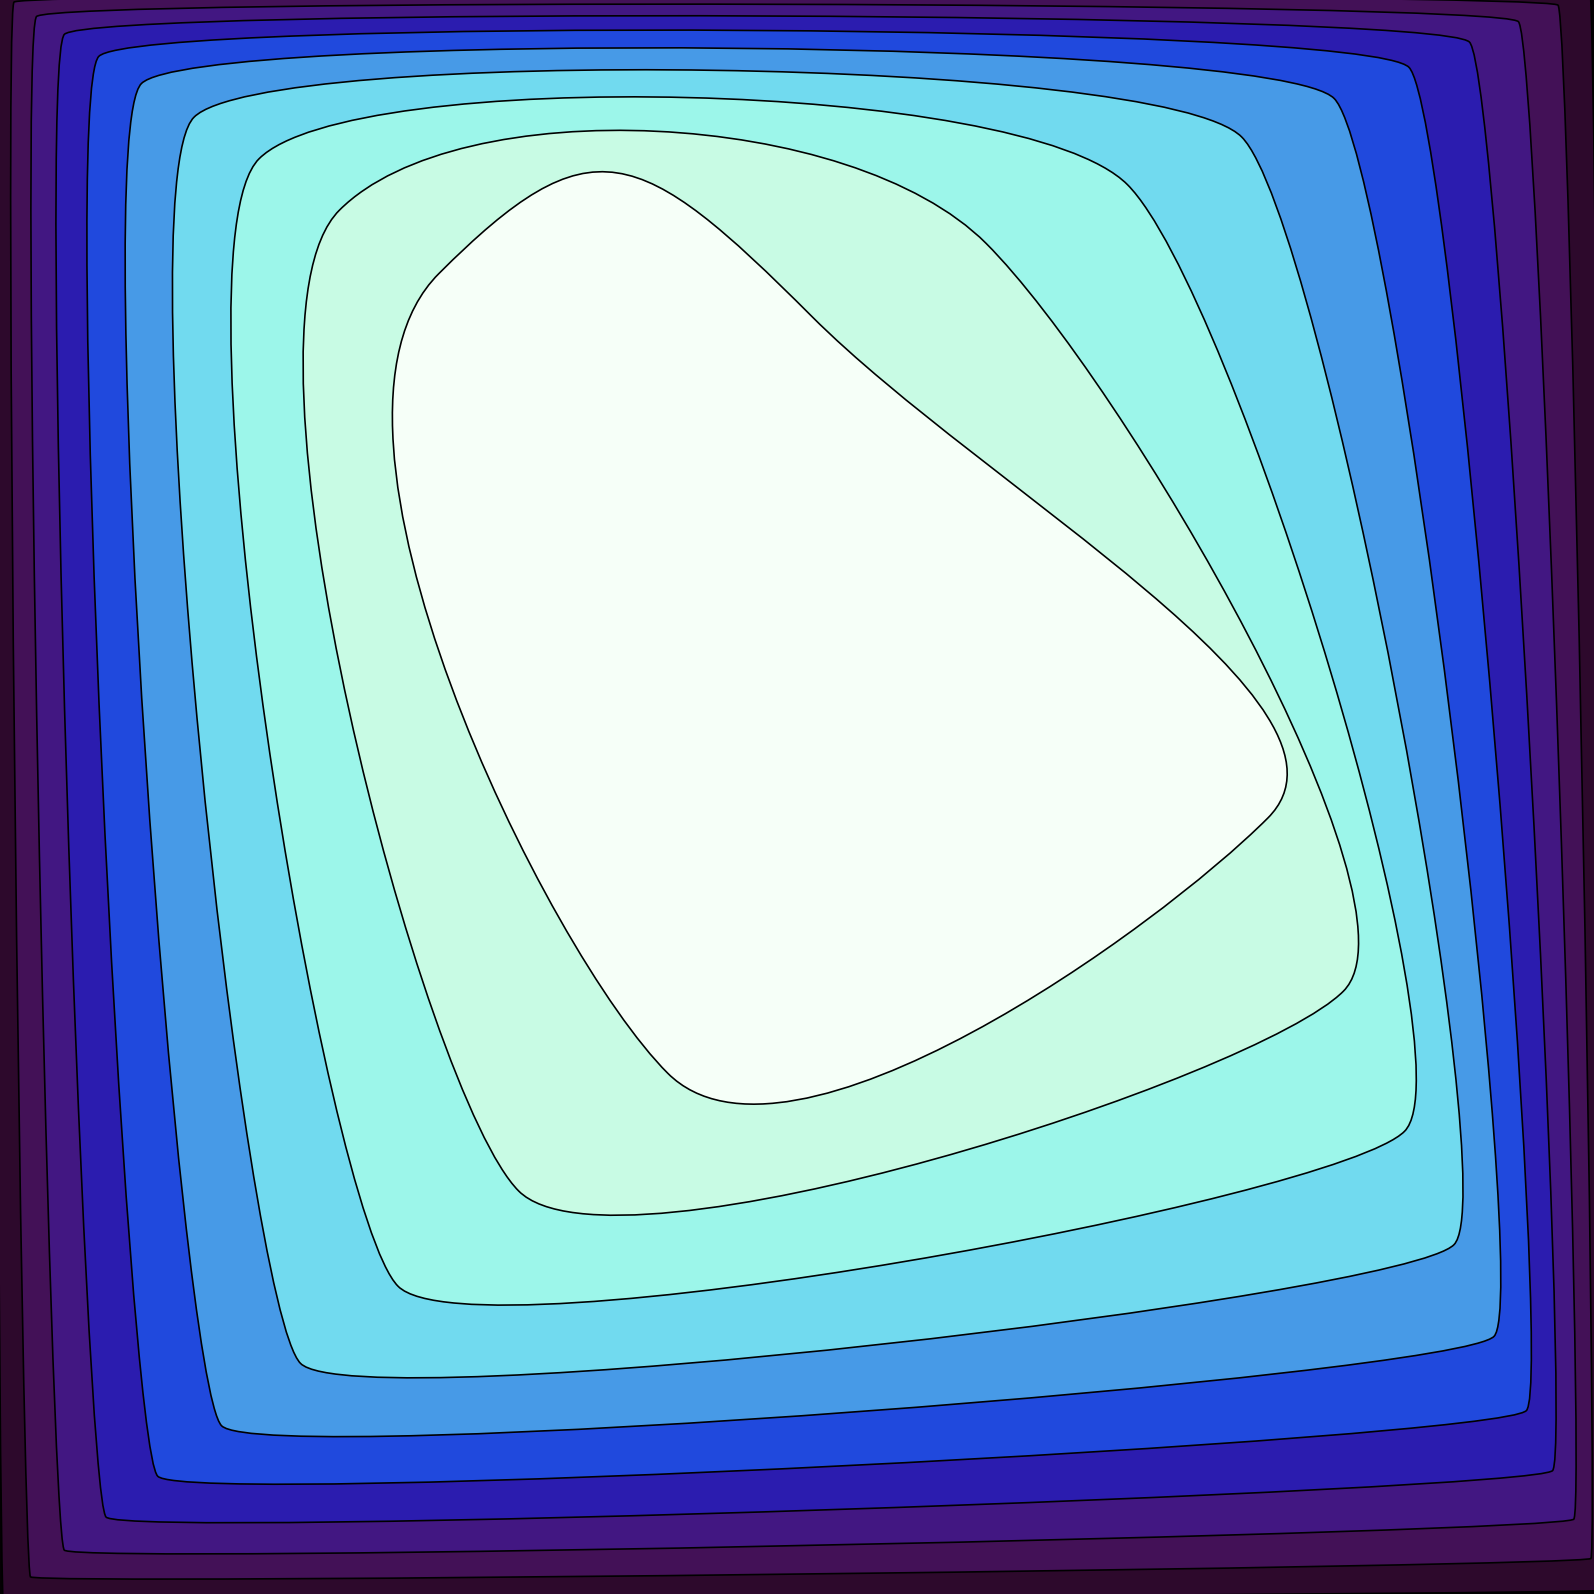

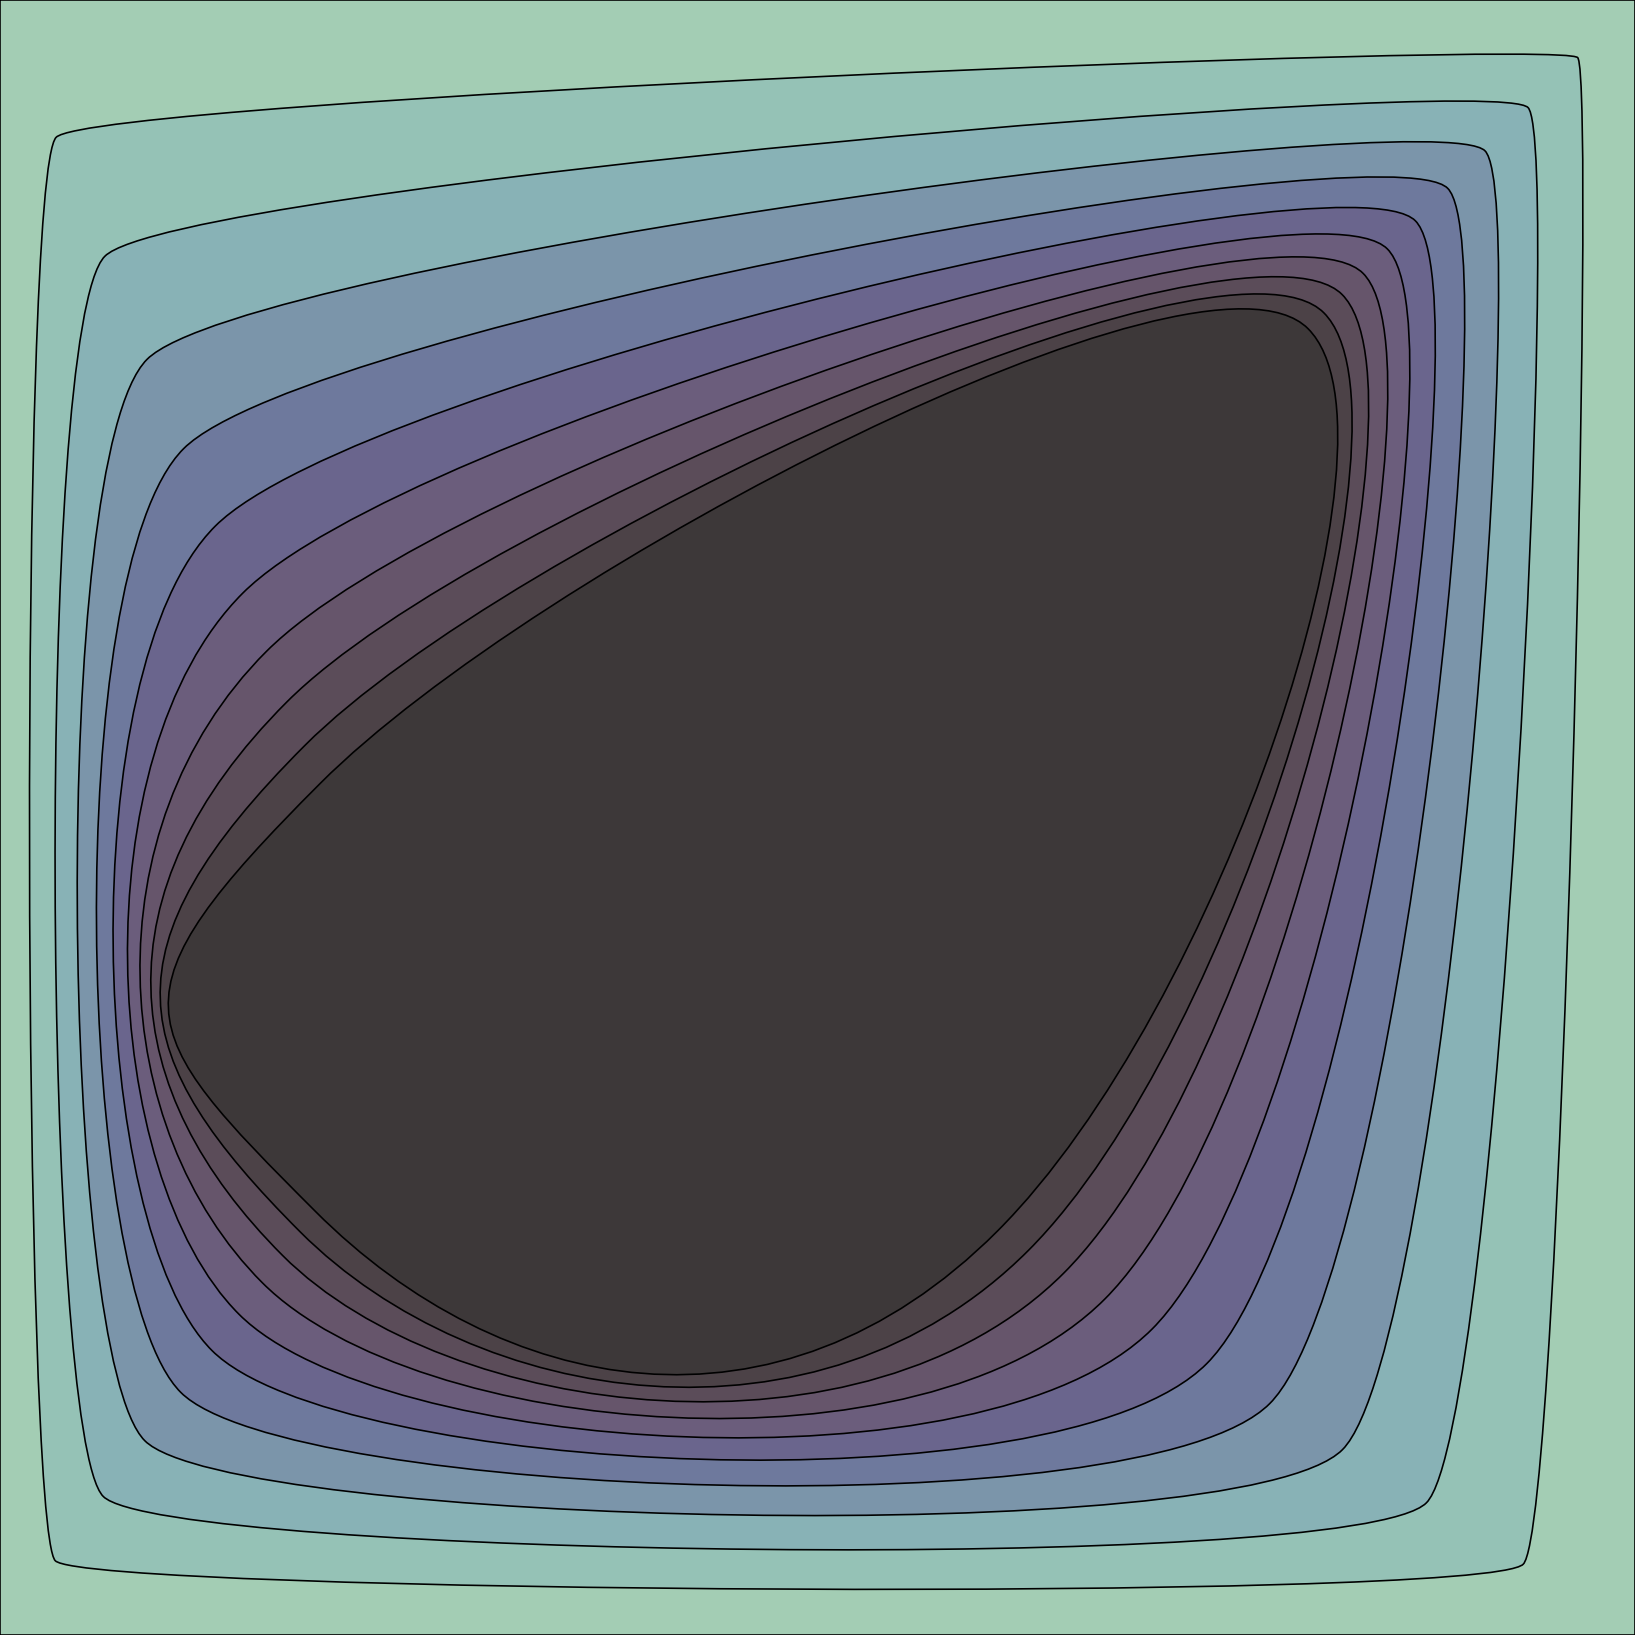

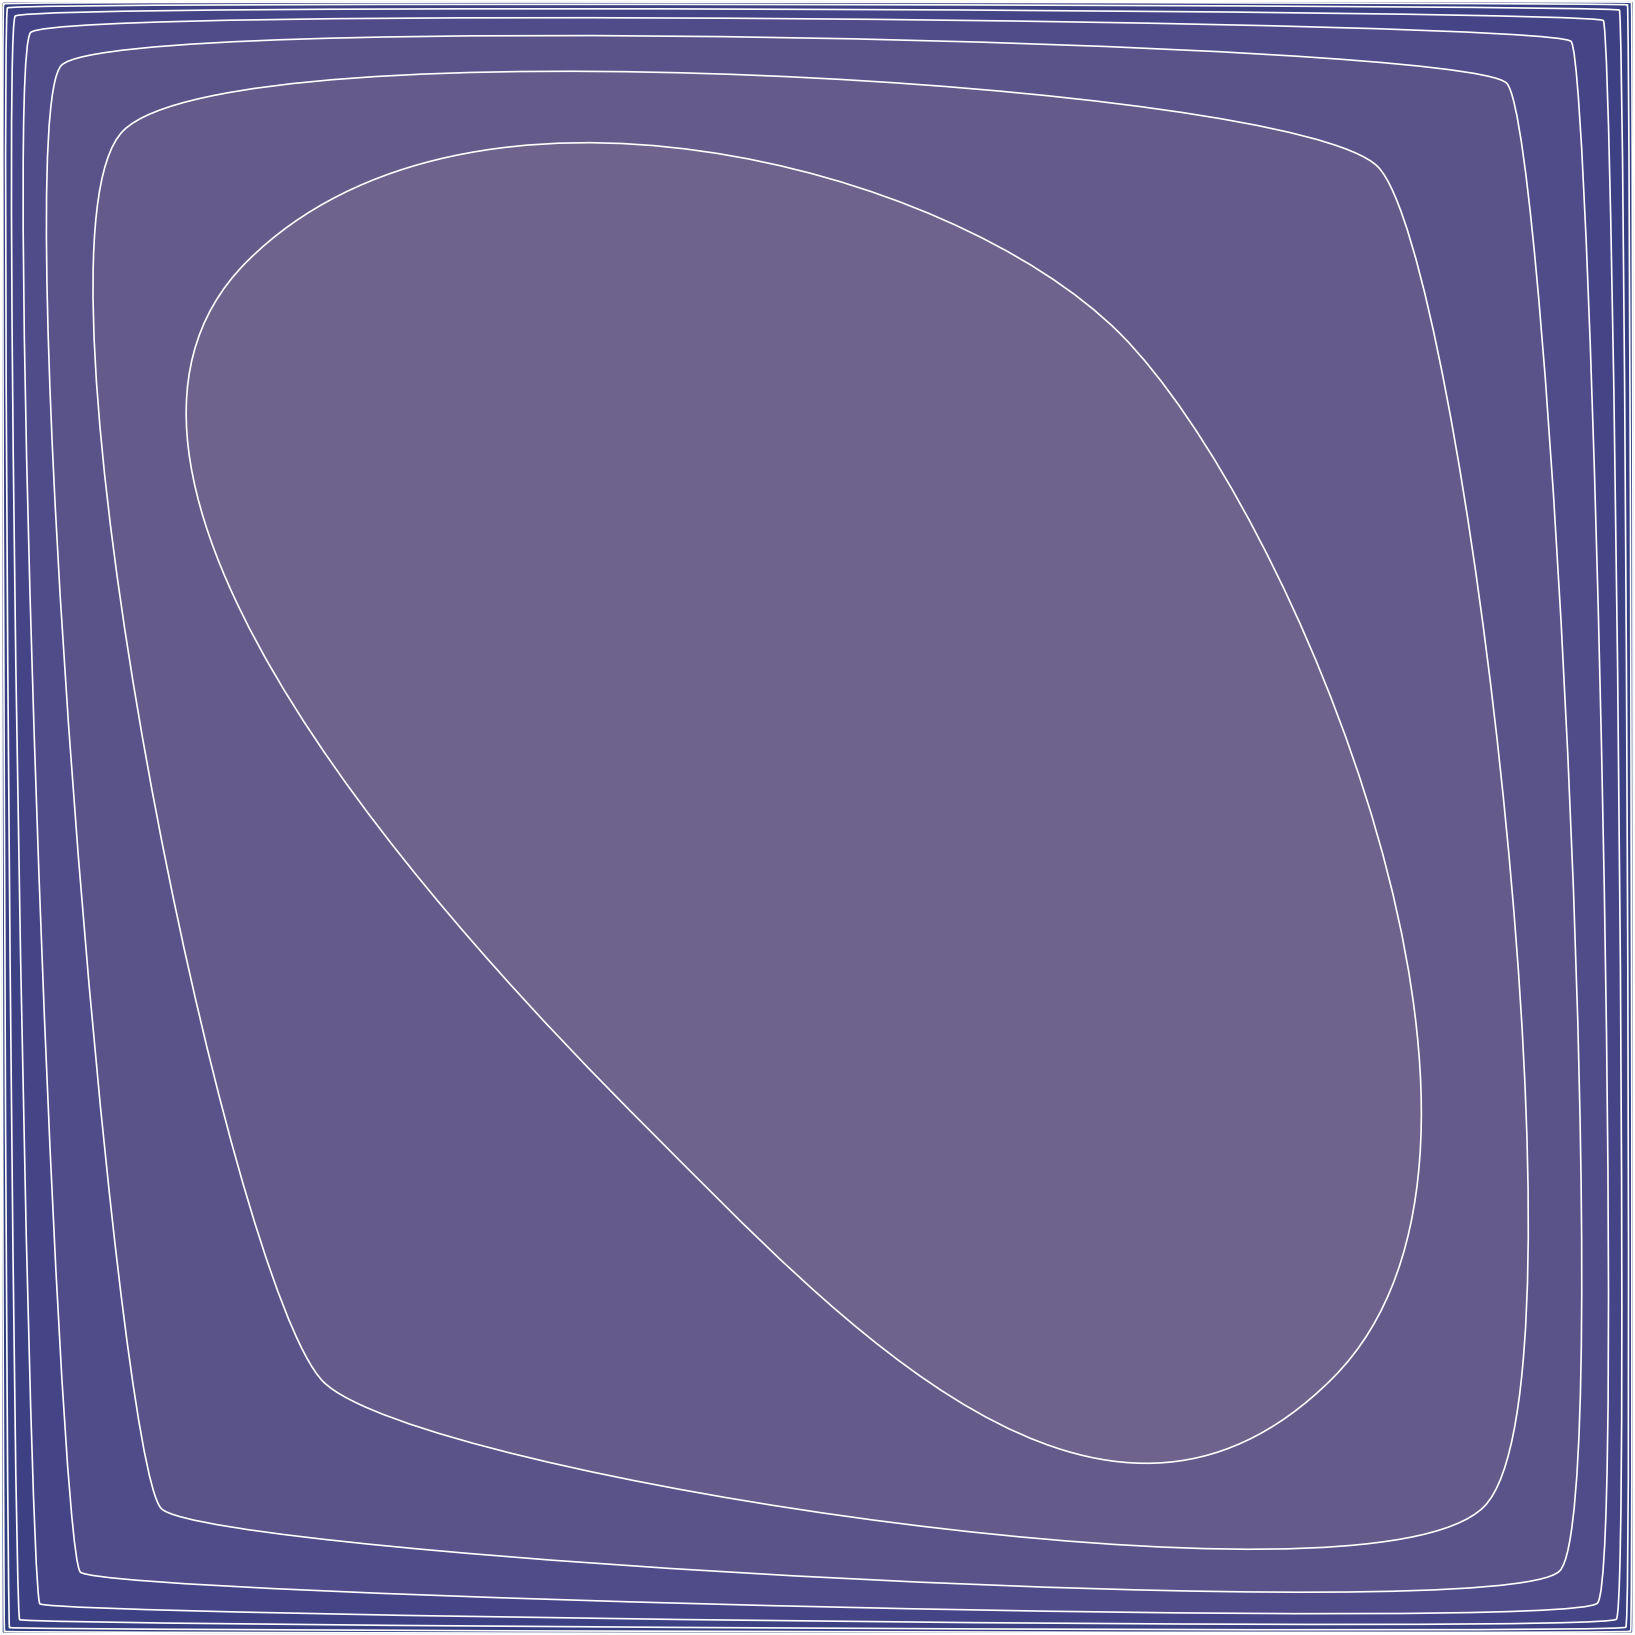

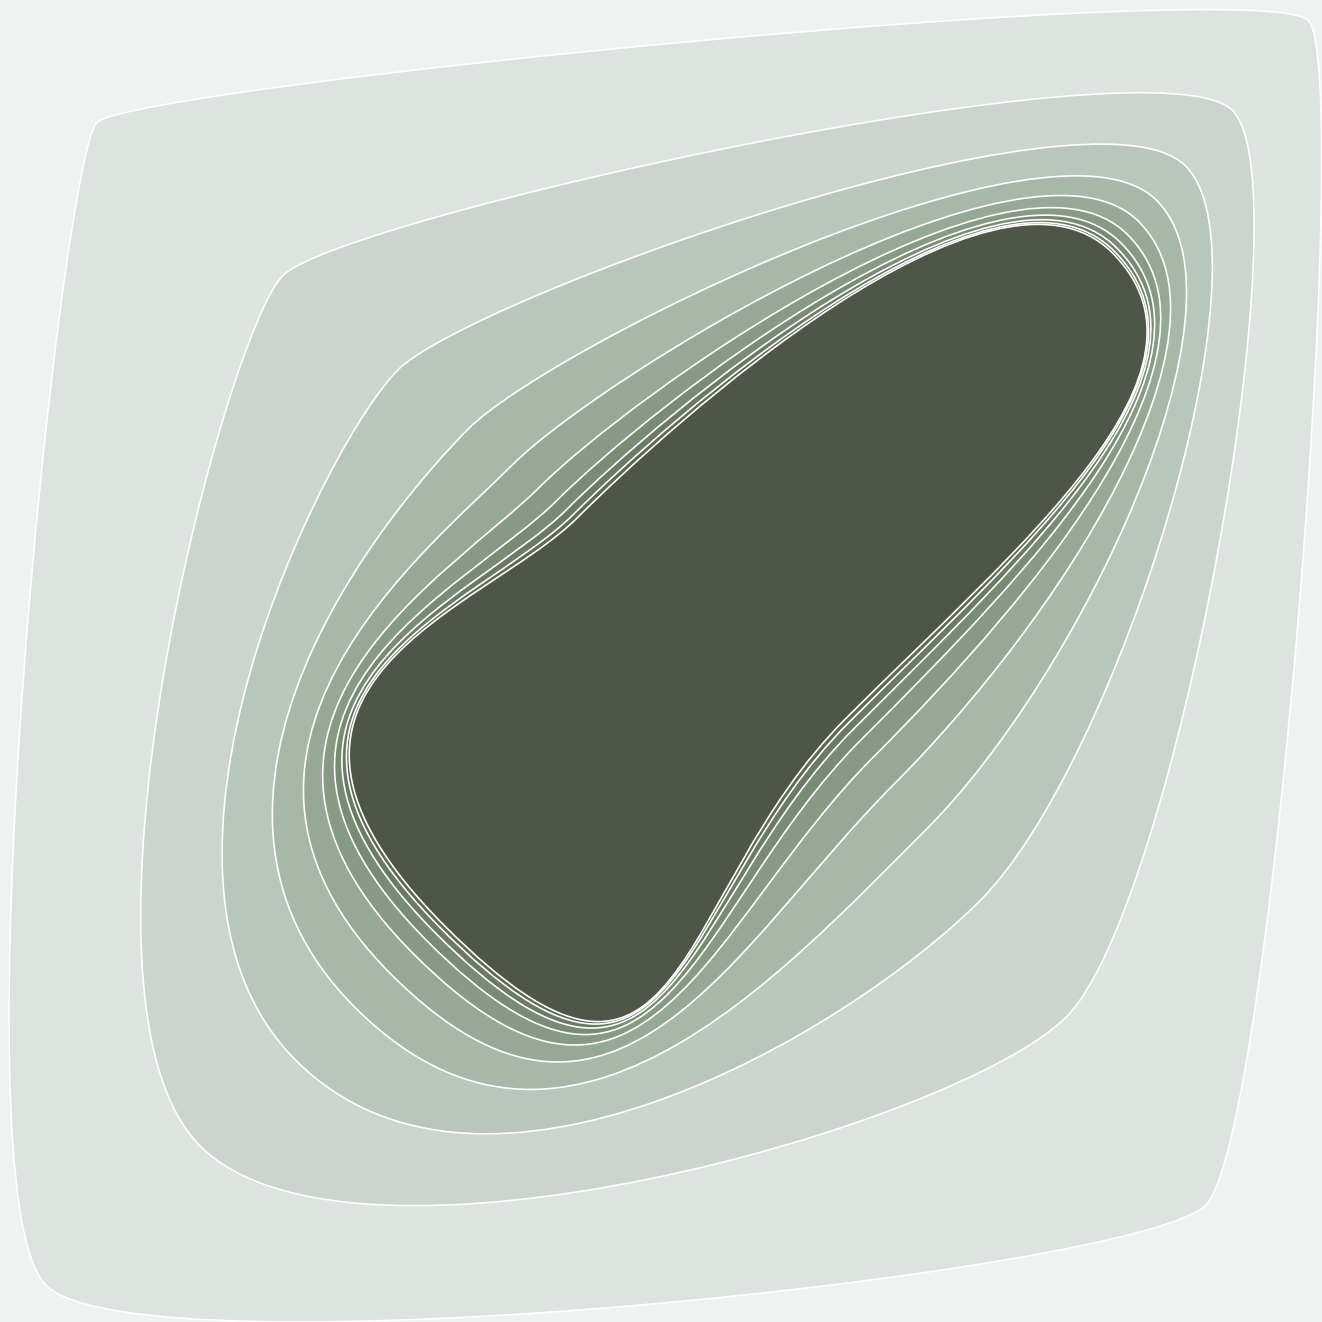

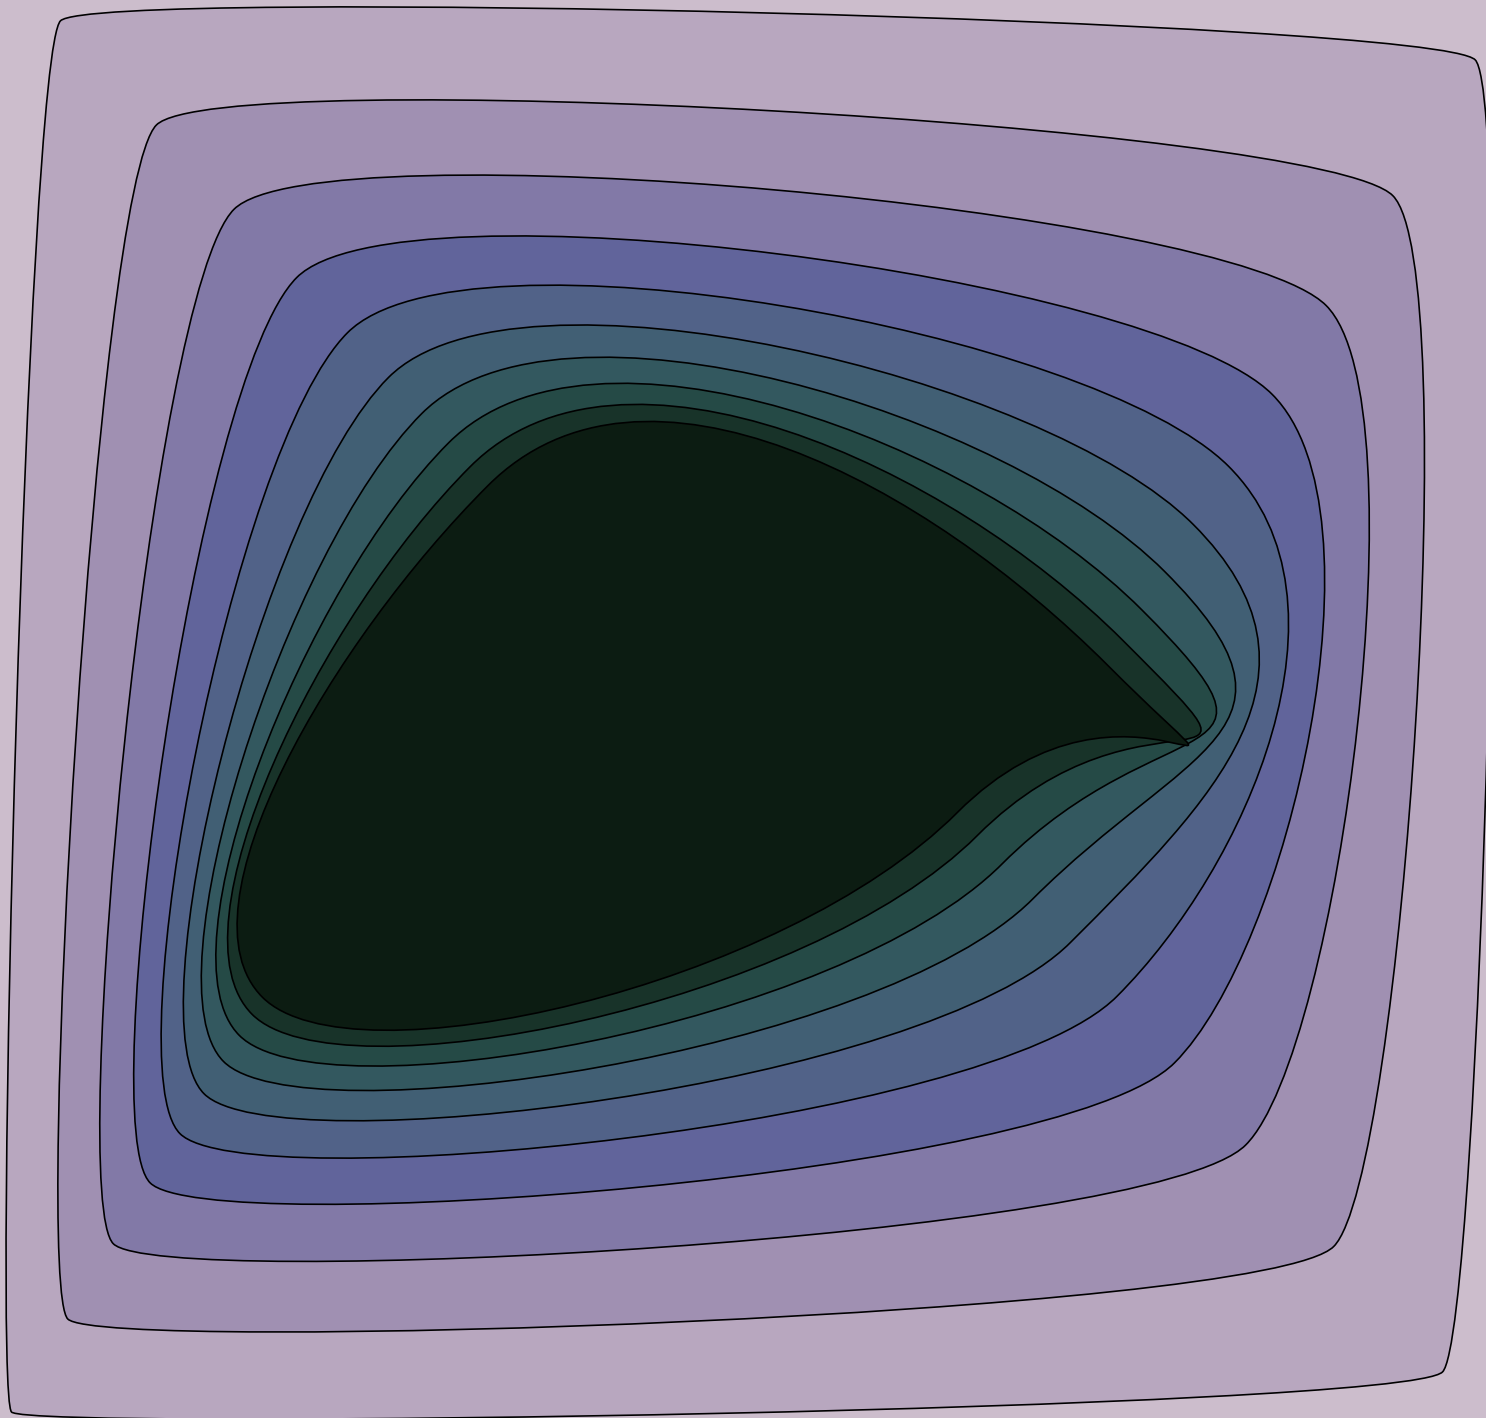

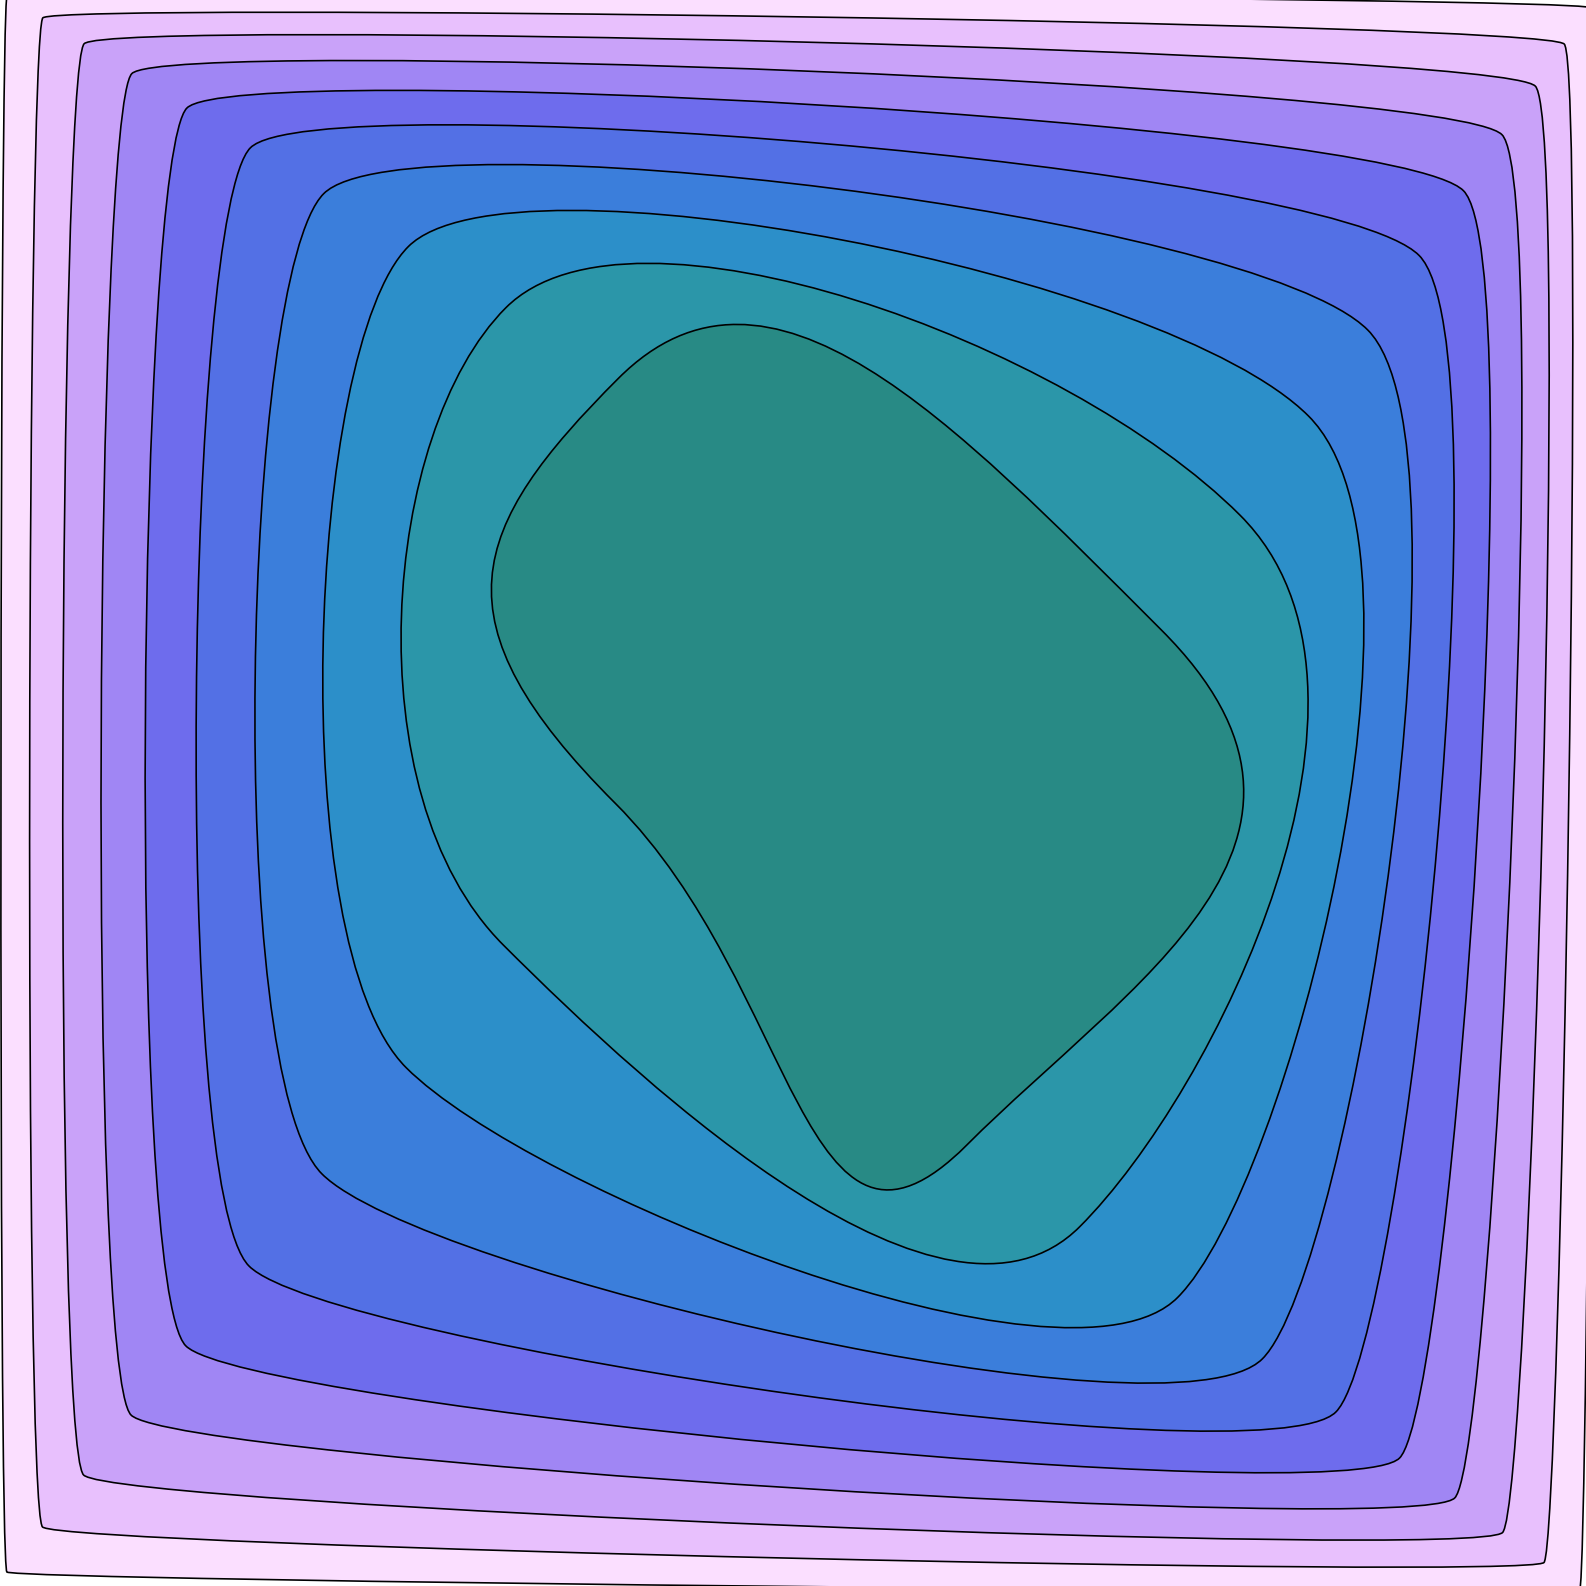

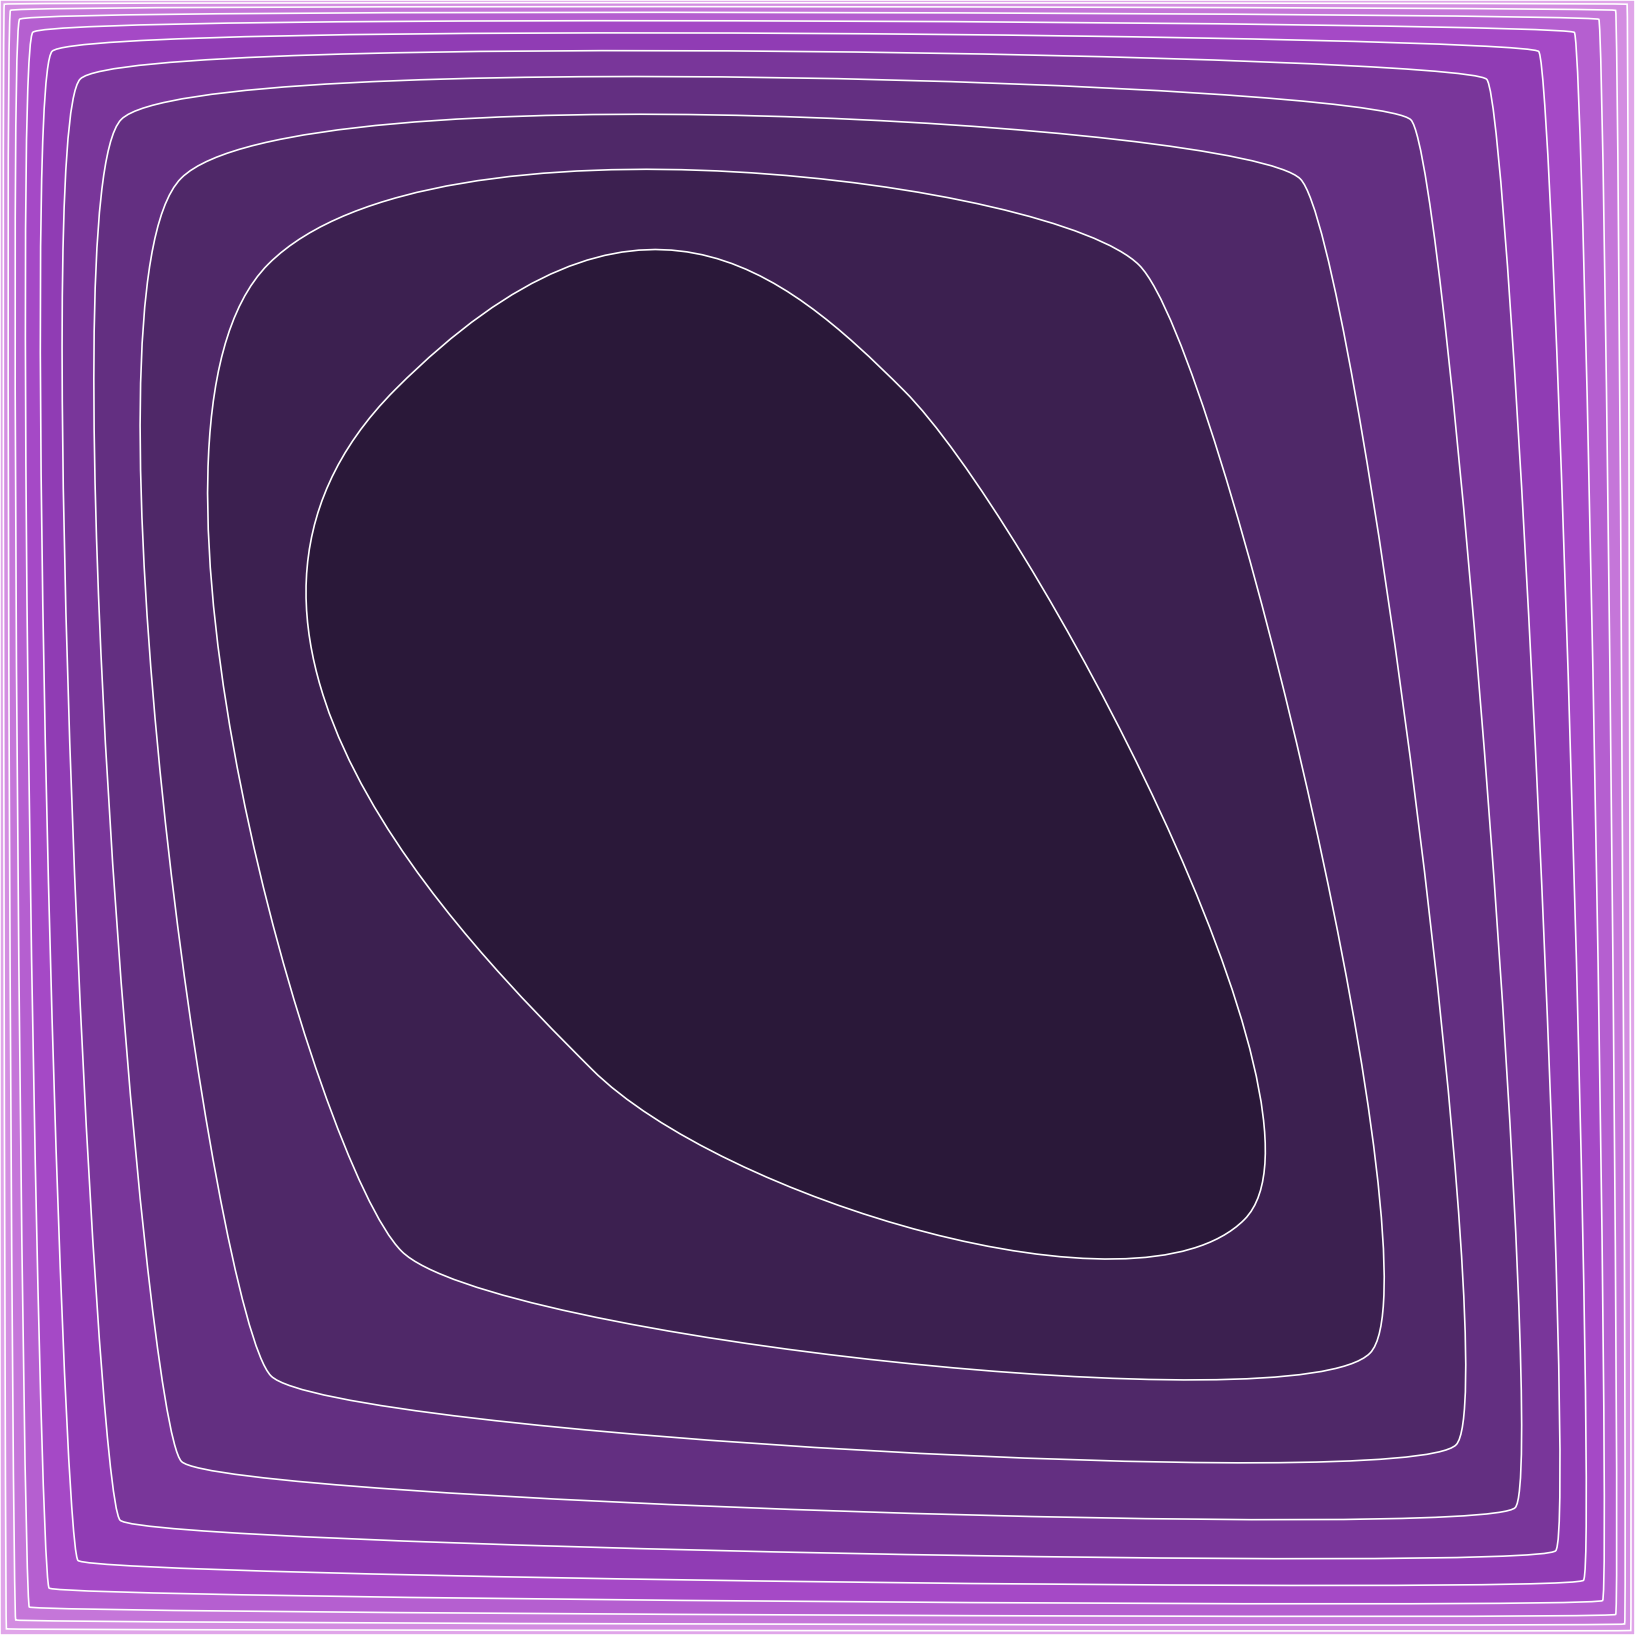

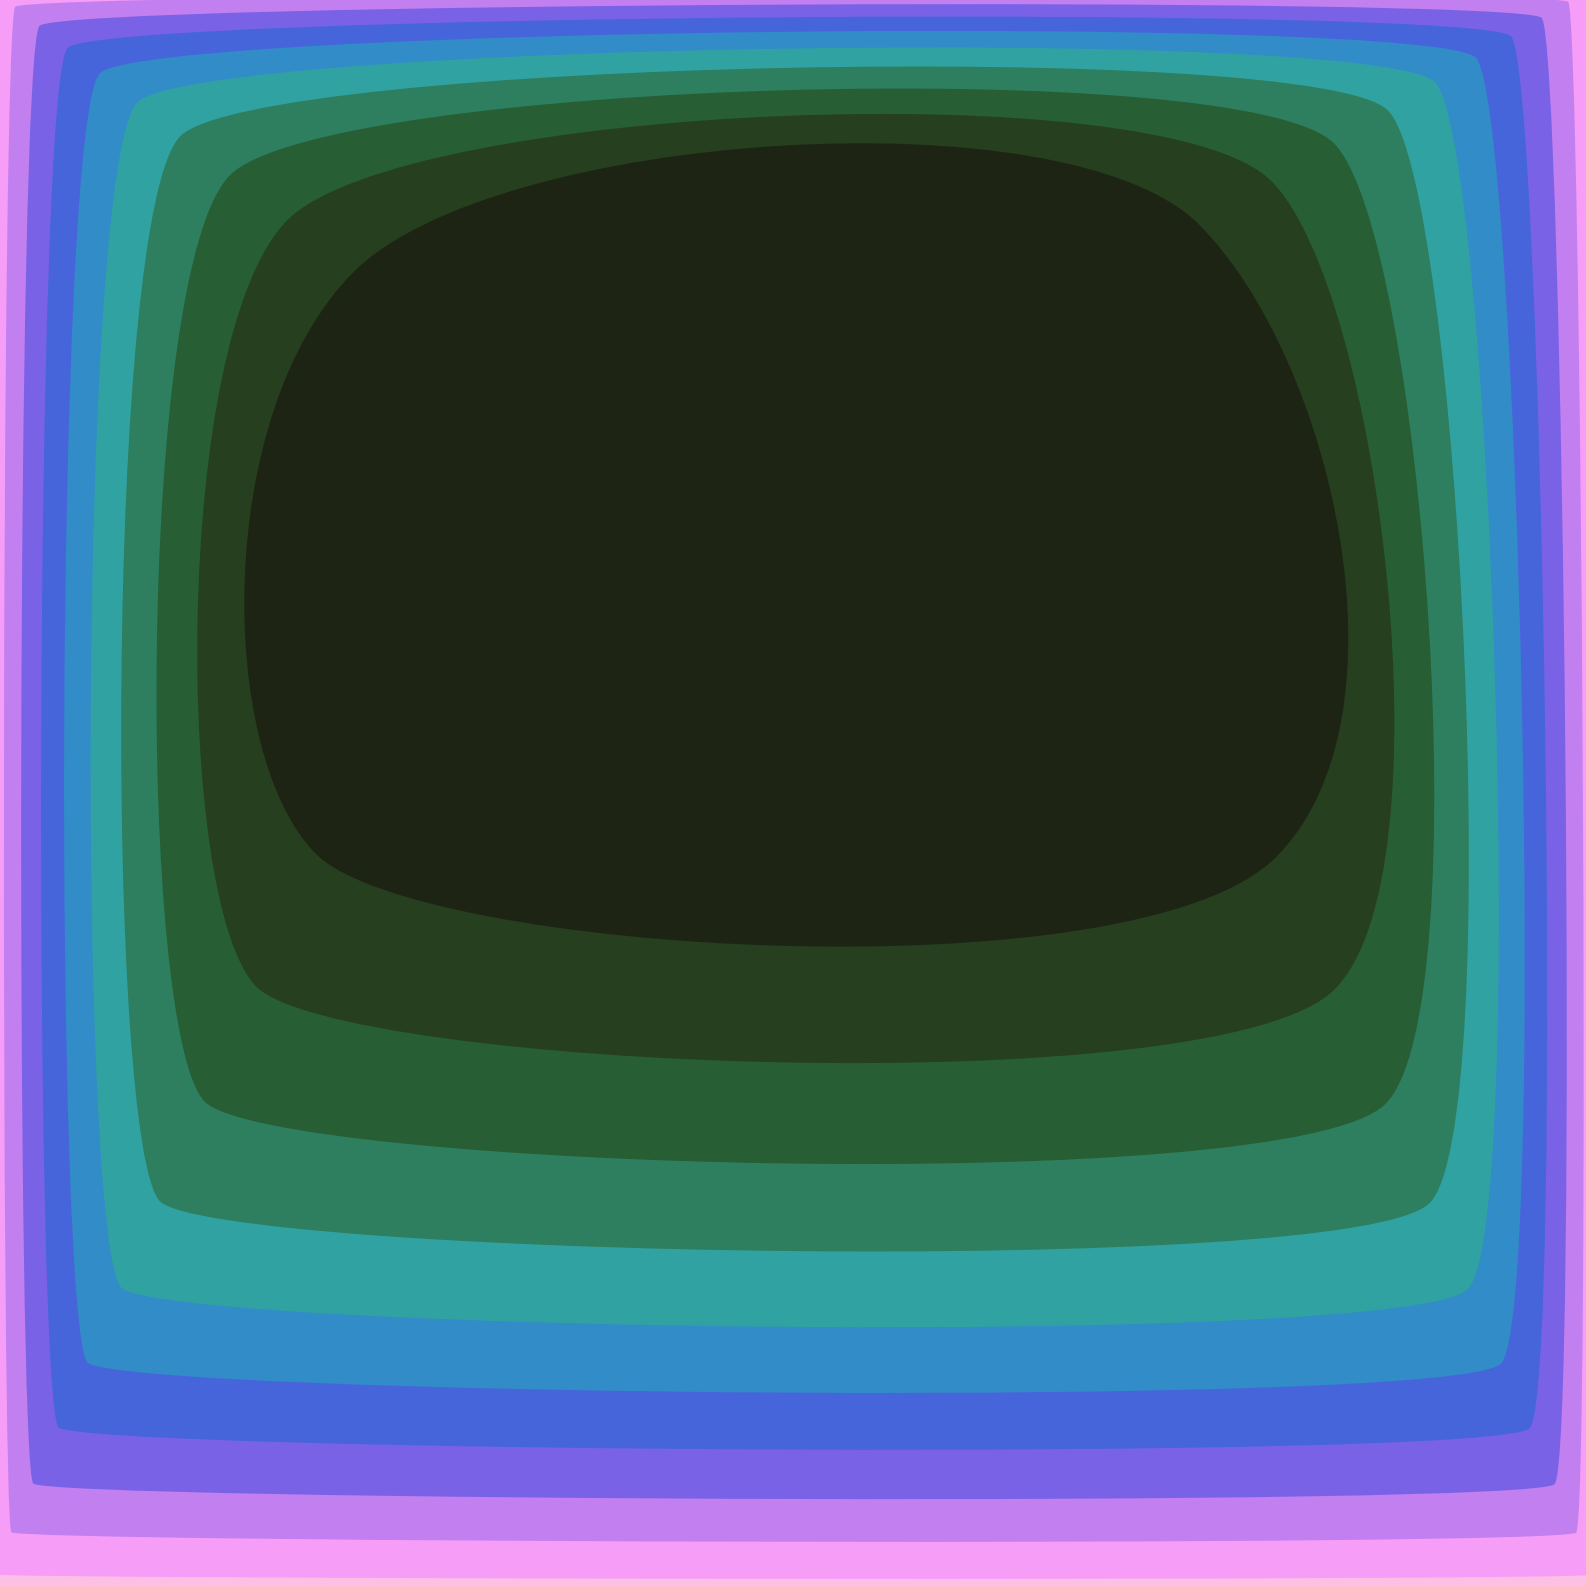

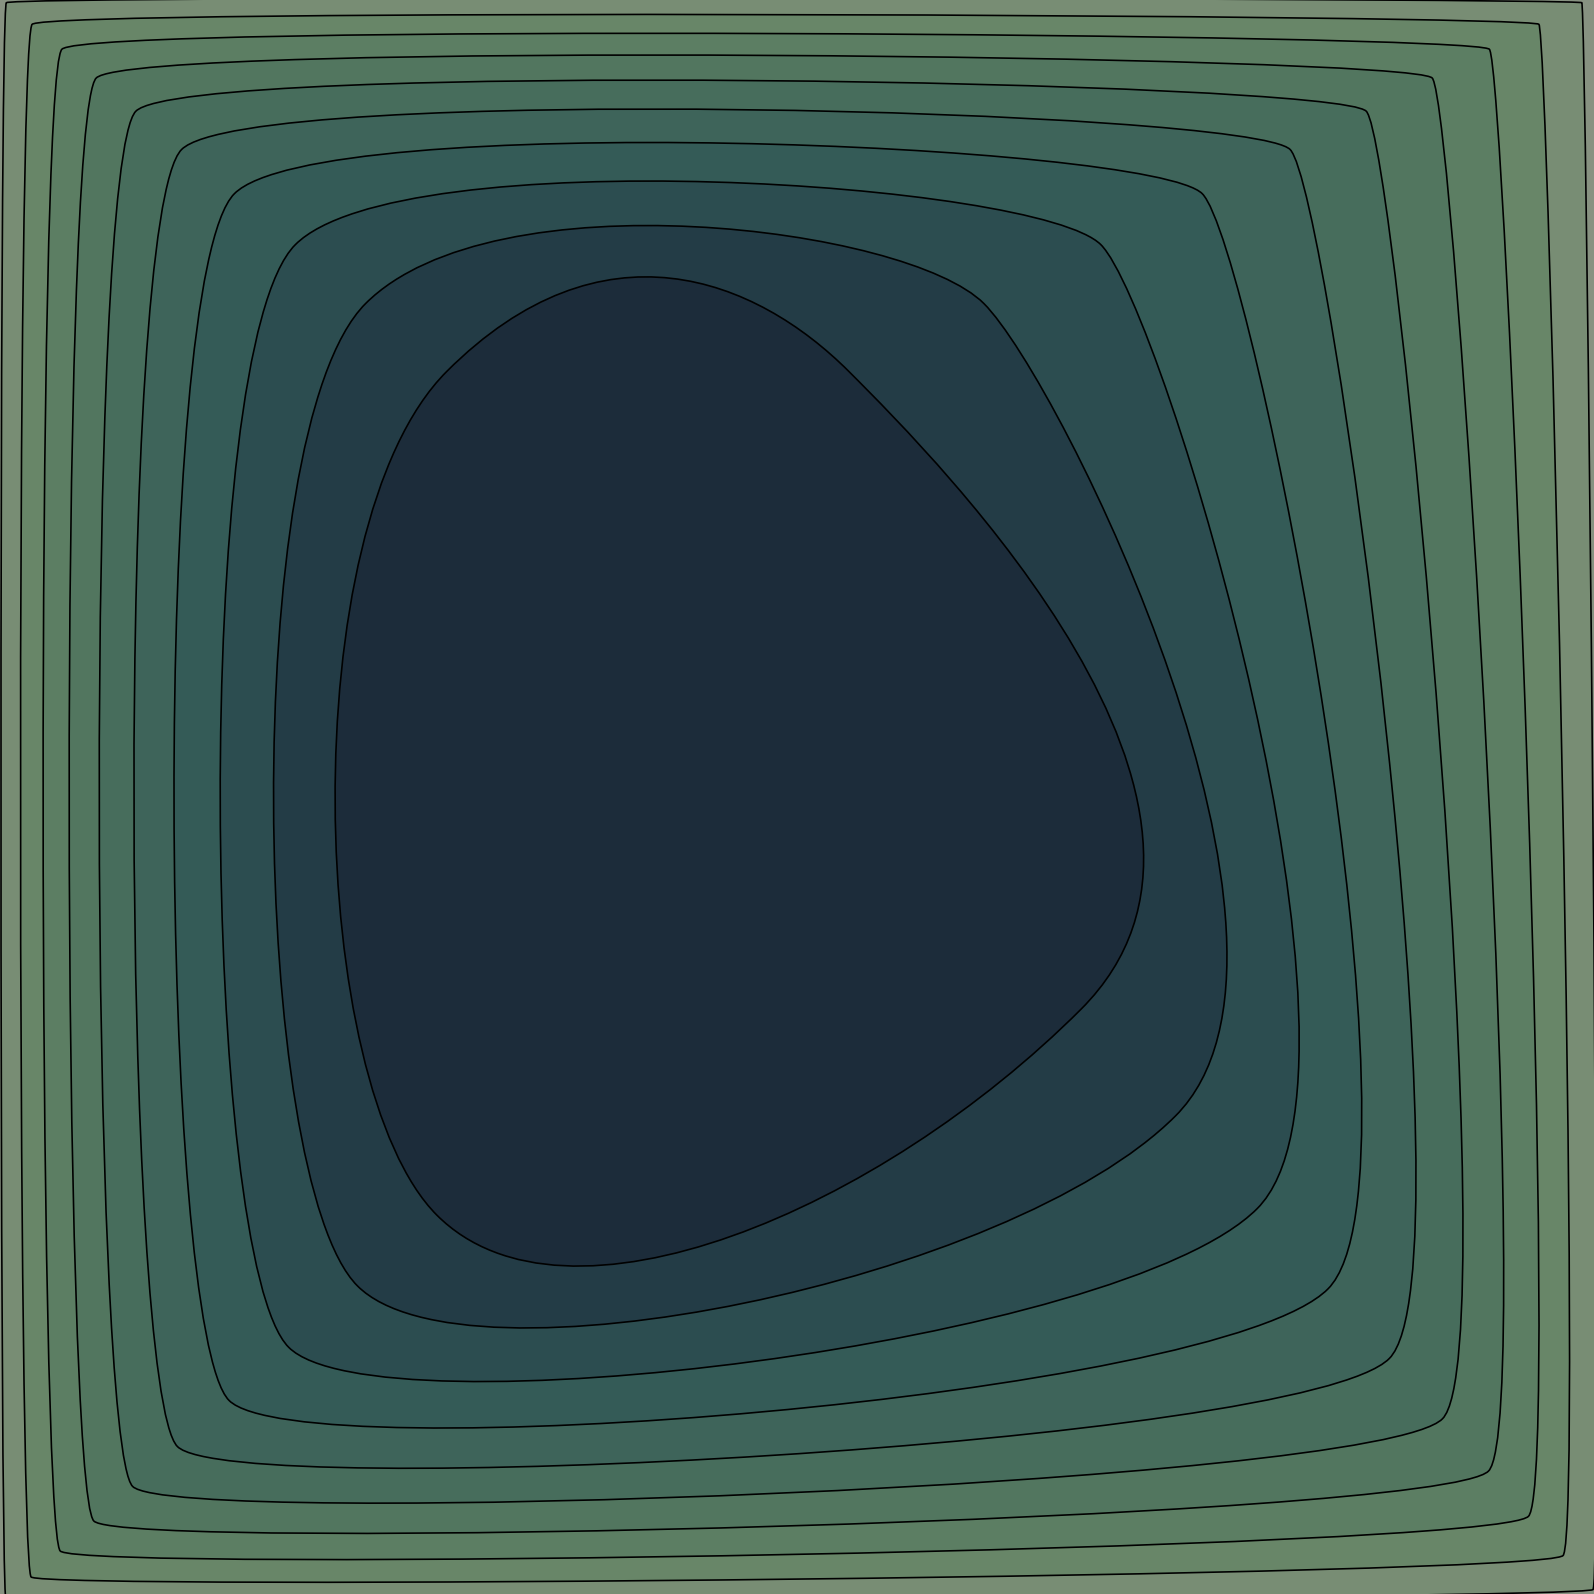

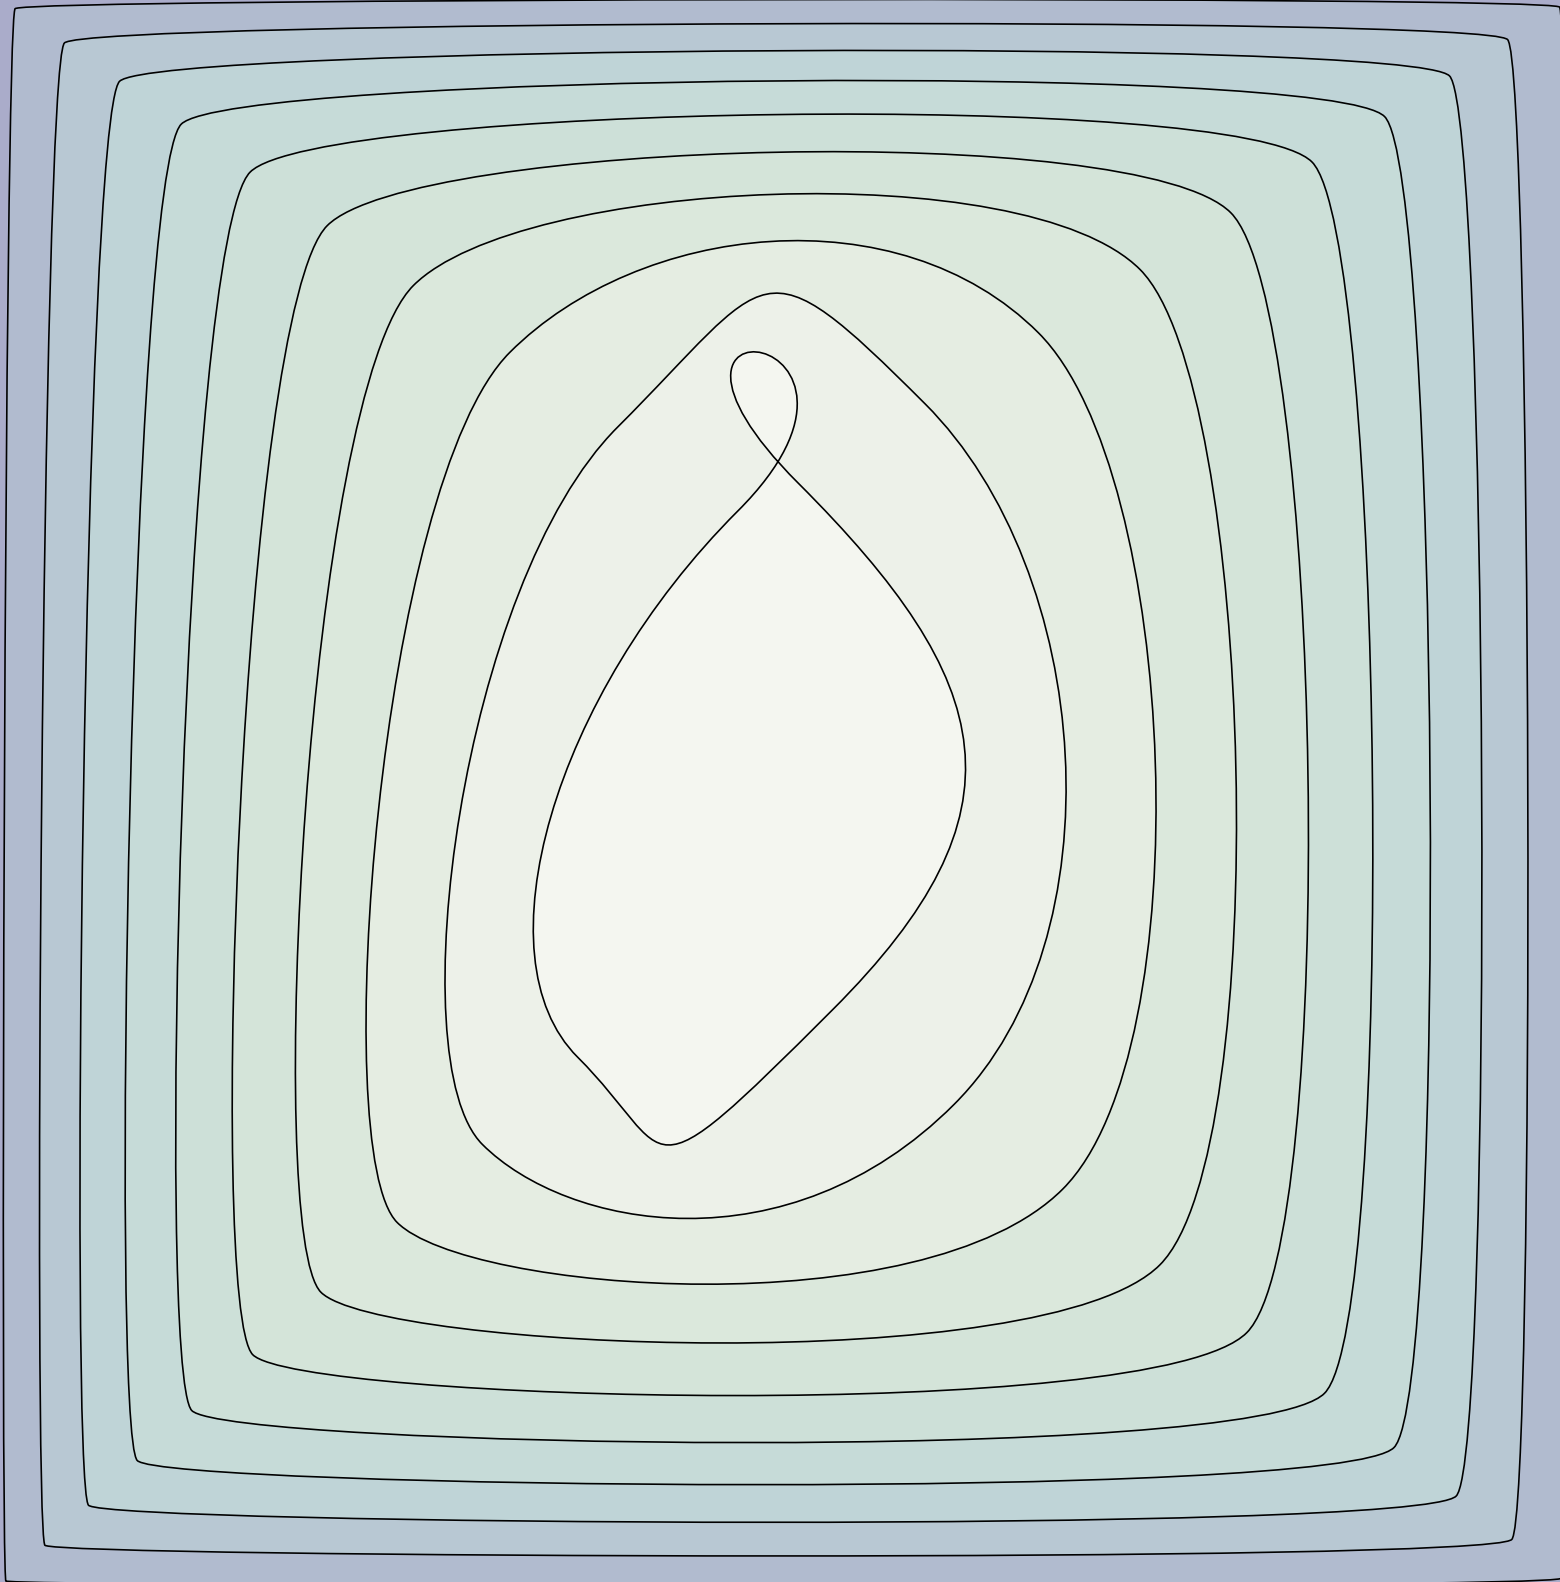

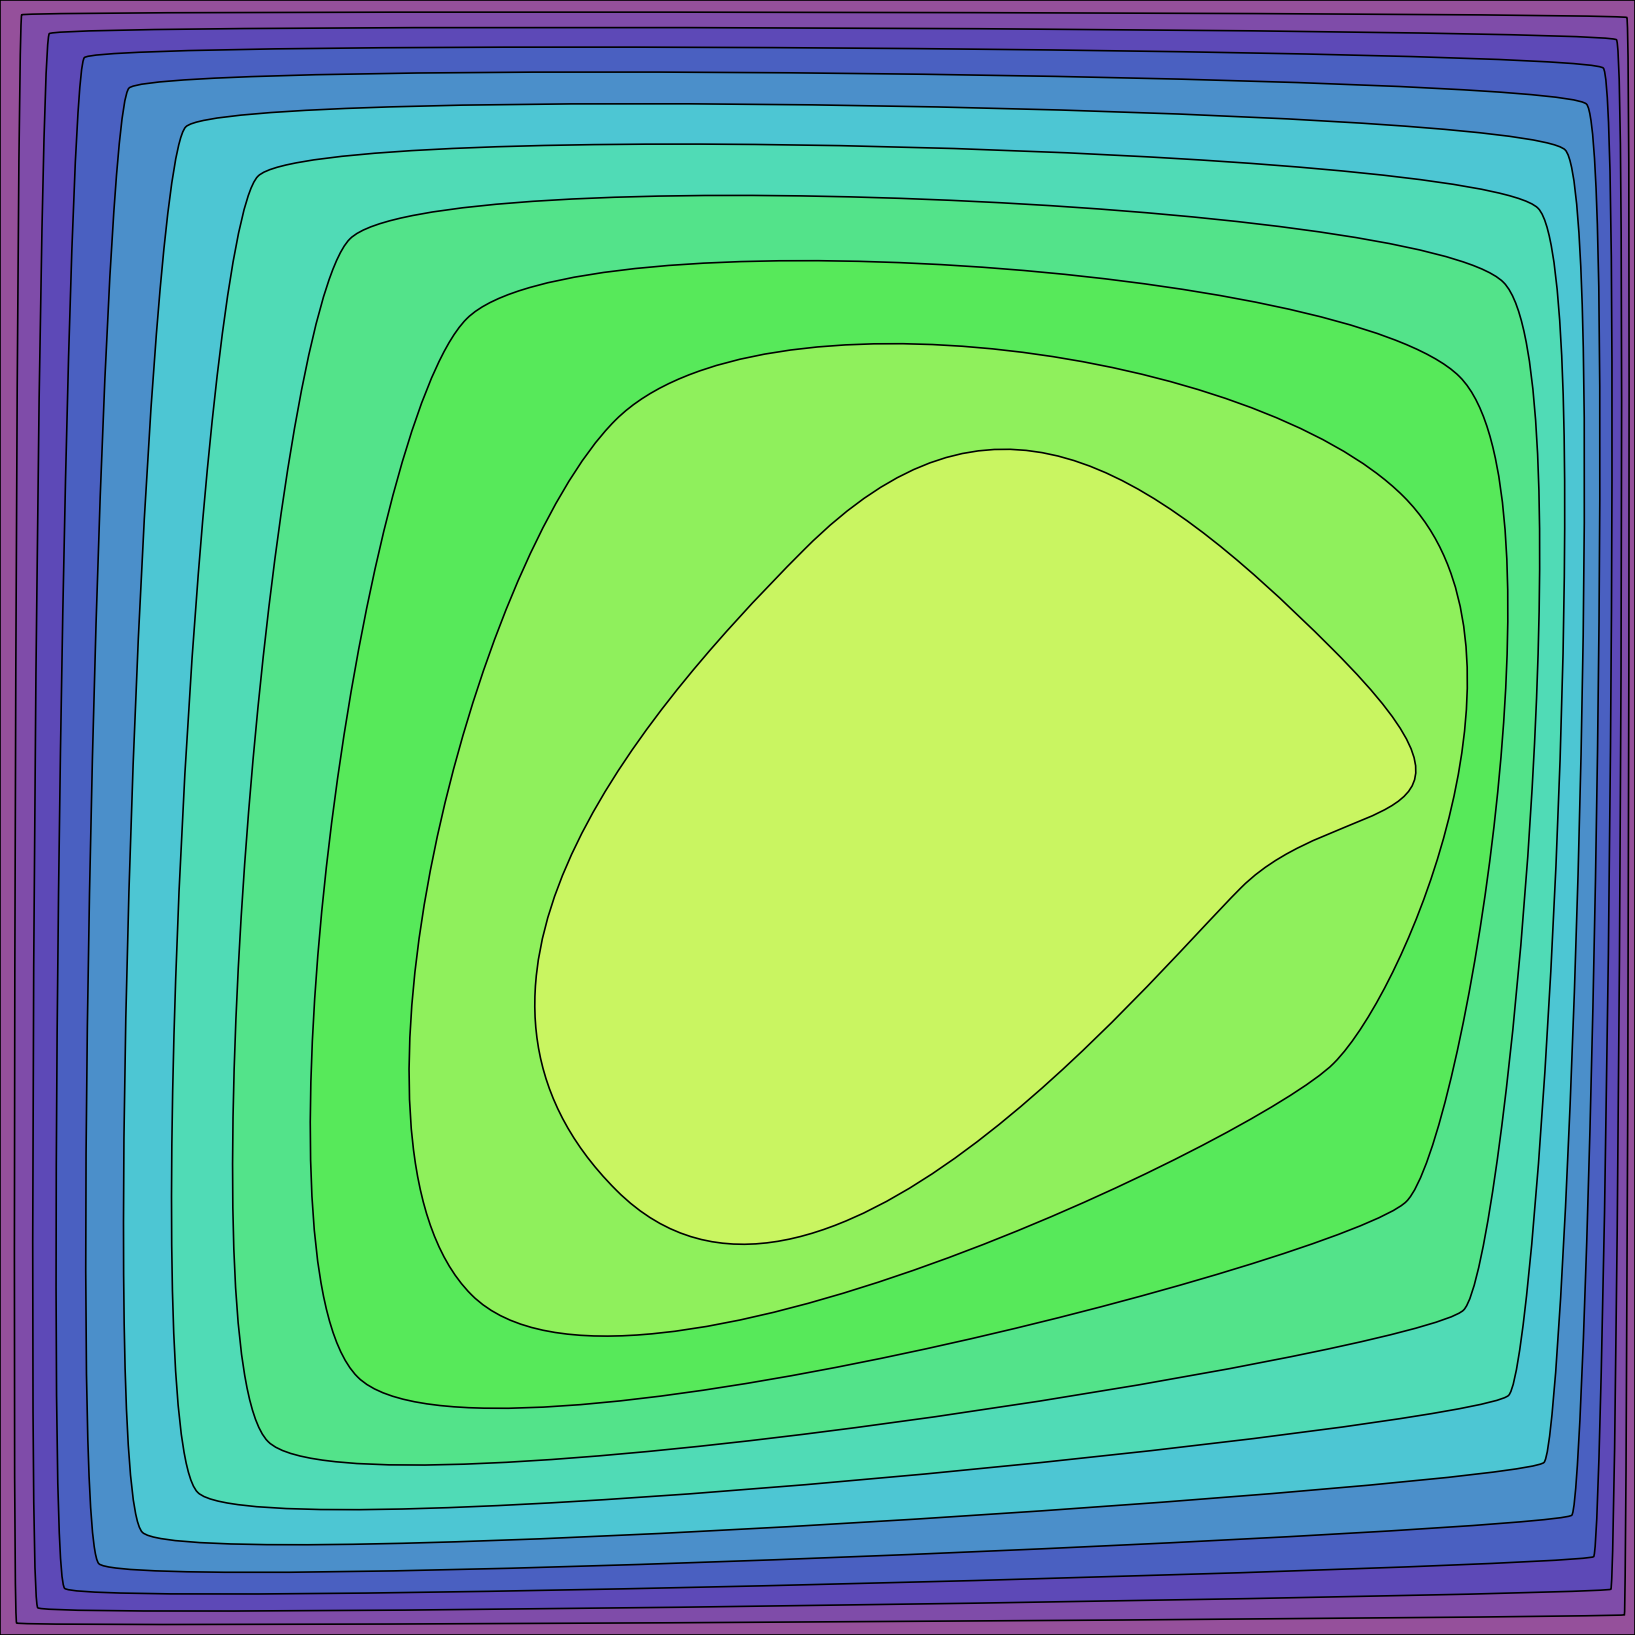

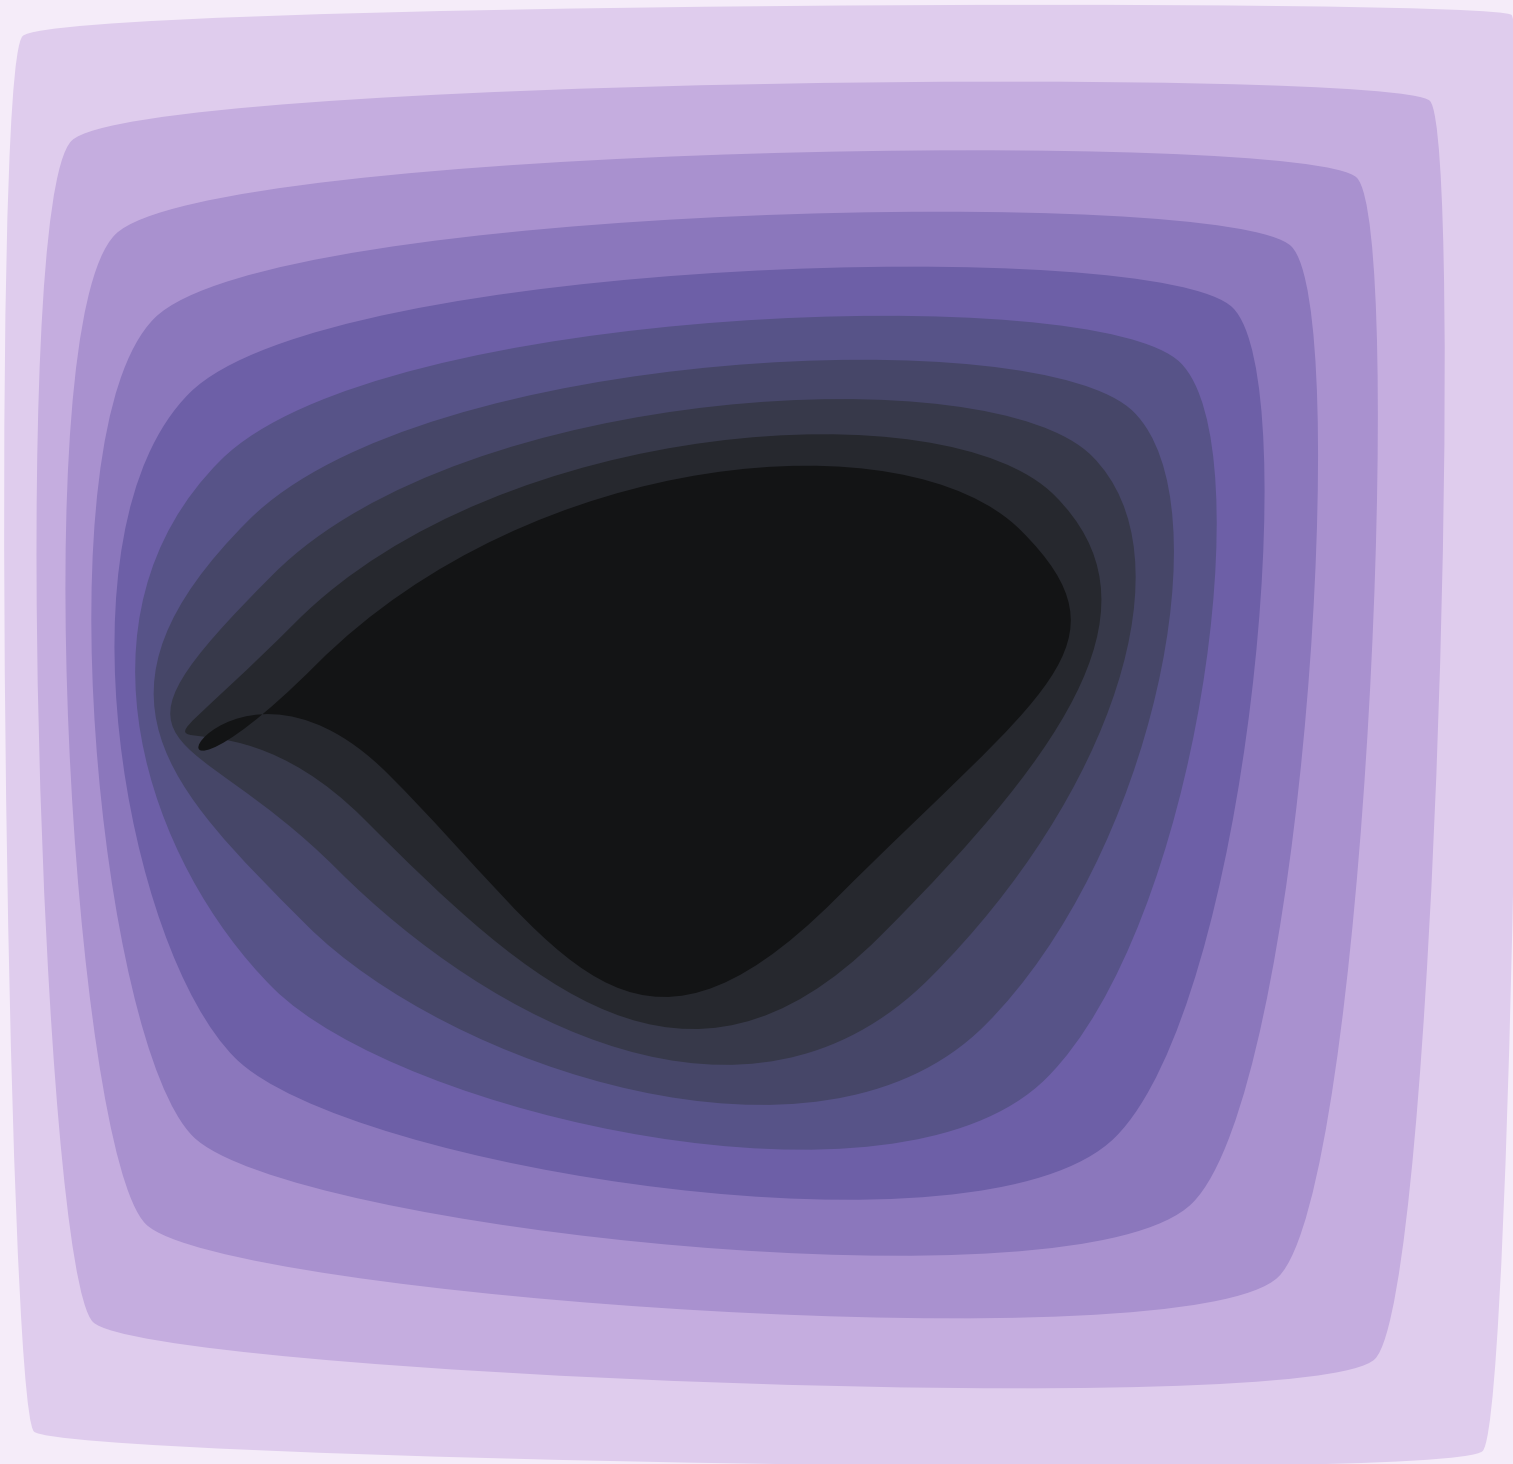

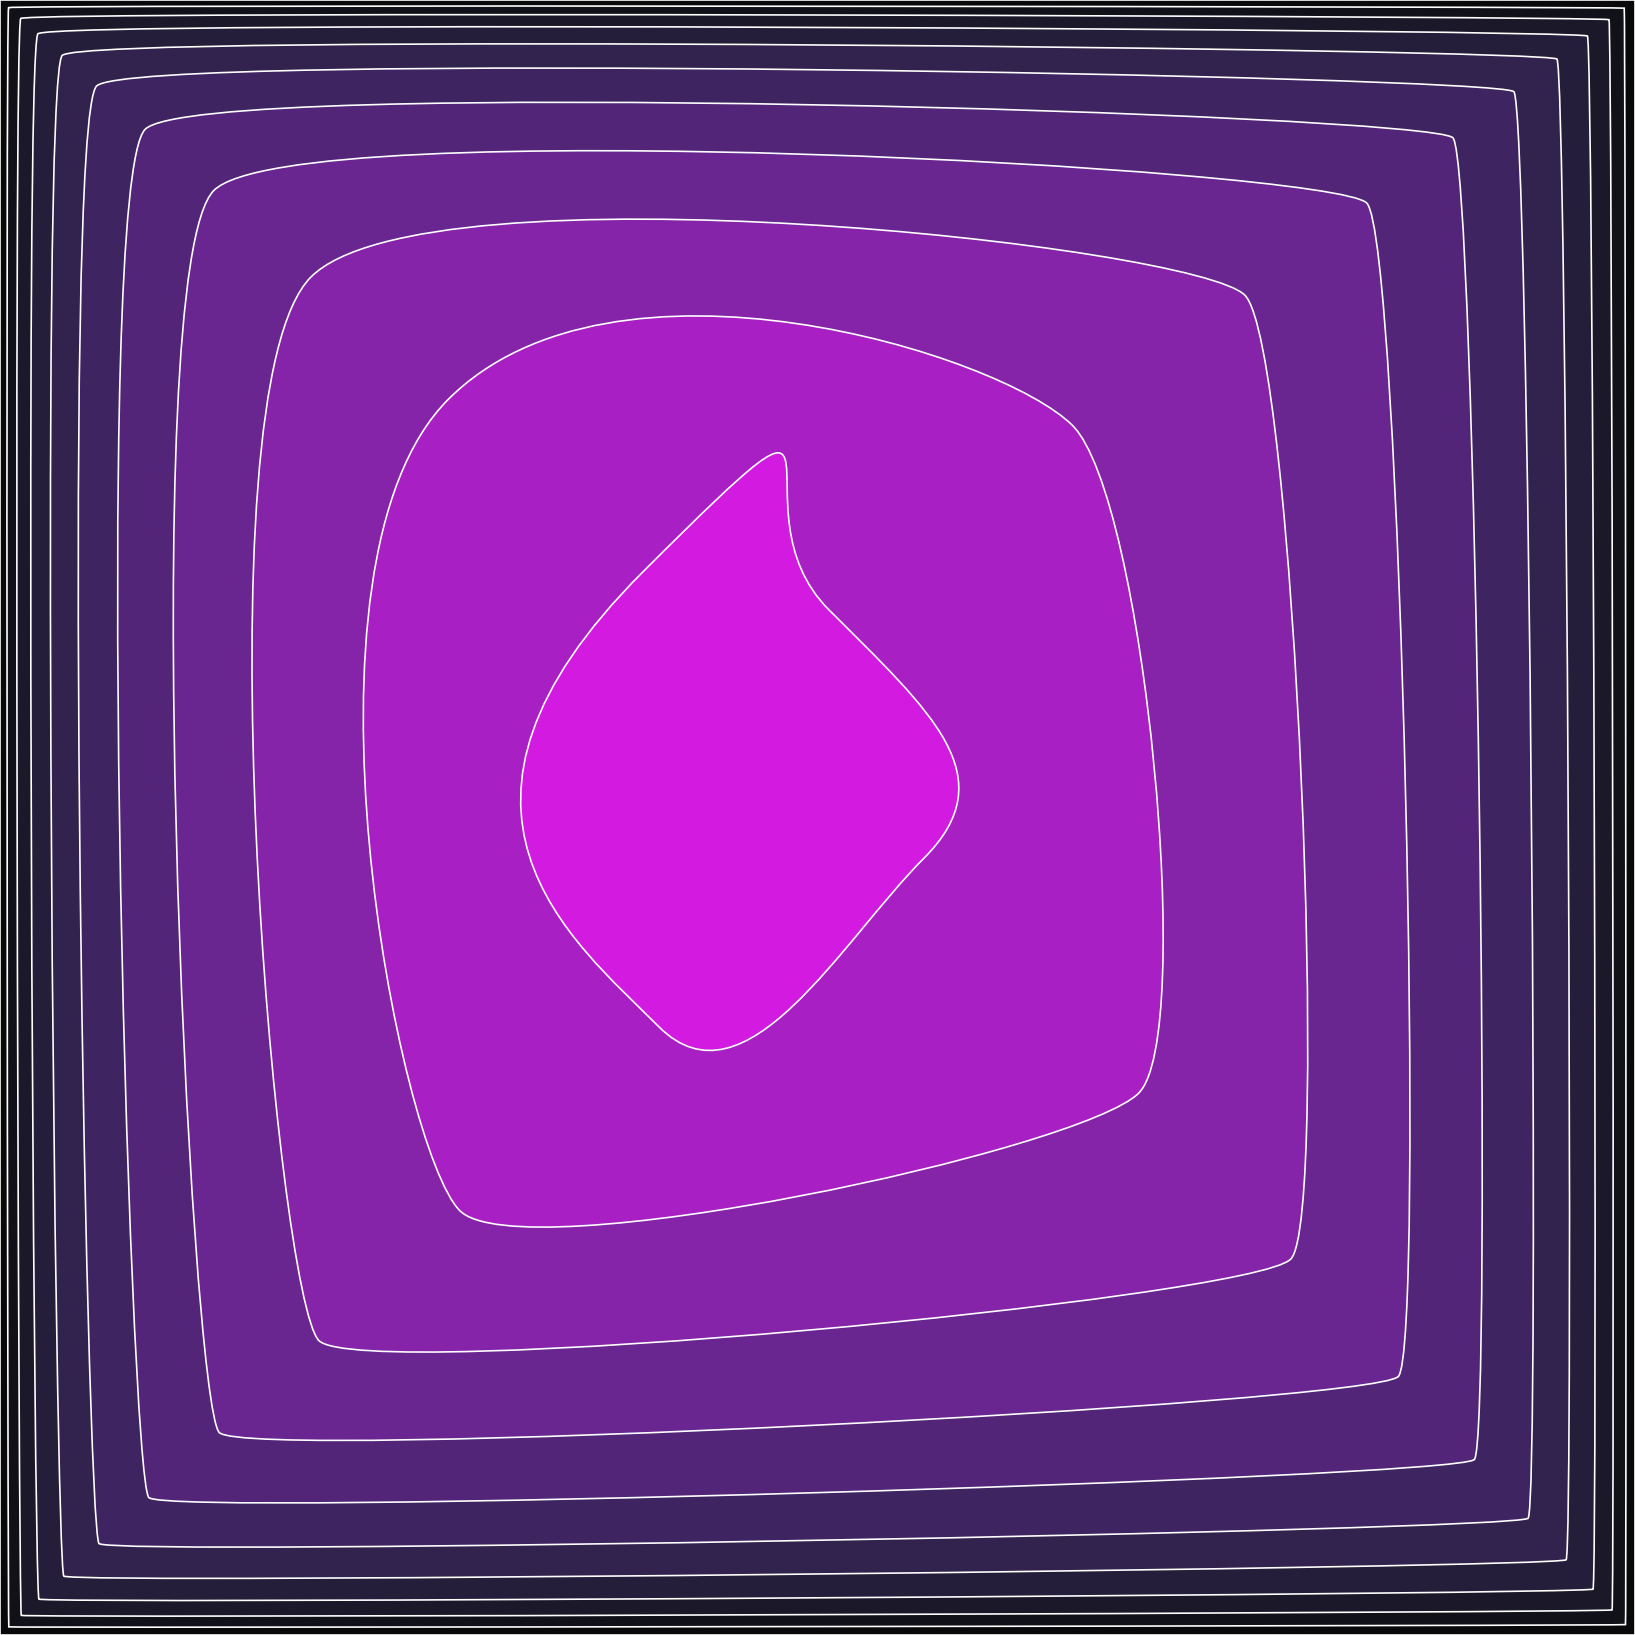

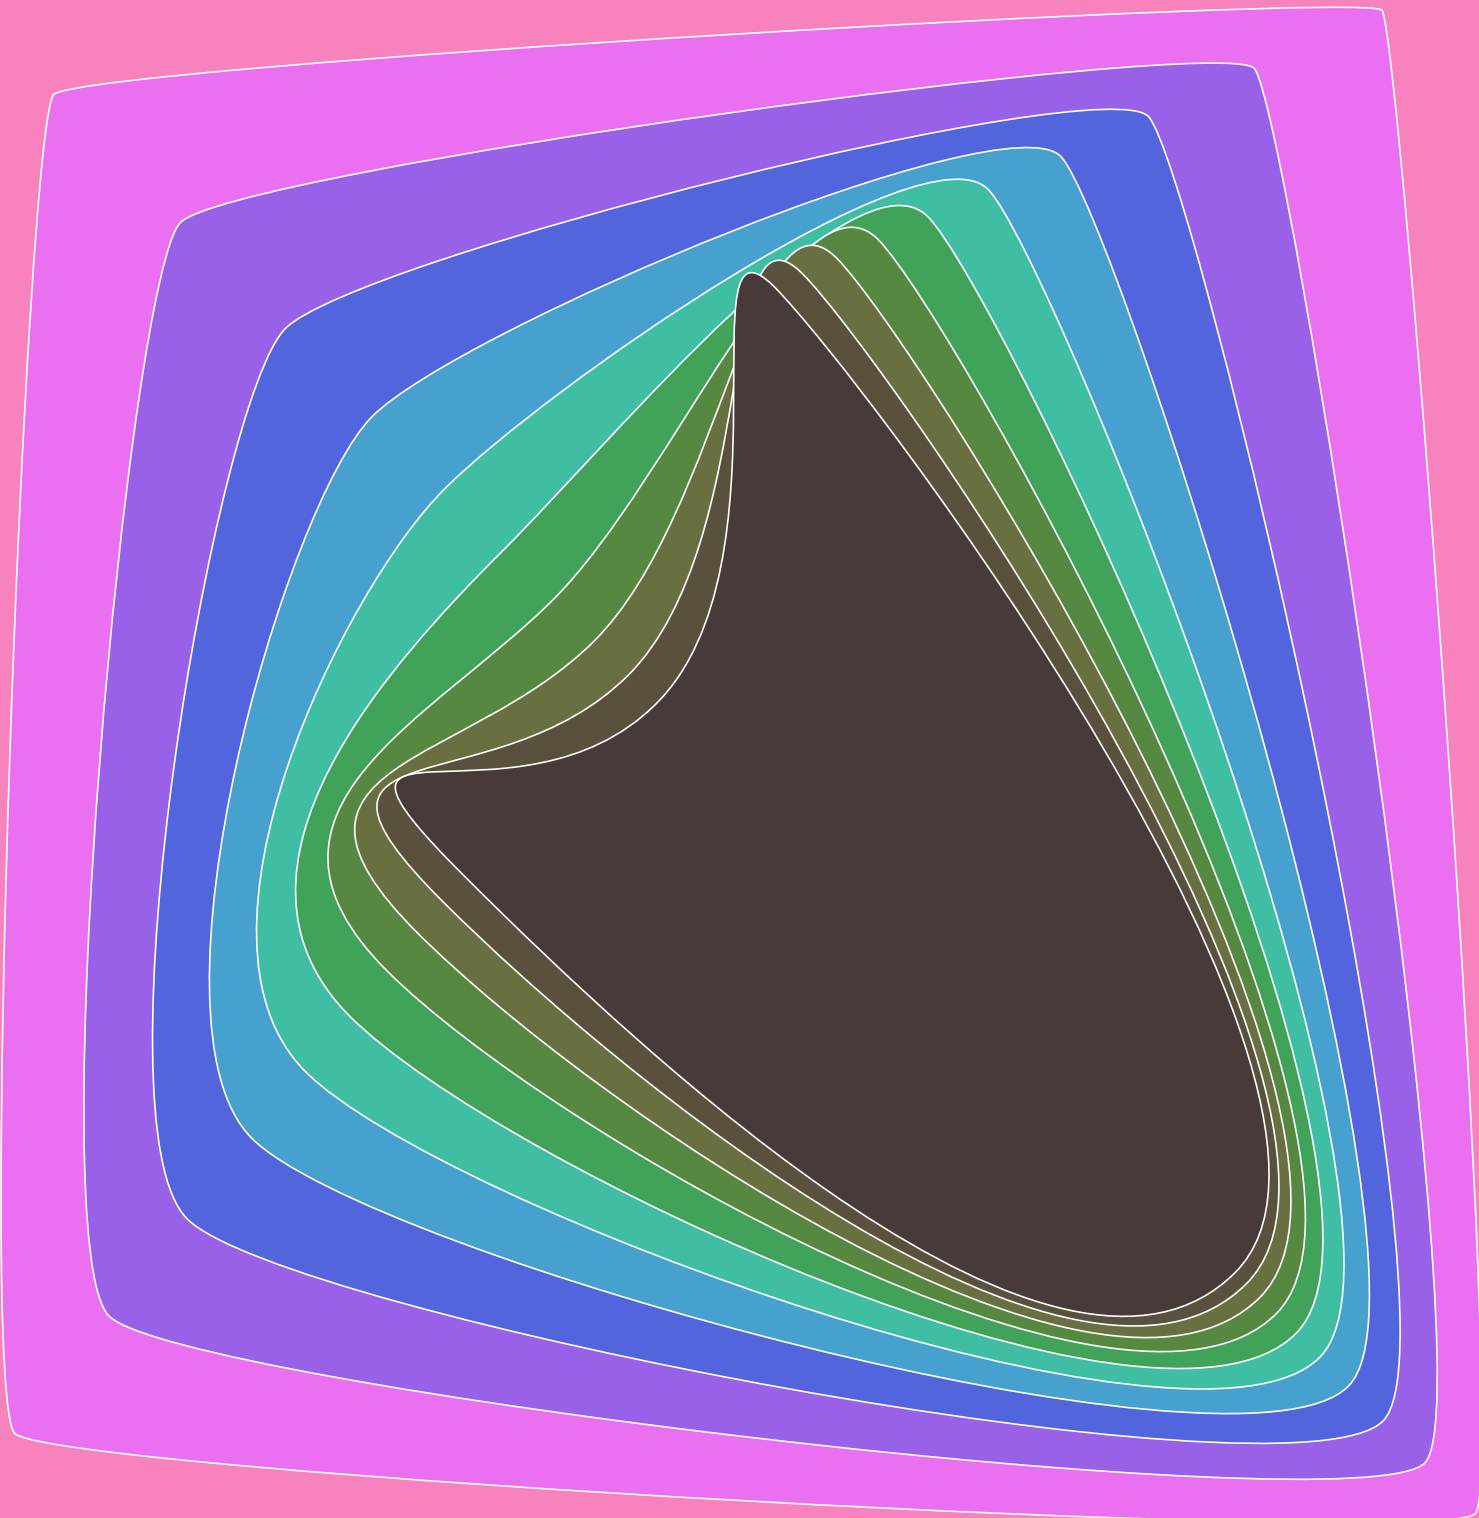

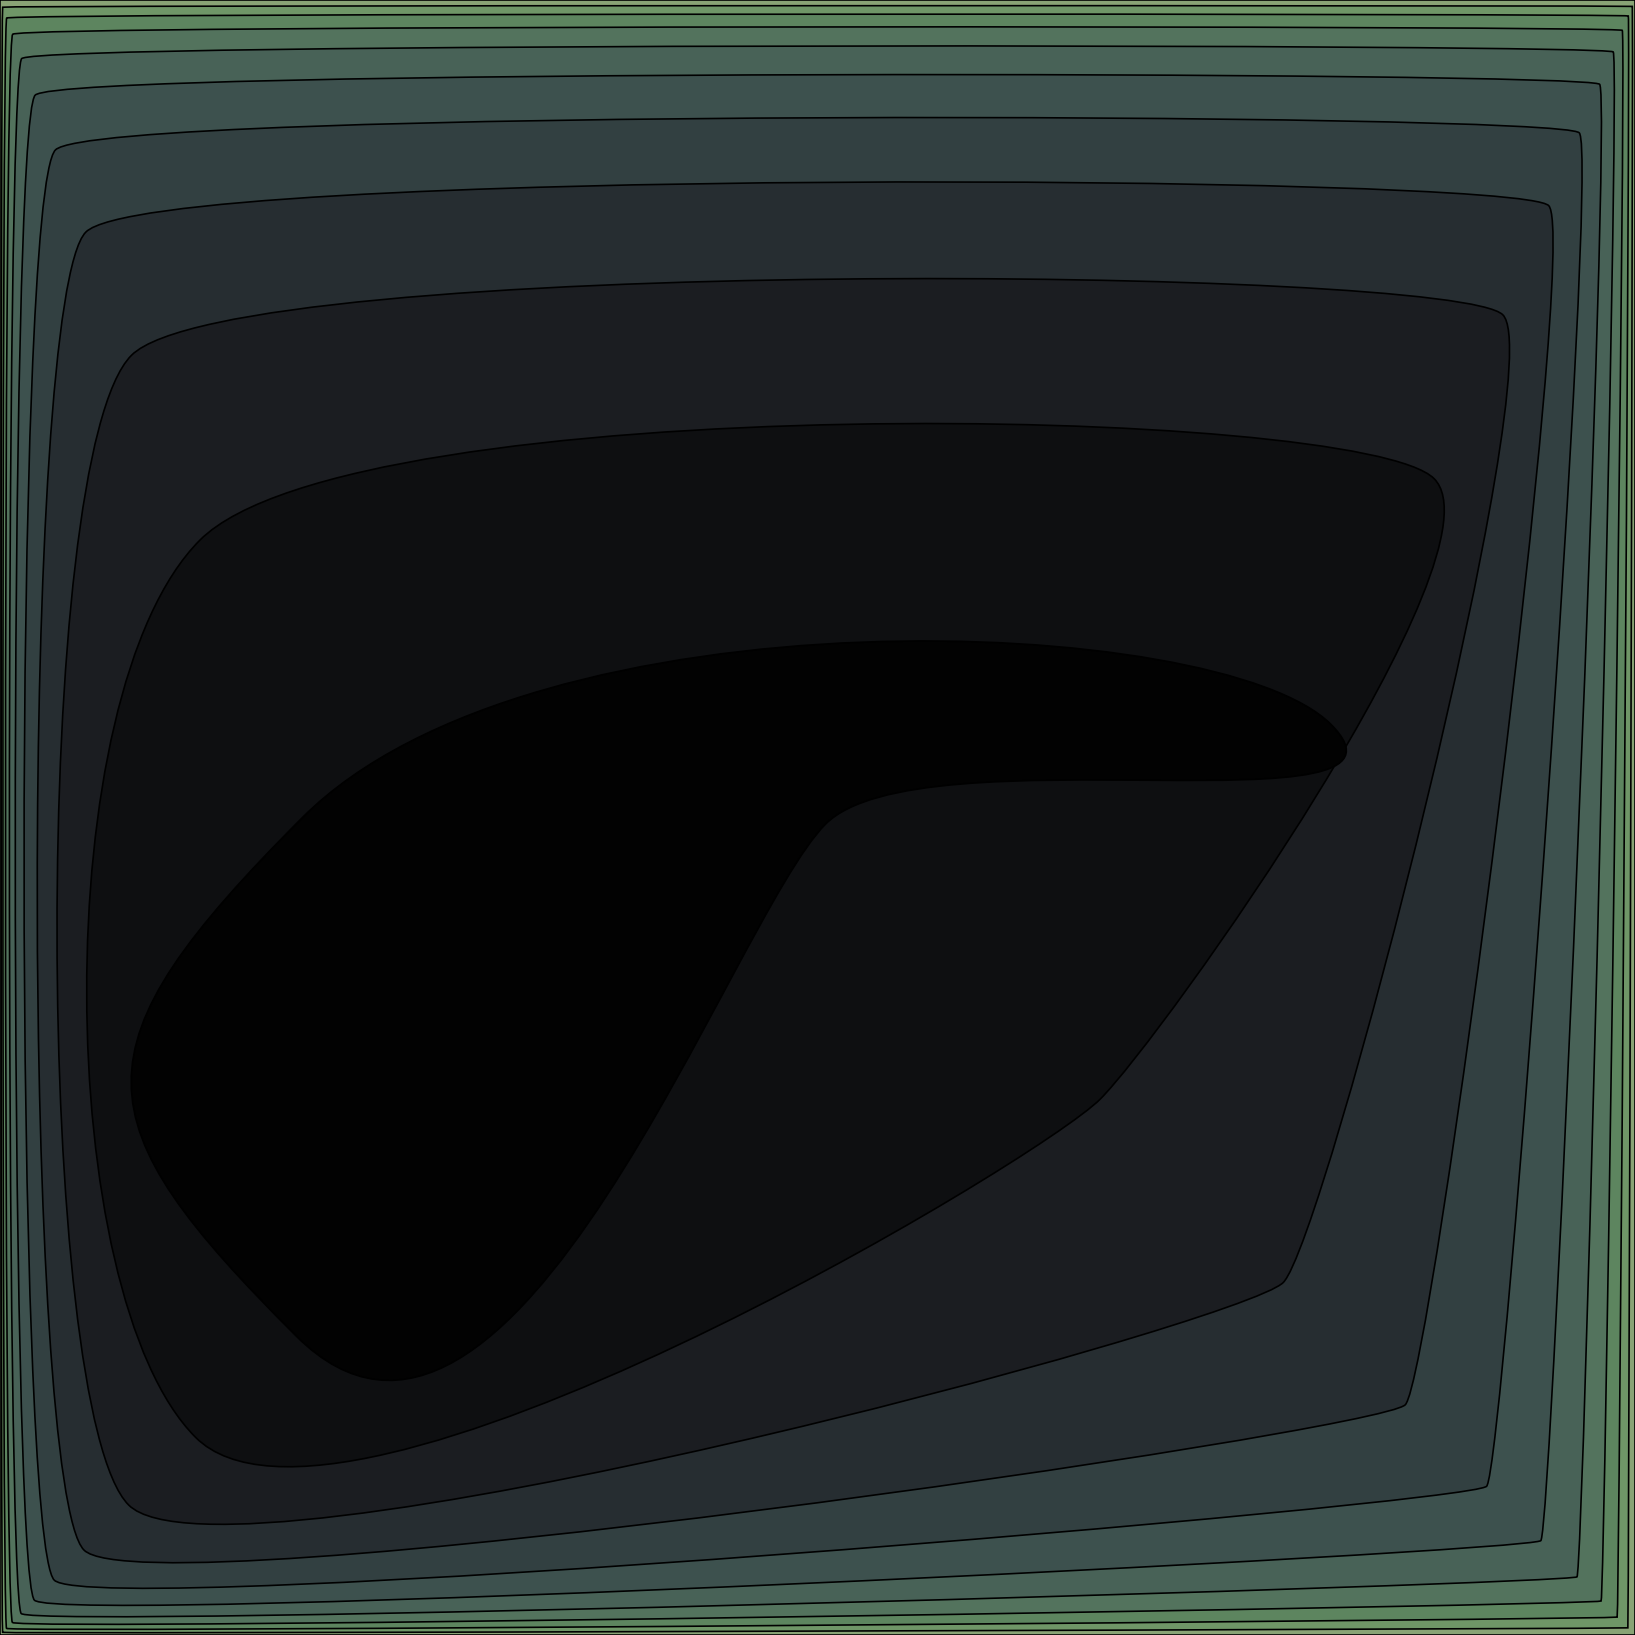

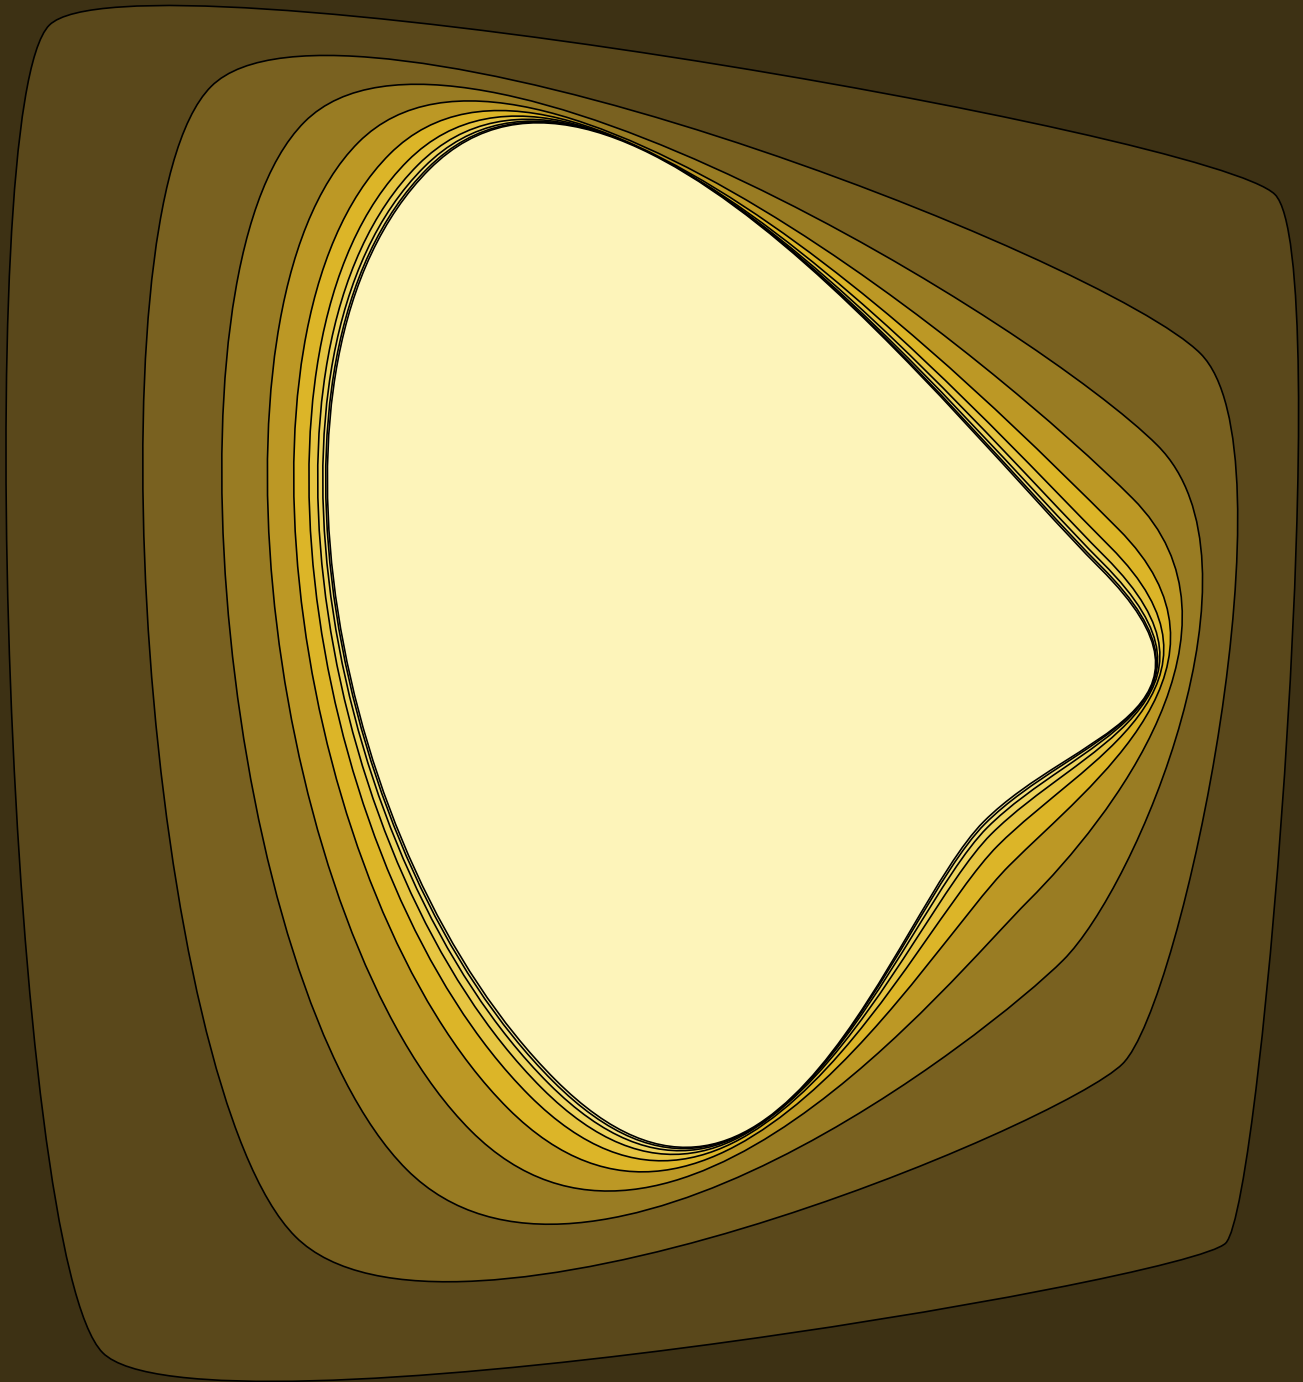

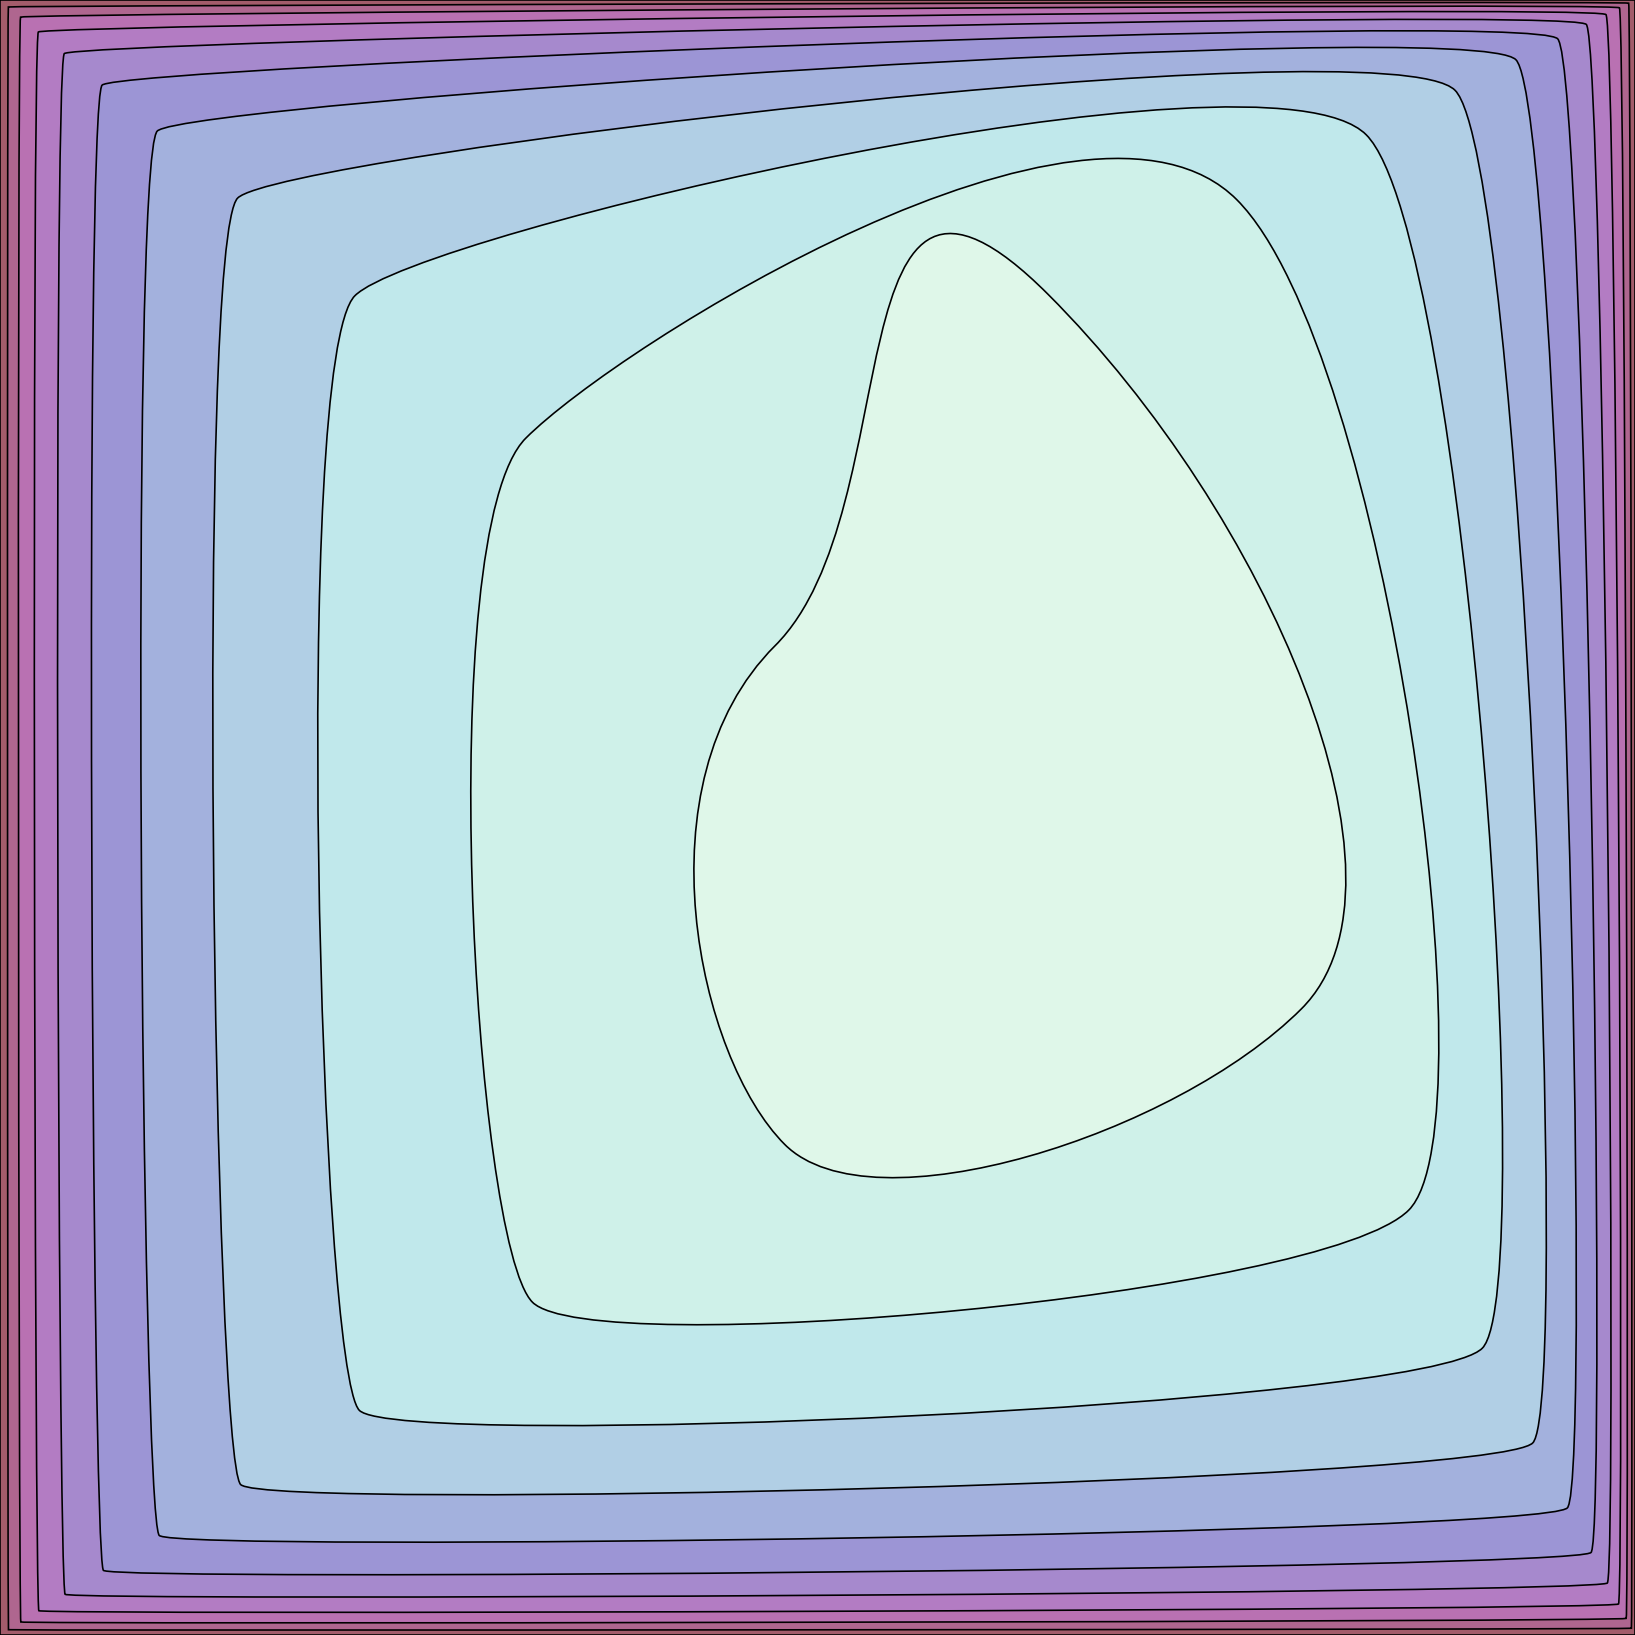

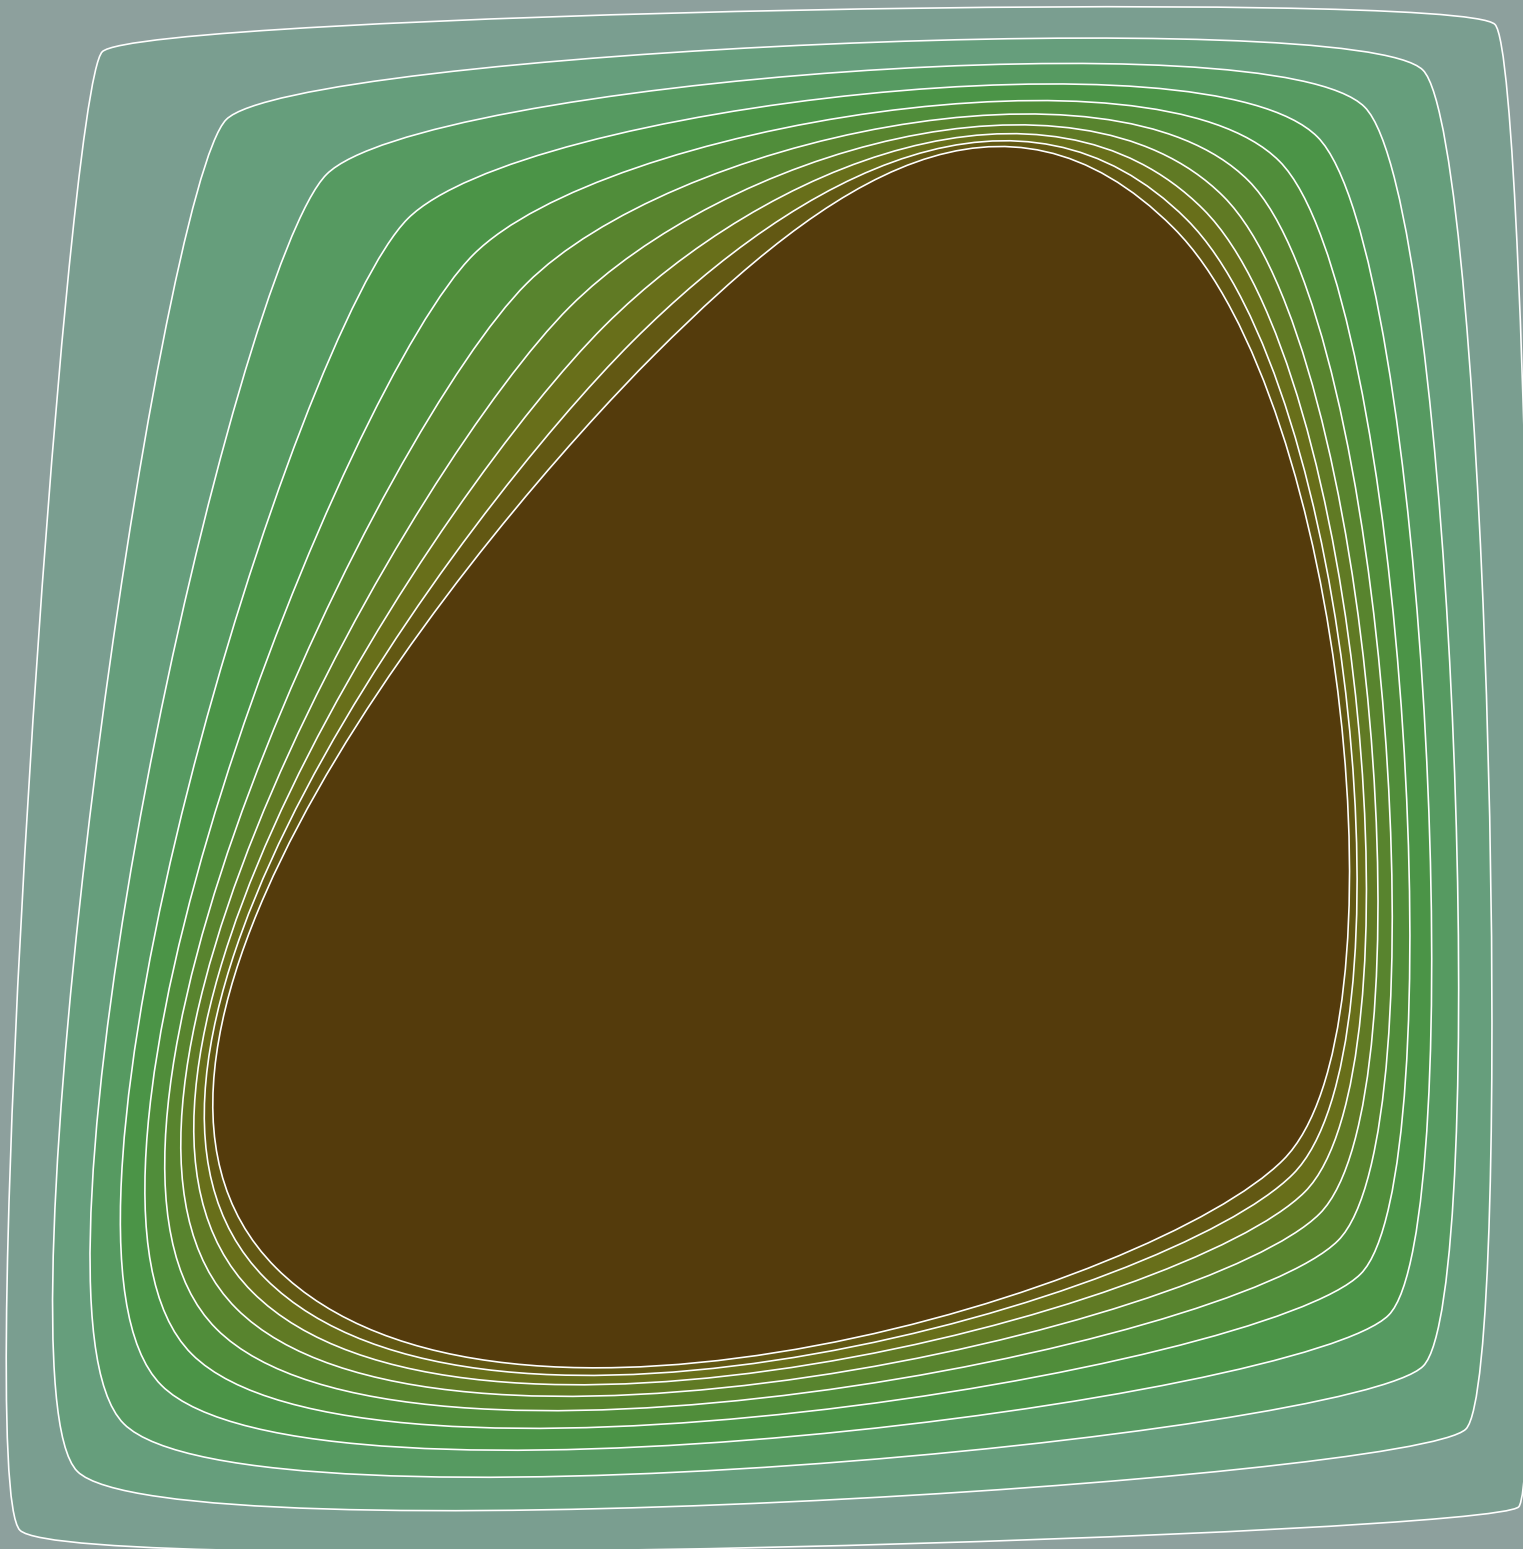

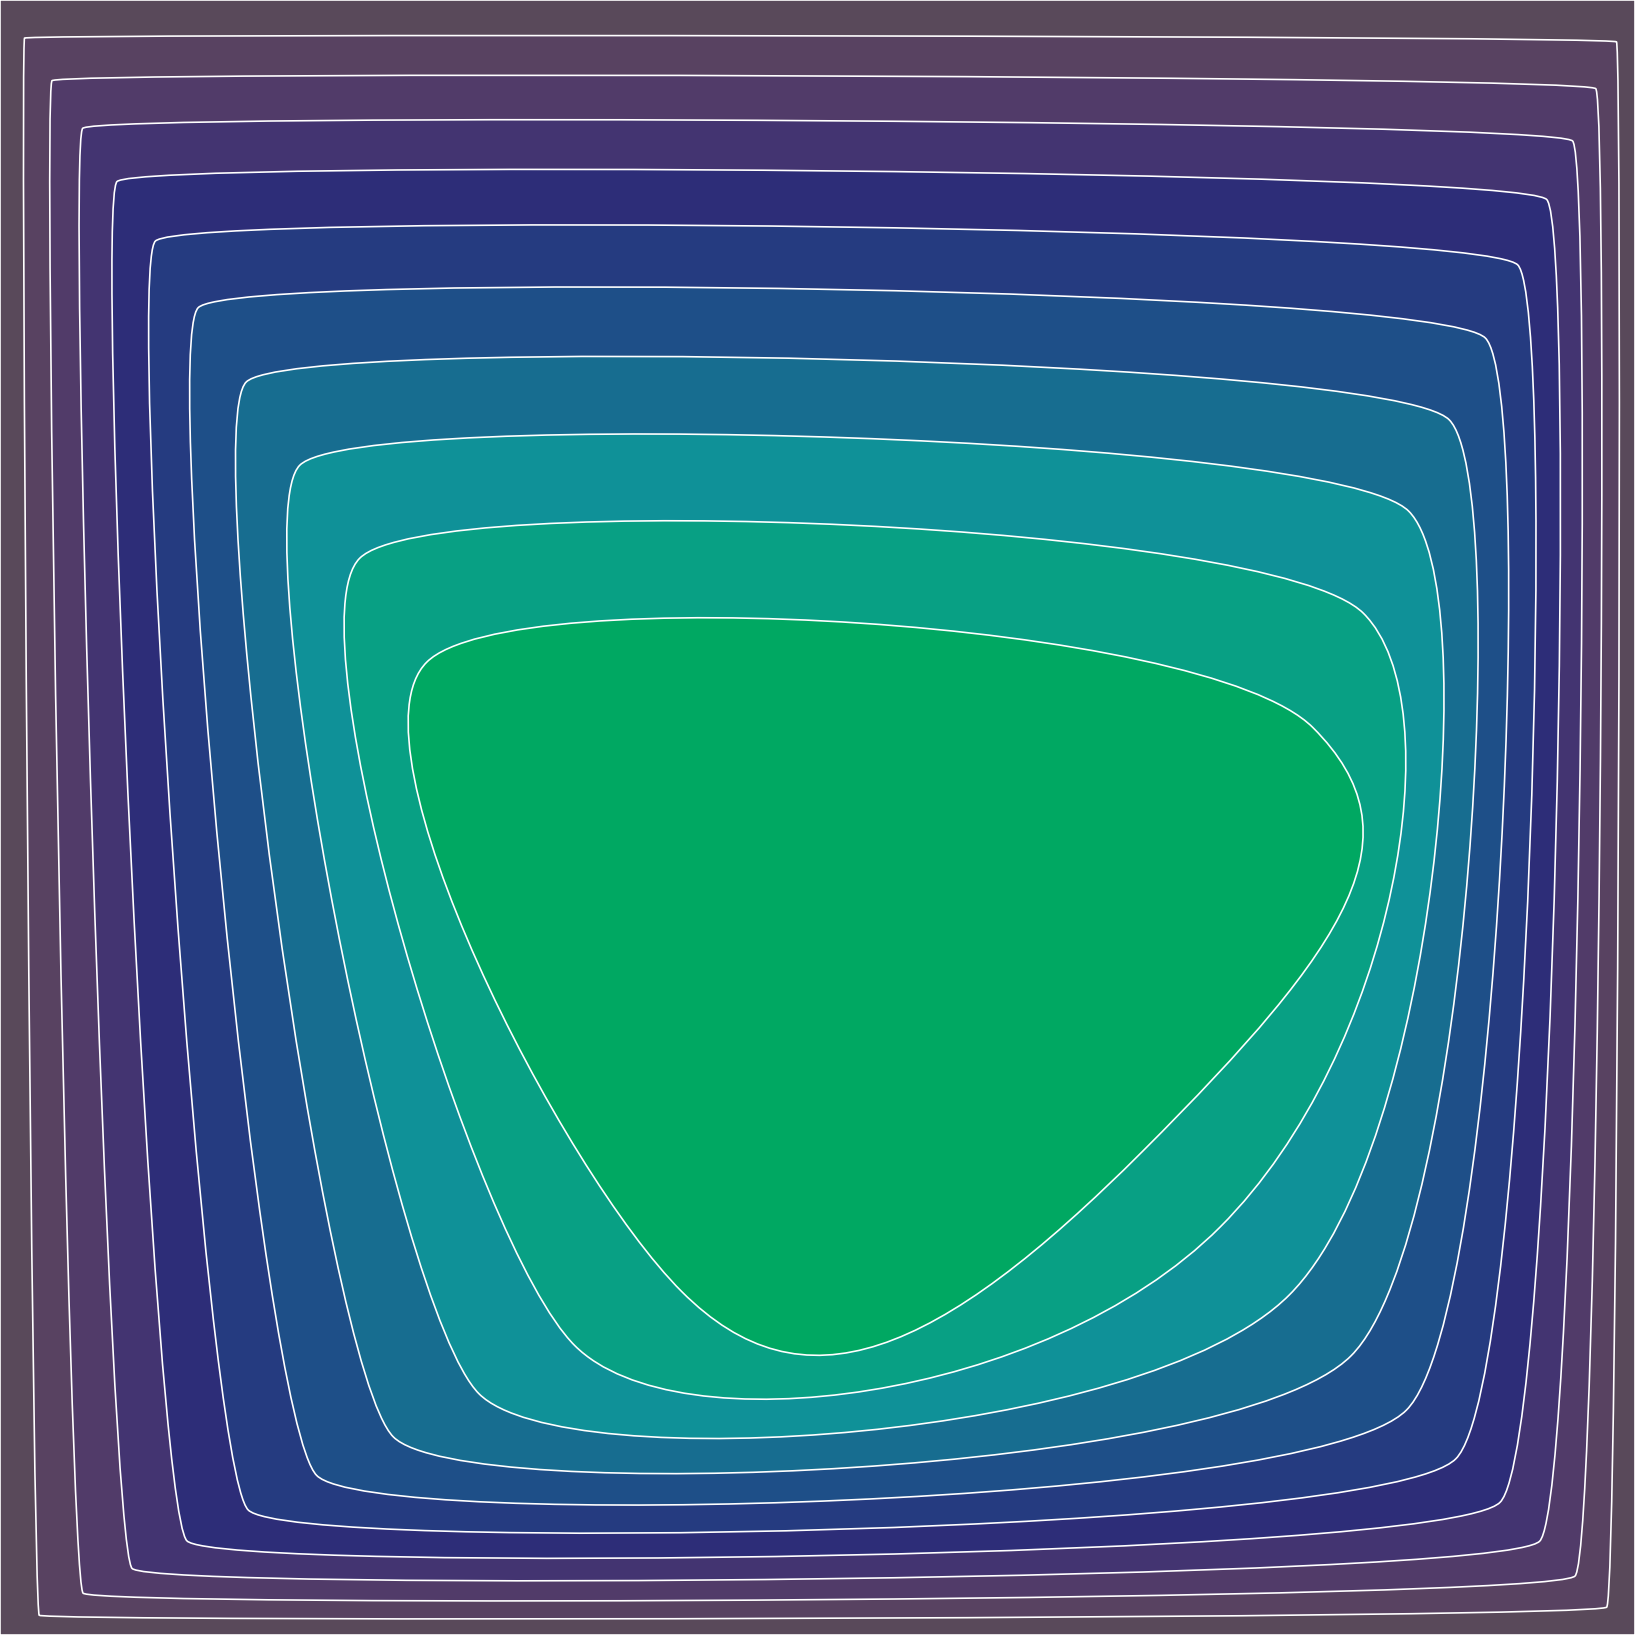

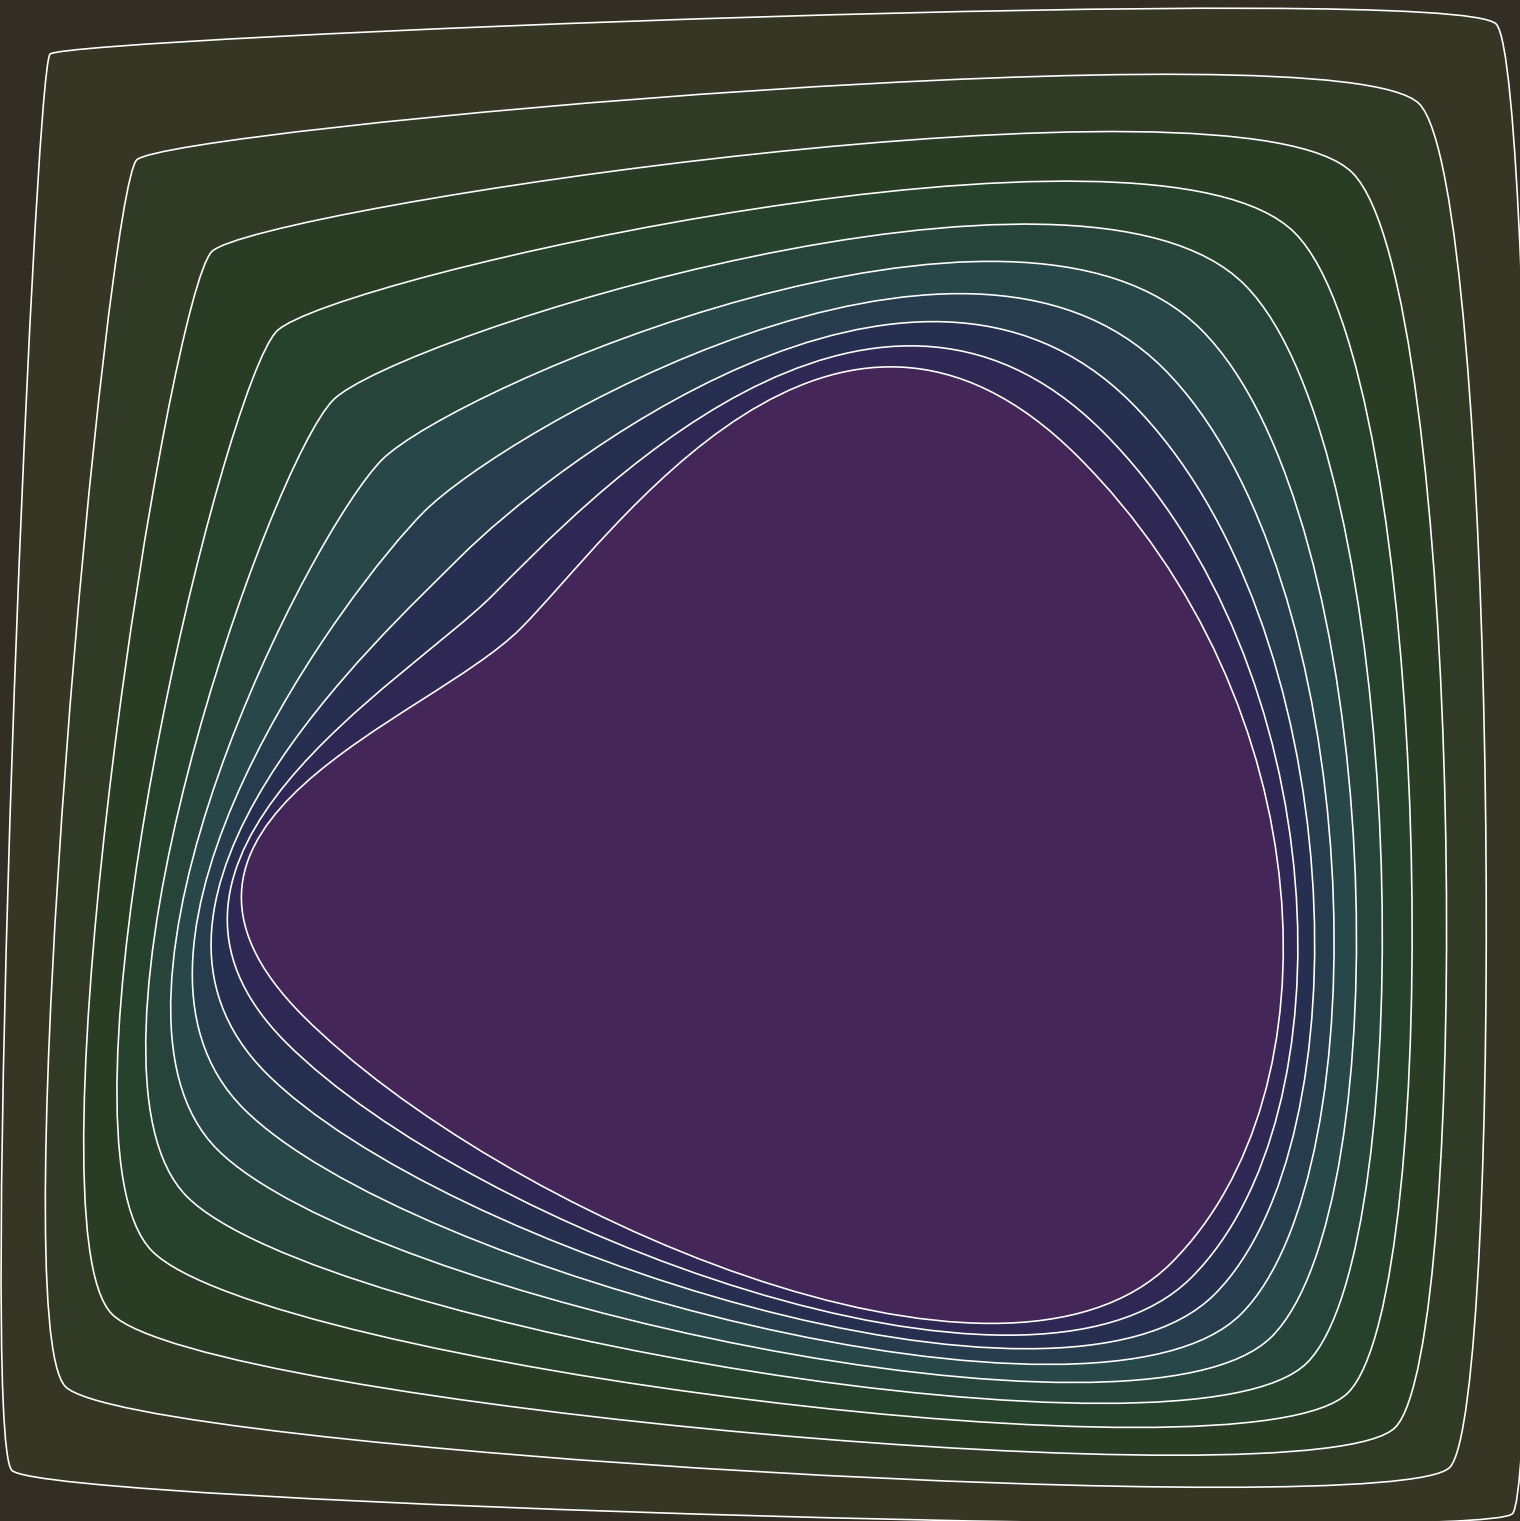

Every day my webserver generates a new book, filled with blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
